Electronic Verification System Migrated to USPS Ship

AGENCY: Postal Service™.

Background

The Postal Service™ currently has the following options/channels to pay and enter commercial parcel mailings:

- Click-N-Ship®
- ePostage®
- PC Postage®
- eVS®
- non-eVS (BMEU entered permit imprint)
- USPS Ship

The Postal Service has streamlined, simplified, and improved the payment and acceptance processes for parcels. Most commercial shippers are currently enrolled in eVS for payment and acceptance of their commercial package mailings. eVS has enabled many companies to easily ship parcels with the Postal Service. Over the past 20 years since eVS started, the Postal Service has upgraded equipment to automatically capture package attributes such as weight, dimensions, USPS packaging, zone, and entry. This robust infrastructure has enabled the simplification of verifications that currently require offline and manual processes.

Proposal

The Postal Service is proposing to require the use of USPS Ship for the acceptance and payment of all commercial domestic and international parcel mailings.

USPS Ship combines the attributes captured from scan data and manifested attributes to ensure customers are charged accurate postage. For consolidators, if there are adjustments to inaccurate original postage, those individual package costs can be provided to the mail owners.

USPS Ship is the next generation package platform for payment and acceptance. USPS Ship offers online enrollment, individual package pricing, automated adjustments, online reports, and data feeds via IV–MTR. The automated capture enables individual package attributes to be compared to manifest data to validate accurate postage. Shortpaid (postage due) or overpaid (refunds) will be assessed upon package delivery and applied to the Enterprise Payment Account (EPA) on file. This new platform automates and simplifies the acceptance and validation process.

Requirements to participate in USPS Ship are as follows:

- Customers must enroll in USPS Ship and be assigned a unique MID for use on packages.
- Customers must submit valid rate ingredients for payment for each package within their shipment.
- Customers must upload manifests to USPS using the Parcel Data Exchange or Electronic Interchange (SFTP or AS2) for payment as noted in eVS Pub 205.
- Customers must pay postage through an Enterprise Payment Account.
- Packages must include a Tracking Number that is unique for 120 days.
- Customers must ship the following products:
 - Domestic Products—Priority Mail Express®, Priority Mail®, USPS Ground Advantage™ (formerly First-Class Package® Service), Bound Printed Matter, Media Mail®, Library Mail, USPS Marketing Mail® parcels, USPS Marking Mail Nonprofit parcels, Parcel Select® Destination Entry, USPS Connect™ Local, USPS Connect Local Mail, and USPS Returns®.
 - International Products—Global Express Guaranteed®, Priority Mail Express International®, Priority Mail International®, and First-Class Package International Service®.
