Abstract: Over the next three years, CRS and its evaluation contractor, Mathematica, anticipate collecting program impact evaluation data for assessing ongoing programs across several areas within community outreach. The purpose of these collections is to gather feedback from

participants who attended CRS programs and to use that information to assess the impact and outcomes of the programs. The work may entail redesigning and/or modifying existing programs based upon received feedback. CRS envisions using surveys, interviews, and other electronic data collection instruments. In this revision, CRS is requesting an increased level of burden from the previously approved collection to reflect including a larger number of programs in the assessment and collecting information at multiple time points for an individual program to assess change over time.
