

will be posted to the calendar at www.mafmc.org prior to the meeting.

Council address: Mid-Atlantic Fishery Management Council, 800 N State Street, Suite 201, Dover, DE 19901; telephone: (302) 674-2331; www.mafmc.org.

FOR FURTHER INFORMATION CONTACT:

Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526-5255.

SUPPLEMENTARY INFORMATION: The Councils' NTAP will meet to discuss the new Operational Manual and Orientation Document. The intent of this meeting is to discuss NTAP in detail, including background, organization, purpose, and member expectation. This meeting will be an opportunity for new and existing NTAP members to discuss and learn about the goals and purposes of NTAP.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Shelley Spedden, (302) 526-5251 at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 20, 2023.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

2024 Annual Determination To Implement the Sea Turtle Observer Requirement

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notification of Annual Determination of fisheries.

SUMMARY: National Marine Fisheries Service (NMFS) is providing notification that the agency will not identify additional fisheries to observe on the 2024 Annual Determination (AD), pursuant to its authority under the Endangered Species Act (ESA). Through the AD, NMFS identifies U.S. fisheries operating in the Atlantic Ocean, Gulf of Mexico, and Pacific Ocean that will be required to take observers upon NMFS'

request. The purpose of observing identified fisheries is to learn more about sea turtle bycatch in a given fishery, evaluate measures to prevent or reduce sea turtle bycatch, and implement the prohibition against sea turtle takes. Fisheries identified on the 2020 and 2023 ADs (see table 1) remain on the AD for a 5-year period and are required to carry observers upon NMFS' request until September 29, 2025, for the 2020 AD and December 31, 2027, for the 2023 AD.

ADDRESSES: Chief, Marine Mammal and Sea Turtle Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Silver Spring, MD 20910.

FOR FURTHER INFORMATION CONTACT:

Wendy Piniak, Office of Protected Resources, 301-427-8402; Ellen Keane, Greater Atlantic Region, 978-282-8476; Dennis Klemm, Southeast Region, 727-824-5312; Dan Lawson, West Coast Region, 206-526-4740; Irene Kelly, Pacific Islands Region, 808-725-5141. Individuals who use a telecommunications device for the hearing impaired may call the Federal Information Relay Service at 800-877-8339 between 8 a.m. and 4 p.m. Eastern time, Monday through Friday, excluding Federal holidays.

SUPPLEMENTARY INFORMATION:

Purpose of the Sea Turtle Observer Requirement

Under the ESA, 16 U.S.C. 1531 *et seq.*, NMFS has the responsibility to implement programs to conserve marine life listed as endangered or threatened. All sea turtles found in U.S. waters are listed as either endangered or threatened under the ESA. Kemp's ridley (*Lepidochelys kempii*), loggerhead (*Caretta caretta*; North Pacific distinct population segment (DPS)), leatherback (*Dermochelys coriacea*), green (*Chelonia mydas*; Central West Pacific and Central South Pacific DPSs), and hawksbill (*Eretmochelys imbricata*) sea turtles are listed as endangered. Loggerhead (Northwest Atlantic Ocean DPS), green (North Atlantic, South Atlantic, Central North Pacific, and East Pacific DPSs), and olive ridley (*Lepidochelys olivacea*) sea turtles are listed as threatened, except for breeding colony populations of olive ridleys on the Pacific coast of Mexico, which are listed as endangered. Due to the inability to distinguish between populations of olive ridley turtles away from the nesting beach, NMFS considers these turtles endangered wherever they occur in U.S. Pacific waters. While some sea turtle populations have shown signs of

recovery, many populations continue to decline.

Bycatch in fishing gear is the primary anthropogenic source of sea turtle injury and mortality in U.S. waters. Section 9 of the ESA prohibits the take (defined to include harassing, harming, pursuing, hunting, shooting, wounding, killing, trapping, capturing, or collecting or attempting to engage in any such conduct), including incidental take, of endangered sea turtles. Pursuant to section 4(d) of the ESA, NMFS has issued regulations extending the prohibition of take, with exceptions, to threatened sea turtles (50 CFR 223.205 and 223.206). Section 11 of the ESA provides for civil and criminal penalties for anyone who violates the ESA or a regulation issued to implement the ESA. NMFS may grant exceptions to the take prohibitions with an incidental take statement or an incidental take permit issued pursuant to ESA section 7 or 10, respectively. To do so, NMFS must determine that the activity that will result in incidental take is not likely to jeopardize the continued existence of the affected listed species. For some Federal fisheries and most state fisheries, NMFS has not granted an exception for incidental takes of sea turtles primarily because we lack information about fishery-sea turtle interactions.

For most fisheries, the most effective way for NMFS to learn more about bycatch in order to implement the take prohibitions and prevent or minimize take is to place observers aboard fishing vessels. In 2007, NMFS issued a regulation (50 CFR 222.402) establishing procedures to annually identify, pursuant to specified criteria and after notice and opportunity for comment, those fisheries in which the agency intends to place observers (72 FR 43176; August 3, 2007). These regulations specify that NMFS may place observers on U.S. fishing vessels, commercial or recreational, operating in U.S. territorial waters, the U.S. exclusive economic zone, or on the high seas, or on vessels that are otherwise subject to the jurisdiction of the U.S. Failure to comply with the requirements under this regulation may result in civil or criminal penalties under the ESA.

