Public comments were previously requested via the **Federal Register** on November 2, 2021, during a 60-day comment period (86 FR 60460). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at <https://www.regulations.gov> or in person at the EPA Docket Center, WJC West, Room

3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <https://www.epa.gov/dockets>.

Abstract: The generic ICR addresses the information collection activities associated with the authorities provided to EPA under TSCA section 4 (15 U.S.C. 2603), which allows EPA to require the development of information related to chemicals to inform EPA and other federal agencies about chemical risks, which in turn will inform decision makers for purposes of prioritization, risk evaluation and risk management of those chemicals.

Respondents/affected Entities: Entities potentially affected by this ICR are manufacturers (including imports) or processors of chemical substances of mixtures, e.g., entities identified by North American Industrial Classification System Codes 325 and 324.

Respondent's obligation to respond: Mandatory per 15 U.S.C. 2603.

Estimated number of respondents: 263.

Frequency of response: On occasion.

Total estimated burden: 114,561 hours (three year total). Burden is defined at 5 CFR 1320.3(b).

Total estimated costs: \$27,261,789 (three year total), including \$17,725,254 capital or operation and maintenance costs.

Changes in the estimates: The annual estimated labor burden associated with testing costs increased by 5,749 hours. Updates were made to reflect testing burden and labor costs for activities associated with contacting laboratories and arranging testing and sample collection. In addition, the 5,749 also accounts for the burden being merged into this ICR that is associated with activities associated with contacting laboratories and arranging testing as well as reviewing guidance documents and pre-issuance outreach for Test Orders. The estimated non-labor testing costs increased due to inflation. With the increase in testing costs as well as increases in labor and overhead costs over time, the annual costs to the industry respondents increased by \$1,014,408.

Courtney Kerwin,

Director, Information Engagement Division.
