in Oak Ridge, Tennessee.

two parts by letters dated September 29,  
2021, (Agencywide Documents Access  
and Management System (ADAMS)  
Accession No. ML21272A375) and

The NRC staff's Environmental Impact  
Statement and Safety Evaluation Report

may be viewed at ADAMS Accession  
Nos. ML23214A269 and ML23158A268,  
respectively. This mandatory hearing  
will concern safety and environmental  
matters relating to the requested  
construction permit application, as  
more fully described below.

**II. Evidentiary Uncontested Hearing**

hearing beginning at 9:00 a.m. ET on

The hearing will continue on  
subsequent days, if necessary.

**III. Presiding Officer**

The Commission is the presiding  
officer for this proceeding.

**IV. Matters To Be Considered**

The matter at issue in this proceeding  
is whether the review of the Kairos CP  
application by the Commission's staff  
has been adequate to support the  
findings found in 10 CFR 50.35, 50.40,  
50.50, and 10 CFR 51.105. Those  
findings are as follows:

*Issues Pursuant to the Atomic Energy  
Act of 1954, as Amended*

With respect to the CP: (1) whether  
the applicant has described the  
proposed design of the facility,  
including, but not limited to, the  
principal architectural and engineering  
criteria for the design, and has  
identified the major features or  
components incorporated therein for the  
protection of the health and safety of the  
public; (2) whether such further  
technical or design information as may  
be required to complete the safety  
analysis, and which can reasonably be  
left for later consideration, will be  
supplied in the final safety analysis  
report; (3) whether safety features or  
components, if any, which require  
research and development have been  
described by the applicant and the  
applicant has identified, and there will  
be conducted, a research and  
development program reasonably  
designed to resolve any safety questions  
associated with such features or  
components; (4) whether on the basis of  
the foregoing, there is reasonable  
assurance that—(i) such safety questions

will be satisfactorily resolved at or before the latest date stated in the application for completion of construction of the proposed facility, and (ii) taking into consideration the site criteria contained in 10 CFR part 100, the proposed facility can be constructed and operated at the proposed location without undue risk to the health and safety of the public; (5) whether there is reasonable assurance (i) that the construction of the facility will not endanger the health and safety of the public, and (ii) that construction activities can be conducted in compliance with the Commission's regulations; (6) whether the applicant is technically and financially qualified to engage in the proposed activities in accordance with the Commission's regulations in chapter I of title 10 of the CFR; (7) whether the issuance of a permit for the construction of the facility to the applicant will not, in the opinion of the Commission, be inimical to the common defense and security or to the health and safety of the public; and (8) whether the application meets the standards and requirements of the AEA and the Commission's regulations, and that notifications, if any, to other agencies or bodies have been duly made.

*Issues Pursuant to the National Environmental Policy Act (NEPA) of 1969*

With respect to the CP: (1) determine whether the requirements of Sections 102(2)(A), (C), and (E) of NEPA and the applicable regulations in 10 CFR part 51 have been met; (2) independently consider the final balance among conflicting factors contained in the record of the proceeding with a view to determining the appropriate action to be taken; (3) determine, after weighing the environmental, economic, technical, and other benefits against environmental and other costs, and considering reasonable alternatives, whether the construction permit should be issued, denied, or appropriately conditioned to protect environmental values; and (4) determine whether the NEPA review conducted by the NRC staff has been adequate.

**V. Schedule for Submittal of Pre-Filed Documents**

No later than September 28, 2023, unless the Commission directs otherwise, the NRC staff and the applicant shall submit a list of its anticipated witnesses for the hearing.

Any statements and supporting documentation (if any) received by the Commission using the agency's E-filing system<sup>1</sup> by the deadline indicated above will be made part of the record of the proceeding. The Commission will use such statements and documents as appropriate to inform its pre-hearing questions to the NRC staff and applicant, its inquiries at the oral hearing, and its decision following the hearing. The Commission may also request, no later than September 15, 2023, that one or more particular States, local government bodies, or Indian Tribes send one representative each to the evidentiary hearing to answer Commission questions and/or make a statement for the purpose of assisting the Commission's exploration of one or more of the issues raised by the State, local government body, or Indian Tribe, in the pre-hearing filings described above. The decision whether to request the presence of a representative of a State, local government body, or Indian Tribe at the evidentiary hearing to make a statement and/or answer Commission questions is solely at the Commission's discretion.
