I. Abstract

This is a request for a new information collection.

NOAA is developing an information collection to characterize, assess and research social and economic value and importance of natural and cultural resources in the Ocean and Great Lakes. This coordinated project will allow for consistent metrics of human use to be collected across the environments managed by NOAA. In order to fulfill the mandates of the following legislation, timely human use and socioeconomic data is required: the National Marine Sanctuaries Act; Coastal Zone Management Act; Digital Coast Act; Coral Reef Conservation Act; National Historic Preservation Act; and the Magnuson Stevens-Fishery Conservation and Management Act.

The purpose of this information collection is to obtain human dimensions information from users of marine areas, including individuals and households, businesses, local, State and Federal Governments, tribal and territorial governments, Tribal and Indigenous peoples, nonprofits and academic institutions.

Focusing on the Ocean and Great Lakes, data collected will quantify over
