We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on October 4, 2023 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic & Atmospheric Administration (NOAA), Commerce.

Title: U.S.-Canada Albacore Treaty Reporting System.

OMB Control Number: 0648-0492.

Form Number(s): None.

Type of Request: Regular submission (extension of current information collection).

Number of Respondents: 50.

Average Time per Response: Five minutes for the request to be placed on the eligible list per year; 3 hours for required vessel markings; 10 minutes for logbook entries; 5 minutes for each set of two hail reports for border crossings per year.

Total Annual Burden Hours: 20 hours.

Needs and Uses: This request is for an extension of a current information collection. The National Marine Fisheries Service (NMFS), West Coast Region (WCR), manages the United States (U.S.)—Canada Albacore Tuna Treaty of 1981 (Treaty). Owners of vessels that fish from U.S. West Coast ports for albacore tuna (*Thunnus alalunga*) are required to notify the NMFS WCR of their desire to be on the list of vessels provided to Canada each year indicating vessels eligible to fish for albacore tuna in waters under the jurisdiction of Canada. Additionally, vessel operators are required to report in advance their intention to fish in Canadian waters prior to crossing the maritime border as well as to mark their fishing vessels to facilitate enforcement of the effort limits under the Treaty. Vessel operators are also required to maintain and submit a logbook of all catch and fishing effort. The regulations implementing the reporting and vessel marking requirements under the Treaty are at 50 CFR part 300.172–300.176. If a vessel enters into Canadian waters without adhering to these regulations, they will be in violation of the treaty and Canadian enforcement may issue a fine or a warning.

The estimated burden below includes hours to complete the logbook requirement, although it is assumed that most if not all of the respondents

already complete the required logbook under the mandatory West Coast Highly Migratory Species Fishery Management Plan (HMS FMP), OMB Control No. 0648-0223. Duplicate reporting under the Treaty and HMS FMP is not required. Most years, there will be much less fishing (and thus less reporting) under the Treaty than the level on which the estimate is based.

Affected Public: Businesses and other for-profit institutions.

Frequency: Annually.

Legal Authority: Magnuson-Stevens Fishery Conservation and Management Act.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Estuary Habitat Restoration Program Inventory; OMB Control Number: 0710-ESTU.

Needs and Uses: The Estuary Restoration Act of 2000 (ERA) established an Estuary Habitat Restoration Program (EHRP) that provides funding to restoration projects. Funded projects are required to complete the collection tool so project information (e.g., location, habitat type, goals, status, monitoring information) can be included in the EHRP database mandated by the ERA. The benefit of data collection is to document the restoration actions implemented, as well as the monitoring results to understand the success of each project. EHRP project information will be submitted by

habitat restoration project managers and will be accessible to the public via internet. The collection method includes paper or electronic forms, not web-based data entry.

This is not a new information collection, but a reinstatement of the same information collection that was owned by the National Oceanic and Atmospheric Administration and approved under OMB Control Number 0648–0479. It has been determined that responsibility for Paperwork Reduction Act (PRA) compliance should be transferred to USACE because it oversees all projects currently funded through the ERA. All anticipated future projects will be managed by USACE as well. No information will be collected until this information collection request is approved by OMB, bringing the Estuary Habitat Restoration Program Inventory back into compliance with the PRA.
