SUPPLEMENTARY INFORMATION:**I. Background**

DoD is establishing "Information Technology Access and Audit Records (ITAAAR)", DoD-0019, as a DoD-wide Privacy Act system of records. A DoD-wide System of Records Notice (SORN) supports multiple DoD paper or electronic recordkeeping systems operated by more than one DoD component that maintain the same kind of information about individuals for the same purpose. Establishment of DoD-wide SORNs helps DoD standardize the rules governing the collection, maintenance, use, and sharing of personal information in key areas across the enterprise. DoD-wide SORNs also reduce duplicative and overlapping SORNs published by separate DoD components. The creation of DoD-wide SORNs is expected to make locating relevant SORNs easier for DoD personnel and the public, and create efficiencies in the operation of the DoD privacy program.

The purpose of this system is to control and track individual user access to and activity on networks, computer systems, applications, databases, or other digital technologies controlled by DoD Offices and Components. DoD may use the records in this system to investigate potential or alleged improper use or other improper activity by a system user, which may be a DoD employee, contractor, or other individual. Records from this system may be shared with or used by the appropriate investigative or cybersecurity organizations within the Office or Component with which the individual user is affiliated, other DoD
