

intended function without unreasonable adverse effects on human health or the environment. Registration review dockets contain information that will assist the public in understanding the types of information and issues that the agency may consider during registration reviews. As part of the registration review process, the Agency has completed preliminary workplans for all pesticides listed in Table 1 in Unit IV. EPA initiates a registration review by establishing a public docket for a pesticide registration review case. The docket contains a Preliminary Work Plan (PWP) summarizing information EPA has on the pesticide and the anticipated path forward. Through this program, the EPA is ensuring that each

pesticide's registration is based on current scientific and other knowledge, including its effects on human health and the environment.

III. Authority

The EPA is conducting its registration review of the chemicals listed in Table 1 in Unit IV pursuant to section 3(g) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Procedural Regulations for Registration Review at 40 CFR part 155, subpart C. Section 3(g) of FIFRA provides, among other things, that the registrations of pesticides are to be reviewed every 15 years. Under FIFRA, a pesticide product may be registered or remain registered only if it meets the statutory standard for registration given in FIFRA section

3(c)(5) (7 U.S.C. 136a(c)(5)). When used in accordance with widespread and commonly recognized practice, the pesticide product must perform its intended function without unreasonable adverse effects on the environment; that is, without any unreasonable risk to man or the environment, or a human dietary risk from residues that result from the use of a pesticide in or on food.

IV. Registration Reviews

A. What action is the agency taking?

Pursuant to 40 CFR 155.50, this notice announces the availability of the EPA's preliminary work plans for the pesticides shown in Table 1 and opens a 60-day public comment period on the work plans.

TABLE 1—PRELIMINARY WORK PLANS BEING MADE AVAILABLE FOR PUBLIC COMMENT

Registration review case name and No.	Docket ID No.	Chemical review manager and contact information
<i>Aureobasidium pullulans</i> Case No. 6521	EPA-HQ-OPP-2023-0064	Susanne Cerrelli, cerrelli.susanne@epa.gov (202) 566-1516.
Cyflumetofen Case No. 7463	EPA-HQ-OPP-2022-0194	Susan Bartow, bartow.susan@epa.gov (202) 566-2280.

B. Docket Content

The registration review docket contains information that the agency may consider in the course of the registration review. The agency may include information from its files including, but not limited to, the following information:

- An overview of the registration review case status.
- A list of current product registrations and registrants.
- **Federal Register** notices regarding any pending registration actions.
- **Federal Register** notices regarding current or pending tolerances.
- Risk assessments.
- Bibliographies concerning current registrations.
- Summaries of incident data.
- Any other pertinent data or information.

Each docket contains a document summarizing what the agency currently knows about the pesticide case and a preliminary work plan for anticipated data and assessment needs. Additional documents provide more detailed information. During this public comment period, the agency is asking that interested persons identify any additional information they believe the agency should consider during the registration reviews of these pesticides. The agency identifies in each docket the areas where public comment is specifically requested, though comment in any area is welcome.

The registration review final rule at 40 CFR 155.50(b) provides for a minimum 60-day public comment period on all preliminary registration review work plans. This comment period is intended to provide an opportunity for public input and a mechanism for initiating any necessary changes to a pesticide's workplan. All comments should be submitted using the methods in **ADDRESSES** and must be received by the EPA on or before the closing date. These comments will become part of the docket for the pesticides included in Table 1 in Unit IV. Comments received after the close of the comment period will be marked "late." The EPA is not required to consider these late comments.

The agency will carefully consider all comments received by the closing date and may provide a "Response to Comments Memorandum" in the docket. The final registration review work plan will explain the effect that any comments had on the final work plan and provide the agency's response to significant comments.
