[Docket No. RM23–11–000; Order No. 899]

Requests for Commission Records Available in the Public Reference Room

AGENCY: Federal Energy Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission (Commission) amends its regulations concerning requests for Commission records available in the Public Reference Room and from the Commission's website. Specifically, the Commission's regulations are revised to remove references to the physical Public Reference Room at the Commission's headquarters, as the Commission no longer has a physical Public Reference Room. The revised regulations will direct the public to access the records that were formerly available in the Commission's physical Public Reference Room, which was located at the Commission's headquarters, 888 First Street NE, Washington, DC 20426, through the Commission's website. Other Commission regulations are being amended to reflect this change to provide consistency by directing the public to the Commission's website for records and/or assistance in obtaining Commission records.

DATES: This rule is effective November 29, 2023. The incorporation by reference of certain material listed in the rule was approved by the Director of the Federal Register as of April 27, 2020, and August 2, 2021.

SUPPLEMENTARY INFORMATION:**I. Introduction**

1. The Commission amends its regulations concerning requests for Commission records available in the Commission's physical Public Reference Room. Specifically, this final rule revises 18 CFR 388.106 to delete references to a physical Public

Reference Room, as the Commission no longer has a physical Public Reference Room. The revised regulations will direct the public to obtain records through the Commission's website (www.ferc.gov), which includes eLibrary, the official repository of the Commission's records. Moreover, given that the Commission's headquarters will no longer have a physical Public Reference Room, the Commission is revising other regulations, where necessary, to direct the public to the Commission's website (www.ferc.gov) for access to Commission records previously available in the Public Reference Room.

II. Discussion

2. The purpose of this final rule is to ensure that members of the public can easily obtain Commission records online that were once available in physical form in the Public Reference Room located at the Commission's headquarters. This final rule is consistent with government-wide initiatives to transition from hardcopy records to electronic records. Notably, the FOIA Improvement Act of 2016 revised that part of the Freedom of Information Act (FOIA) regarding agency Public Reference Rooms, to provide that materials must be available "for public inspection in an electronic format."¹ Likewise, the National Archives Records Administration (NARA)² and the Office of Management and Budget³ have directed agencies to transition records to digital or electronic forms to the greatest extent possible. This final rule continues the Commission's efforts to comply with the government transition to electronic recordkeeping.

3. In that regard, the Commission's action here aligns with that of other agencies that have removed their

physical Public Reference Rooms. For example, in December 2019, the Department of Education issued a final rule requiring records to be available for public inspection only in an electronic format.⁴ In the final rule, the Department of Education indicated that it was making this change "to reflect the emphasis in 5 U.S.C. 552(a)(2) on electronic inspection for agency records created on or after November 1, 1996."⁵ The Securities and Exchange Commission, similarly in August 2021, adopted a final rule amending its regulations to remove references to its Public Reference Room due to the lack of use of the facilities.⁶

4. Moreover, in recent years, visitation and usage of the Commission's physical Public Reference Room has substantially decreased. Over the past 20 years, the public has increasingly sought Commission records electronically through the Commission's website as opposed to visiting the physical Public Reference Room in-person. For instance, there were only four requests for hard copy documents from walk-in visitors to the Public Reference Room in 2018, and in 2019, there were only seven requests.⁷ Given government-wide directives to digitize the government's paper records and the declining use of the physical Public Reference Room at the Commission's headquarters, physical access to public records does not align with Federal initiatives and trends throughout the government and the country, which call for transitioning to a paperless environment.

5. The Commission will, however, ensure that the public will be able to access the same records electronically. As such, Commission staff intends to make hardcopy records electronically available, which, along with the majority of Commission submissions and issuances, will be accessible on the Commission's website. Commission staff will also continue enhancing online resources to make it convenient

⁷ In addition, after the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020, the Commission closed its headquarters building to outside visitors, which meant that the public no longer had physical access to the Public Reference Room. During the two and a half years that the Commission's headquarters building (including the physical Public Reference Room) was closed to the public, no one requested to visit the Public Reference Room and all requests for Commission documents were made either via email or by telephone.

for the public to obtain official records electronically. The public will be able to access records and receive the same level of service from Commission staff when they seek assistance in obtaining Commission records electronically as they have in the past by visiting the Commission's website (www.ferc.gov), or during normal business hours, by emailing public.referenceroom@ferc.gov or calling (202) 502-8371, TTY (202) 502-8659.⁸

6. Finally, the Commission has also reviewed other regulations to ensure they are consistent with this rule by amending them to substitute references to the physical Public Reference Room with references to the Commission's website (www.ferc.gov).

