On a daily basis, OCSS sends the results of the insurance data match in an "Insurance Match Response Record" to child support agencies, that use the insurance data matches to collect past-due support from the insurance proceeds. OCSS incorporated a separate burden calculation for respondents opting to electronically report quarterly.

Respondents: Insurers or their agents, including the U.S. Department of Labor and state agencies administering workers' compensation programs, and the Insurance Services Office.

SUPPLEMENTARY INFORMATION:

Description: State child support agencies are statutorily required to enter into data matching agreements with financial institutions doing business in their state to locate obligors' accounts. OCSE operates the MSFIDM program through the Federal Parent Locator Service (FPLS) and facilitates the required data match between state child support agencies and multistate financial institutions (MSFIs). State child support agencies use the data match outcomes to fulfill a statutory requirement to seize an obligor's assets to satisfy past due child support payments.

OCSE also operates FAST Levy, which is an automated application within the FPLS to exchange electronic lien/levy information securely and efficiently. State child support agencies and MSFIs use FAST Levy to seize financial assets more quickly and efficiently.
