Shipping Address Label

SUPPLEMENTARY INFORMATION: All submitted comments and attachments are part of the public record and subject to disclosure. Do not enclose any material in your comments that you consider to be confidential or inappropriate for public disclosure.

Currently, when a shipping address label is used, the standards provide it is recommended the service icon and service banner be included on the label. Effective October 1, 2023, pursuant to the **Federal Register** Notice (88 FR 54239-54240) the Postal Service added a new validation requirement to Barcode Quality (BQ), a metric underneath its Intelligent Mail® package barcode (IMpb®) noncompliance measurement. The final rule outlined that the information provided on the label and the data contained within the barcodes, including Service Type Codes (STCs) must align and be correct. As a result, the Postal Service is proposing to require the correct service indicator composed of the service icon and service banner be included when a shipping address label is used.

In addition, the Postal Service is proposing to require the hazardous materials icon in lieu of the service icon be included when a shipping address label is used on items containing mailable hazardous materials.

Any variance in the physical aspect of the label affixed to a parcel presented for mailing may subject the piece to the IMpb noncompliance fee.

The Postal Service is proposing to implement this change effective January 21, 2024.

We believe the proposed revision will enable the Postal Service to provide customers with a more efficient mailing experience.

Although exempt from the notice and comment requirements of the Administrative Procedure Act (5 U.S.C. 553(b), (c)) regarding proposed rulemaking by 39 U.S.C. 410(a), the Postal Service invites public comment

on the following proposed revisions to *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM), incorporated by reference in the Code of Federal Regulations. We will publish an appropriate amendment to 39 CFR part 111 to reflect these changes.

RIN 1018-BF06

Endangered and Threatened Wildlife and Plants: Threatened Status With Section 4(d) Rule for the Northern and Southern Distinct Population Segments of the Western Spadefoot

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), propose to list the northern distinct population segment (DPS) of the western spadefoot (Spea hammondi), an amphibian occurring in central and northern California, and the southern DPS of the western spadefoot, occurring in southern California and northwestern Mexico, as threatened DPSs under the Endangered Species Act of 1973 (Act), as amended. This determination serves as our 12-month finding on a petition to list the western spadefoot range-wide. After a review of the best scientific and commercial information available, we find that listing the northern and southern DPSs of the western spadefoot as threatened is warranted. Accordingly, we propose to list the northern and southern DPSs of the western spadefoot as threatened DPSs with a rule issued under section 4(d) of the Act ("4(d) rule"). If we finalize this rule as proposed, it would add the northern DPS and southern DPS of the western spadefoot to the List of Endangered and Threatened Wildlife and extend the Act's protections to the two DPSs. Due to the current lack of data sufficient to perform required analyses, we conclude that the designation of critical habitat for the northern DPS and southern DPS of the western spadefoot is not determinable at this time.

DATES: We will accept comments received or postmarked on or before February 5, 2024. Comments submitted electronically using the Federal eRulemaking Portal (see ADDRESSES, below) must be received by 11:59 p.m. eastern time on the closing date.
