In order to address facility requirements needed to support current and future mission structure changes and the associated increase in mission personnel, the Air Force is proposing two alternatives to gain functional capacity and support future mission growth at Nellis AFB: Alternative 1, complete build-out covering approximately 2,000 acres, and Alternative 2, partial build-out covering approximately 1,486 acres. The Air Force will also evaluate a No Action Alternative in the EIS. The Air Force is early in the planning process and has not yet identified a Preferred Alternative.

The EIS will provide analysis to inform decision-makers, as well as the public and tribal partners, of the potential environmental consequences and any associated mitigation, and will provide interested persons or agencies opportunities to provide their input. The environmental impacts analysis is expected to focus on potential impacts related to air emissions from construction, potential threatened and endangered species impacts from construction and habitat reduction, soil and water quality impacts from soil compaction and erosion, stormwater impacts from the increase in impervious surfaces, and potential impacts to cultural resources. Impacts to transportation may include increased traffic on and off the Installation. Permitting actions for construction, air emissions, and stormwater pollution prevention may be required. The Air Force will also consult with appropriate resource agencies and Native American tribes to determine the potential for significant impacts. Consultation will be incorporated into the preparation of the EIS and will include, but not be limited to, consultation under Section 7 of the Endangered Species Act and consultation under Section 106 of the National Historic Preservation Act. Additional analysis will be provided in the Draft EIS.

*Scoping and Agency Coordination:* To effectively define the full range of issues to be evaluated in the EIS, the Air Force is soliciting comments from interested local, state, and federal officials and agencies; Native American tribes; and interested members of the public and other stakeholders. Comments are requested on potential alternatives and impacts, and identification of any

relevant information, studies, or analyses of any kind concerning impacts affecting the quality of the natural and/or human environment. Concurrent with the publication of this Notice of Intent, public scoping notices will be announced locally.