III. Information Collection Statement

7. The Office of Management and Budget (OMB) approves certain information collection requirements imposed by agency rule.⁹ However, this final rule does not contain any additional information collection requirements. Therefore, compliance with OMB's regulations is not required.

IV. Environmental Analysis

8. The Commission is required to prepare an Environmental Assessment or an Environmental Impact Statement for any action that may have a significant adverse effect on the human environment.¹⁰

9. Part 380 of the Commission's regulations lists exemptions to the requirement to draft an Environmental Analysis or Environmental Impact Statement. Included is an exemption for procedural, ministerial, or internal administrative actions.¹¹ Accordingly, this rulemaking is exempt from the requirement to draft such documents under that provision.

V. Regulatory Flexibility Act

10. The Regulatory Flexibility Act of 1980 (RFA)¹² generally requires a description and analysis of final rules that will have a significant economic

impact on a substantial number of small entities. This final rule concerns a modification of current Commission regulations and practices. The Commission certifies that it will not have a significant economic impact upon participants in Commission proceedings. An analysis under the RFA is, therefore, not required.

VI. Document Availability and Incorporation by Reference

11. In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<https://www.ferc.gov>).

12. From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

13. User assistance is available for eLibrary and the Commission's website during normal business hours from FERC Online Support at (202) 502-6652 (toll free at 1-866-208-3676) or email at ferconlinesupport@ferc.gov or public.referenceroom@ferc.gov.

14. NAESB WEQ Business Practice Standards; Standards and Models are referenced in the amendatory text of this document but were previously approved for § 38.1.

VII. Effective Date

15. The Commission is issuing this rule as a final rule without a period for public comment. Under 5 U.S.C. 553(b)(3)(A), notice-and-comment rulemaking procedures are unnecessary for "rules of agency organization, procedure, or practice." This rule is, therefore, exempt from notice-and-comment rulemaking procedures, because it concerns the Commission's procedures and practices. In particular, this rule changes the agency's practice related to the location of the public reference room. The rule will not significantly affect regulated entities or the general public.

16. This rule is effective November 29, 2023.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 153 and 380

[Docket No. RM22-8-000; Order No. 900]

Engineering and Design Materials for Liquefied Natural Gas Facilities Related to Potential Impacts Caused by Natural Hazards

AGENCY: Federal Energy Regulatory Commission, Department of Energy.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission (Commission) issues this final rule to revise its regulations governing liquefied natural gas (LNG) facilities subject to sections 3 and 7 of the Natural Gas Act (NGA) by removing outdated references for seismic hazard evaluations and seismic design criteria for LNG facilities. In their place, the Commission codifies its existing practice of evaluating seismic and other natural hazards and design criteria for jurisdictional LNG facilities. These revisions are intended to reduce confusion about applicable technical

requirements and clarify the information required in applications filed before the Commission to ensure the public is protected from potential catastrophic impacts caused by natural hazards from design through the operation of the LNG facilities.

DATES: This rule is effective December 29, 2023.

SUPPLEMENTARY INFORMATION:

1. In this final rule, the Federal Energy Regulatory Commission (Commission or FERC) revises its regulations under 18 CFR parts 153 and 380 governing liquefied natural gas (LNG) facilities subject to sections 3 and 7 of the Natural Gas Act (NGA) by removing references to a legacy agency (the National Bureau of Standards) that has been renamed and two technical standards¹ related to seismic hazard evaluation and seismic design criteria for LNG facilities (Uniform Building Code's (UBC) Seismic Risk Map of the United States (Map) and National Bureau of Standards Information Report (NBSIR) 84-2833, *Data Requirements for the Seismic Review of LNG Facilities*) that have become outdated. Consistent with the Commission's previous rulemakings to update outdated regulations,² the final rule codifies the
