

ensuring that environmental justice efforts within the Federal Government, including the development of future versions of the Environmental Justice Scorecard, are informed by the priorities and perspectives of the public, including communities with environmental justice concerns. By soliciting input through this RFI, CEQ and OMB seek input from the public in shaping the vision and goals for the Environmental Justice Scorecard and welcome ideas on ways to improve the public's ability to monitor the Federal Government's progress and hold the Federal Government accountable for delivering results in advancing environmental justice for all.

II. Key Questions for Input

CEQ and OMB seek feedback on the public's experiences using Phase One of the Environmental Justice Scorecard, as well as input for future versions of the Environmental Justice Scorecard. Input may be offered on any aspect of the Environmental Justice Scorecard, but is particularly welcome in response to these questions:

1. How can the Environmental Justice Scorecard improve the way it organizes, displays, or presents data to be more accessible, understandable, and useful for the public, including for communities with environmental justice concerns? Please feel free to provide any examples of scorecards or other publicly accessible tools that Tribal, state, or local governments or private entities use to measure and convey progress that may be helpful to review.

2. What additional metric or metrics of Federal agency action or progress in advancing environmental justice might be relevant and helpful to consider including in future versions of the Environmental Justice Scorecard, such as any metric that may help further reflect the needs and priorities of communities with environmental justice concerns or show how certain Federal investments are benefiting

disadvantaged communities, including benefits from Justice40 covered programs? The public is welcome to offer any potential metric or metrics in any of the categories of the Phase One Scorecard (listed above), or any potential new categories. For any potential new metric offered, it would be especially helpful to include information on the following, if possible:

- Whether the suggested metric would be specific to one Federal agency or cross-cutting (*i.e.*, applicable to all or multiple agencies).

- Whether the suggested metric would measure or focus on any particular output (such as the number of trainings related to environmental justice for staff conducted by an agency) or outcome (such as a highlight of the benefits of a Justice40 covered program in a disadvantaged community, like improved air quality or drinking water safety).

- Whether there is any existing example where the suggested metric is already reported or used (*e.g.*, by a single agency or outside of the Federal Government).

3. What kind of qualitative information (such as updates on Federal agency work or milestones that may not be possible to summarize with numbers or data alone) does the public consider most valuable to include or add to a future Scorecard, in addition to quantitative metrics or data?

4. Please feel free to offer any additional category or categories of the Federal Government's work or progress that future versions of the Environmental Justice Scorecard might include to advance the goal of environmental justice.

5. Please feel free to share any additional feedback relevant to Phase One of the Environmental Justice Scorecard or any aspect of a future

version of the Environmental Justice Scorecard.

Matthew G. Lee-Ashley,
Chief of Staff.
