Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.*, within 90 days of publication).

In accordance with Commerce's "automatic assessment" practice, for entries of subject merchandise that entered the United States during the POR that were produced by CJ Indonesia or PT. Miwon for which the respondent did not know that its merchandise sold to an intermediary was destined for the United States, Commerce will instruct CBP to liquidate unreviewed entries at the all-others rate of 6.19 percent,⁵ if there is no rate for the intermediate company(ies) involved in the transaction.⁶

SUPPLEMENTARY INFORMATION:

I. Abstract

NMFS, Alaska Region (NMFS AKR), is requesting renewal of this currently approved information collection that consists of paper logbooks and reports used for management of the groundfish

fisheries in the Bering Sea and Aleutian Islands Management Area (BSAI) and the Gulf of Alaska (GOA), management of the Individual Fishing Quota halibut and sablefish fisheries, and management of the BSAI Crab Rationalization Program crab fisheries. NMFS AKR manages the groundfish and crab fisheries in the exclusive economic zone (EEZ) of the BSAI and the groundfish fisheries of the GOA under fishery management plans (FMPs) for the respective areas. The North Pacific Fishery Management Council prepared, and NMFS approved, the FMPs under the authority of the Magnuson-Stevens Fishery Conservation and Management Act, 16 U.S.C. 1801 *et seq.* Regulations implementing the FMPs appear at 50 CFR parts 679 and 680. Regulations for the logbooks and reports in this information collection are at 50 CFR 679.5.

The information collected through the paper logbooks and reports promotes the goals and objectives of the FMPs, the Magnuson-Stevens Fishery Conservation and Management Act, and other applicable laws. The collection of reliable data is essential to the effective conservation, management, and scientific understanding of the fishery resources.

Collecting information from fishery participants is necessary to promote successful management of groundfish, crab, Pacific halibut, and salmon resources. A comprehensive information system that identifies the participants and monitors their fishing activity is necessary to enforce the management measures and prevent overfishing. An information system is also needed to measure the consequences of management controls. This collection supports an effective monitoring and enforcement system with information that includes identification of the participating vessels, operators, dealers, and processors; location of the fishing activity; timeframes when fishing and processing is occurring; and shipment and transfer of fishing products.

Shoreside processors, stationary floating processors, and motherships receiving EEZ-caught fish and all vessels of the United States harvesting EEZ fish are required to hold a Federal permit and thus comply with reporting requirements per CFR 679.5. The data collected are used for making in-season and inter-season management decisions that affect the groundfish resources and the fishing industry that uses them.

This information collection contains four components: Paper logbooks, vessel activity reports, check-in/check-out reports, and product transfer reports.
