

chemical security personnel regarding services provided under the voluntary ChemLock security program. The Office of Chemical Security uses the information collected to ensure that sufficient space and resources are available at meetings; to follow up with registrants when required; to develop meeting materials for attendees; and efficiently generate attendee and speaker nametags. Additionally, it enables the Office of Chemical Security to gain a better understanding of the organizations participating in chemical security events, and subsequently also identify which segments of the sector are underrepresented. This then allows for the Office to target these underrepresented sector elements through outreach and awareness initiatives.

The changes to the collection include: changes to the burden costs, annual government costs, and revised and added data fields. In addition to the removal of historically retained fields that collect redundant or unnecessary information, and updating existing fields for accuracy and ease of use, two additional fields has been added:

- ‘How did you hear of this event,’ a field which was included in the original instrument for this collection, and removed in a previous revision, has now been re-added to the instrument.
- A field for the registrant’s company website has been added.

The annual burden cost for the collection has increased by \$5,751, from \$1,802 to \$7,553, largely due to an increase in the number of respondents associated with the shift to a hybrid event and updated compensation rates. Additionally, the scope of the collection has increased twofold: (1) the annual Chemical Security Summit, the event with which the calculations for this collection have been historically based, has moved to a hybrid format that allows for a dramatic increase in estimated registration numbers (from 400 previously to 1400), and (2) the utilization of this collection for the voluntary ChemLock program which adds an estimated 200 users per year. The annual government cost for the collection has increased by \$53,757, from \$8,347 to \$62,104, due to the shift to a hybrid event format and the associated increase in the number of registrations, which increased from 1,000 to 7,106.

This is a revision and renewal of an information collection.

OMB is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the

functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information,

3. including the validity of the methodology and assumptions used;

4. Enhance the quality, utility, and clarity of the information to be collected; and

5. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or

6. other forms of information technology, e.g., permitting electronic submissions of responses.
