II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, 10 CFR part 35 “Medical Use of Byproduct Material.” The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on August 1, 2023, 88 FR 50182.

1. *The title of the information collection*: 10 CFR part 35, Medical Use of Byproduct Material.
2. *OMB approval number*: 3150–0010.
3. *Type of submission*: Extension.
4. *The form number, if applicable*: Not applicable.

5. *How often the collection is required or requested*: Reports of medical events, doses to an embryo/fetus or nursing child, or leaking source are reportable on occurrence. A specialty board certifying entity desiring to be recognized by the NRC must submit a one-time request for recognition and infrequently revise the information.

6. *Who will be required or asked to respond*: Physicians and medical institutions holding an NRC license authorizing the administration of byproduct material or radiation from this material to humans for medical use. A specialty board certification entity desiring to have its certifying process and board certificate recognized by NRC.

7. *The estimated number of annual responses*: 313,994 (234,284 reporting responses + 7,327 recordkeepers + 72,383 third party disclosure responses).

8. *The estimated number of annual respondents*: 7,340 (862 NRC licensees + 6,465 Agreement State licensees + 13 specialty board certification entity).

9. *The estimated number of hours needed annually to comply with the information collection requirement or request*: 1,117,570 hours (61,807 reporting + 1,043,235 recordkeeping + 12,528 third party disclosure).

10. *Abstract*: Part 35 of title 10 of the *Code of Federal Regulations*, “Medical Use of Byproduct Material,” contains NRC’s requirements and provisions for the medical use of byproduct material and for issuance of specific licenses authorizing the medical use of this material. These requirements and provisions provide for the radiation safety of workers, the general public, patients, and human research subjects. Part 35 contains mandatory requirements that apply to NRC licensees authorized to administer byproduct material or radiation to humans for medical use. These requirements also provide voluntary provisions for specialty boards to apply to have their certification processes recognized by the NRC so that their board-certified individuals can use the certifications as proof of training and experience.

Dated: November 30, 2023.

NRC Clearance Officer, Office of the Chief Information Officer.