NMFS will pay the direct costs for vessels to carry the required observers. These include observer salary and insurance costs. NMFS may also evaluate other potential direct costs, should they arise. Once selected, a fishery will be required to carry observers, if requested, for a period of 5 years without further action by NMFS. This will enable NMFS to develop appropriate observer coverage and

sampling protocols to investigate whether, how, when, where, and under what conditions sea turtle bycatch is occurring and to evaluate whether existing measures are minimizing or preventing bycatch.

2024 Annual Determination

Pursuant to 50 CFR 222.402(a), NOAA’s Assistant Administrator for Fisheries, in consultation with Regional Administrators and Fisheries Science Center Directors, annually identifies fisheries for inclusion on the AD based on the extent to which:

- (1) The fishery operates in the same waters and at the same time as sea turtles are present;
- (2) The fishery operates at the same time or prior to elevated sea turtle strandings; or
- (3) The fishery uses a gear or technique that is known or likely to result in incidental take of sea turtles based on documented or reported takes in the same or similar fisheries; and
- (4) NMFS intends to monitor the fishery and anticipates that it will have the funds to do so.

NMFS is providing notification that the agency is not identifying additional fisheries to observe on the 2024 AD, pursuant to its authority under the ESA. NMFS is not identifying additional fisheries at this time given lack of dedicated resources to implement new observer programs or expand existing observer programs to focus on sea turtles. The four fisheries identified on the 2020 AD (see table 1) will remain on the AD for a 5-year period and are required to carry observers upon NMFS’ request until September 29, 2025. The two fisheries identified on the 2023 AD (see table 1) will remain on the AD for a 5-year period and are required to carry observers upon NMFS’ request until December 31, 2027.

TABLE 1—STATE AND FEDERAL COMMERCIAL FISHERIES INCLUDED ON THE 2020 AND 2023 ANNUAL DETERMINATIONS

Fishery	Years eligible to carry observers
Trawl Fisheries:	
Southeastern U.S. Atlantic, Gulf of Mexico shrimp trawl	2020–2025
Gulf of Mexico mixed species fish trawl	2020–2025
Gillnet Fisheries:	
Chesapeake Bay inshore gillnet ..	2020–2025
Long Island inshore gillnet	2020–2025
Mid-Atlantic gillnet	2023–2027
Pound Net/Weir/Seine Fisheries:	
Gulf of Mexico menhaden purse seine	2023–2027

Dated: November 20, 2023.
Kimberly Damon-Randall,
Director, Office of Protected Resources, National Marine Fisheries Service.

Marine Mammals; File No. 26593

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application for permit amendment.

SUMMARY: Notice is hereby given that Adam Pack, Ph.D., University of Hawaii at Hilo, 200 West Kawili Street, Hilo, HI 96720, has applied for an amendment to Scientific Research Permit No. 26593.

DATES: Written comments must be received on or before December 26, 2023.

ADDRESSES: The application and related documents are available for review by selecting “Records Open for Public Comment” from the “Features” box on the Applications and Permits for Protected Species (APPS) home page, <https://apps.nmfs.noaa.gov>, and then selecting File No. 26593 from the list of available applications. These documents are also available upon written request via email to NMFS.Pr1Comments@noaa.gov.

Written comments on this application should be submitted via email to NMFS.Pr1Comments@noaa.gov. Please include File No. 26593 in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request via email to NMFS.Pr1Comments@noaa.gov. The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Carrie Hubard or Courtney Smith, Ph.D., (301) 427–8401.

SUPPLEMENTARY INFORMATION: The subject amendment to Permit No. 26593 is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of

endangered and threatened species (50 CFR parts 222–226).

Permit No. 26593, issued on March 13, 2023 (88 FR 23400, April 17, 2023), authorizes the permit holder to study 29 cetacean species in Hawaiian and Alaskan waters, with a focus on humpback whales (*Megaptera novaeangliae*). The purpose of the research is to examine the behavioral ecology, biology and communication systems of humpback whales as well as the abundance, distribution, behavior, and physiological stress levels of all cetacean species in the study area. Research may be conducted from boats, airplanes, unmanned aircraft systems (UAS), and underwater. Animals may be studied using photo-ID, videogrammetry, passive acoustic recordings, behavioral observations, collection of fecal and skin samples, biopsy sampling, and suction-cup tagging. The permit holder is requesting the permit be amended to add active acoustic playbacks to humpback whales and to authorize suction-cup tagging of an additional 98 humpback whales annually as part of the acoustic research. In addition, Dr. Pack is requesting to add UAS deployment of suction-cup tags as a procedure for humpback whales. The objective of the acoustic playbacks are to examine humpback whale responses to vessel engine noise, conspecific sounds, natural ambient noise, and tonal sounds in Hawaiian waters. The permit expires on April 30, 2028.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: November 20, 2023.
Julia M. Harrison,
Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.
