Description of Relief Sought: The petitioner has requested relief from § 23.775(h)(1), which requires that, for commuter category airplanes, windshield panes and their supporting structures must withstand, without penetration, the impact of a two-pound bird when the velocity of the airplane (relative to the bird along the airplane's flight path) is equal to the airplane's maximum approach flap speed. The requested relief is for the Textron Model 390 airplane, Type Certificate A00010WI, which was certified as normal category.
