SUPPLEMENTARY INFORMATION:

I. Abstract

Under the Aluminum Import Monitoring and Analysis (AIM) system, importers, custom brokers, or their agents are required to obtain an import license for each entry of covered aluminum products. To obtain an import license, each applicant must identify, among other fields, the country or countries where the largest and second largest volume of primary aluminum used in the manufacture of the imported aluminum product was smelted and the country where the

aluminum product was most recently cast. On December 23, 2020, Commerce published the final rule adopting regulations establishing the AIM system in 19 CFR part 361 (85 FR 83804; December 23, 2020).

The import license information is necessary to assess import trends of aluminum products. In order to effectively monitor aluminum imports, Commerce must collect and provide timely aggregated summaries about the imports. The Aluminum Import License form is the tool used to collect the necessary information. The Census Bureau currently collects import data and disseminates aggregate information about aluminum imports. However, the time required to collect, process, and disseminate this information through Census can take up to 45 days after importation of the product, giving interested parties and the public far less time to respond to injurious sales.

II. Method of Collection

The license application can be submitted electronically via the Commerce website (<https://trade.gov/aluminum>) or completed electronically and emailed to the Department.
