SUPPLEMENTARY INFORMATION: In general, title 49 United States Code (U.S.C.) section 20157(h) requires FRA to certify that a host railroad's PTC system complies with title 49 Code of Federal Regulations (CFR) part 236, subpart I, before the technology may be operated in revenue service. Before making certain changes to an FRA-certified PTC system or the associated FRA-approved PTCSP, a host railroad must submit, and obtain FRA's approval of, an RFA to its PTCSP under 49 CFR 236.1021.

Under 49 CFR 236.1021(e), FRA's regulations provide that FRA will publish a notice in the Federal Register and invite public comment in accordance with 49 CFR part 211, if an RFA includes a request for approval of a material modification of a signal or train control system. Accordingly, this notice informs the public that, on November 8, 2023, MNR submitted an RFA to its PTCSP for its Advanced Civil Speed Enforcement System II (ACSES II), which seeks FRA's approval of an upgrade to the M8 fleet PTC Onboard Software provided by MNR's supplier, Alstom, to correct open defects and provide other enhancements. That RFA is available in Docket No. FRA-2010-0032.

Interested parties are invited to comment on MNR's RFA to its PTCSP by submitting written comments or data. During FRA's review of this railroad's RFA, FRA will consider any comments or data submitted within the timeline specified in this notice and to the extent practicable, without delaying implementation of valuable or necessary modifications to a PTC system. See 49 CFR 236.1021; see also 49 CFR 236.1021; FRA maintains the authority to approve, approve with conditions, or deny a

railroad's RFA to its PTCSP at FRA's sole discretion.
