

to identify local contexts and reflect local input. BOEM plans to prepare community characterization summaries using information obtained from members of selected communities with EJ concerns to pilot such an approach. Community characterizations would summarize a community's history, demographics, economic conditions, coastal and marine resource use, coastal land use, identification of key leaders and organizations, and other baseline conditions and trends. With these summaries readily accessible, BOEM analysts will continue improving their understanding of the selected affected communities with EJ concerns and the potential impacts from BOEM-approved activities.

As appropriate, these summaries may be included in the relevant environmental analyses that inform BOEM's decisions. Furthermore, conducting community-informed research could advance earlier community awareness of BOEM activities and increase trust. Gaining first-hand information will help "ground-truth" some of the existing information that would be collated into the selected community characterization summaries.

BOEM plans to use various methods, such as interviews and focus groups, to collect information from members of approximately three communities with EJ concerns in each of the three chosen study areas. BOEM seeks comments on, and suggestions of, appropriate information collection methods and study areas.

BOEM proposes to collect information on topics such as those listed below in order to inform community characterization summaries highlighting vulnerabilities, themes, issues, or concerns of each selected community. Each community summary would include relevant history, demographics, economics, coastal and marine resource use, coastal land use including existing facilities, outreach approaches that are locally appropriate for that specific community with EJ concerns, identification of key community leaders and organizations, and other baseline conditions that will enable BOEM analysts to better incorporate specific community interests into environmental reviews and the decision-making process. BOEM is also seeking comments on whether other topics should be included in the selected community characterization summaries.

OMB Control Number: 1010-NEW.

Form Number: None.

Type of Review: New.

Respondents/Affected Public: 9–15 Selected Communities (including

community leaders, key informants, and community organizations).

Total Estimated Number of Annual Responses: 135–225 community responses.

Total Estimated Number of Annual Burden Hours: 540–900 hours.

Respondent's Obligation: Voluntary.

Frequency of Collection: On occasion.

Total Estimated Annual Non-Hour Burden Cost: None.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Karen Thundiyil,

Chief, Office of Regulations, Bureau of Ocean Energy Management.
