BILLING CODE 4162–20–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

Extension and Expansion of Declaration Zone Test

AGENCY: U.S. Customs and Border Protection, DHS.

ACTION: General notice.

SUMMARY: On August 30, 2021, U.S. Customs and Border Protection (CBP) announced in the **Federal Register** that CBP would conduct a Declaration Zone test at cruise terminal facilities at participating sea ports of entry (POEs) that would run for approximately two years. This document announces that CBP is extending the test period for an additional two years. In addition to the extension, this document announces that CBP intends to expand the Declaration Zone test to up to eighteen additional sea POEs, as well as to travelers being processed in Simplified Arrival for open loop cruises. The Declaration Zone test allows for streamlined processing by allowing a demonstrative initial declaration for arriving travelers in lieu of an oral or written declaration of all articles brought into the United States to a CBP officer as required by current CBP regulations.

DATES: CBP is extending the Declaration Zone test at cruise terminal facilities at participating sea POEs until October 16, 2025. CBP is expanding the Declaration Zone test to eligible open loop cruises no sooner than October 1, 2023. The expansion date may vary at each location.

ADDRESSES: Written comments concerning program, policy, and technical issues may be submitted at any time during the test period via email to BiometricSea@cbp.dhs.gov. Please use “Comment on Declaration Zone Test” in the subject line of the email.

FOR FURTHER INFORMATION CONTACT: Maria Rivera, Program Manager, Biometric Entry-Exit Strategic Transformation, Office of Field Operations, maria.c.rivera@cbp.dhs.gov or (202) 325–4596.

SUPPLEMENTARY INFORMATION:

Background

On August 30, 2021, U.S. Customs and Border Protection (CBP) announced in the **Federal Register** (86 FR 48436) that CBP would conduct a Declaration Zone test at cruise terminal facilities at participating sea ports of entry (POEs). The notice describes the Declaration Zone test, while setting forth requirements for participating in the test, the duration of the test, and how CBP will evaluate the test. The notice also invites public comment on any aspect of the test. In brief, the Declaration Zone test fulfills the declaration requirement under CBP regulations, while also allowing for streamlined processing. Current CBP regulations require each traveler to provide an oral or written declaration of all articles brought into the United States to a CBP officer. *See* 19 CFR part 148, subpart B. The Declaration Zone test provides arriving travelers with an alternative method to meet this requirement by allowing a demonstrative initial declaration through the use of declaration zones at cruise terminal facilities at select sea POEs.

Description and Procedures

The 2021 notice provides the description and procedures for the Declaration Zone test. 86 FR 48437. Within a cruise terminal facility participating in the Declaration Zone test, two distinct customs declaration zone queues are established for entering the egress area: one for *No Items to Declare* and another for *Items to Declare*. Signage is posted to clearly label the queues at the entrance to the egress area after travelers collect their luggage. The physical act of selecting the *No Items to Declare* queue or the *Items to Declare* queue in and of itself constitutes an initial demonstrative declaration. CBP officers conduct roving enforcement operations within the baggage collection and egress area to ensure traveler compliance.

No Items To Declare Queue

Travelers who determine they have nothing to declare enter the *No Items to Declare* queue and proceed through the egress area to the facility exit. CBP officers conduct roving operations in the *No Items to Declare* zone to affirm traveler compliance, receive oral declarations, and make referrals to secondary inspection as necessary. Travelers who are not questioned by CBP officers conducting roving operations may proceed to the exit.
