Description

Human remains representing, at minimum, one individual were removed from Monroe County, NY. In 1902, Alva S. There is a relationship of shared group identity between the identifiable earlier groups, tribes, peoples, or cultures and one or more Indian Tribes or Native Hawaiian organizations. The following types of information were used to reasonably trace the relationship: archeological information, geographical information, historical information, and expert opinion.

- There is a relationship of shared group identity that can be reasonably traced between the human remains and associated funerary objects described in this notice and the Seneca Nation of Indians and the Tonawanda Band of Seneca.
