

Mocuba at a new site across the Licungo River via a 16km bypass.

- *Rural Roads Activity*—This activity will focus on select segments of arterial and secondary routes for inclusion in the Compact to improve access to regional capitals, markets, and social services.

- *Policy and Institutional Reforms on Road Maintenance Activity*—This activity seeks to improve the reliability and adequacy of funding for road maintenance and build capacity for road asset management at the provincial level, as well as to promote gender equity and social inclusion within the transport sector, specifically enhancing opportunities for women and excluded groups in the road sector.

In addition to the above activities, the Compact will support a project-specific program management office to supervise the CTR Project. This project management consultant is necessary to ensure the geographically dispersed construction works in Zambezia are well managed.

The objective of the Promoting Reform and Investment in Agriculture (PRIA) Project is to increase agricultural investment as well as the productivity and incomes of smallholder farmers, including female-headed households,

and other value chain actors in Mozambique.

This project is organized into two activities:

- *Reforms Package for Taxation of Agricultural Investment Activity*—This activity is a public financial management activity that includes support for policy and institutional reform of the national taxation framework in the agriculture sector, with a focus on improving consistency and predictability of the value added tax, the corporate income tax, and local tax application within both formal and informal markets.

- *Zambezia Commercial Aggregator (ZCAP) Activity*—This activity will employ results-based financing (*i.e.*, success payments) and technical assistance to develop and strengthen sustainable market linkages and contracts between commercial agricultural aggregators and smallholder farmers. The ZCAP Activity will prioritize women smallholder farmers and provide tailored training to smallholder farmer households through the ‘Gender Action Learning System’ to redress power imbalances.

The Coastal Livelihoods and Climate Resilience (CLCR) Project seeks to increase ecosystem productivity through

sustainable increases in fish and shellfish harvests and through non-extractive benefits from sustainable ecosystems, such as carbon credits and coastal protection benefits.

This project is organized into two activities:

- *Coastal Livelihoods Activity*—This activity will help local communities better manage their fisheries through modernization of practice, improvement to their fishing gear, improved supply chain, and governance of local areas (establishment of no-catch zones to replenish stocks).

- *Climate Resilience Activity*—This activity will protect and restore critical habitats through co-management with local communities, conservation and creation of protected areas, reforestation initiatives, and through carbon finance opportunities.
