The Attorney General has delegated authority under the CSA and all subsequent amendments to the CSA to the Administrator of the DEA pursuant to 28 CFR 0.100. The Special Surveillance List may be updated as needed to reflect changes in the chemicals, products, materials, or equipment used in the manufacture of controlled substances and listed chemicals by publication of a notice in the **Federal Register**. DEA will disseminate the updated Special Surveillance List as widely as possible. In addition, the Special Surveillance List will be available on the DEA Diversion Control homepage at <https://www.deadiversion.usdoj.gov/>.

Regulatory Analyses

The updated Special Surveillance List applies to all individuals and firms which distribute the listed chemicals and laboratory supplies (chemicals, products, materials, or equipment) on the list. As noted above, the Special Surveillance List serves two purposes. First, it informs individuals and firms of the potential use of the items on the list in the manufacture of controlled substances and listed chemicals. Second, it reminds individuals and firms that civil penalties may be imposed on them if they distribute a laboratory supply to a person with reckless disregard for the illegal use to which such a laboratory supply will be put.

This update provides an increased level of law enforcement control to prevent the diversion of laboratory supplies used for the manufacture of listed chemicals and controlled substances. It does not impose any new regulatory burden on the public as there are no corresponding recordkeeping or reporting requirements of the laboratory supplies. However, it does impose potential civil penalties for the distribution of a laboratory supply to a person who uses, or attempts to use, that laboratory supply to manufacture a controlled substance or a listed chemical, if that distribution was made with reckless disregard for the illegal uses to which such laboratory supply will be put. This update fulfills the requirement imposed by section 205 of the MCA that the Attorney General shall publish a Special Surveillance List which contains chemicals, products,

materials, or equipment used in the manufacture of listed chemicals and controlled substances.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA’s estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary

duplication of effort in obtaining information (29 U.S.C. 657).

The following sections describe who use the information collected under each requirement, as well as how they use it. The purposes of these requirements are to address the burden hours associated with gathering information to complete the OSHA 70 Form. The OSHA 70 Form is used by applicants seeking accreditation from OSHA to be able to test or examine certain equipment and material handling devices as required under the maritime regulations, part 1915 (Shipyard Employment), part 1917 (Marine Terminals), and part 1918 (Longshoring). The OSHA 70 Form application for accreditation provides an easy means for companies to apply for accreditation.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency’s functions to protect workers, including whether the information is useful;
- The accuracy of OSHA’s estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection, and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend the approval of the information collection requirements contained in the Gears Certification Standard. The agency is requesting that there is no change in burden hours in the information collection requirements of this standard. The costs are adjusted due to updated calculations.

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.

Type of Review: Extension of a currently approved collection.

Title: Gear Certification Standard (29 CFR part 1919).
