

proposed rule change, shares subject to resale restrictions (“Restricted Securities”) are counted in the calculations of the company’s publicly held shares, market value of publicly held shares, and round lot holder. The Commission believes that a company’s publicly held shares, market value of publicly held shares, and the number of round lot holders are indicators of the liquidity of its shares. To the extent Restricted Securities are counted when calculating a company’s publicly held shares, market value of publicly held shares, and round lot holders, the company’s shares could be less liquid, potentially making them more susceptible to price manipulation.

Under the Commission’s Rules of Practice, the “burden to demonstrate that a proposed rule change is consistent with the [Exchange Act] and the rules and regulations issued thereunder . . . is on the [SRO] that proposed the rule change.”²⁸ The description of a proposed rule change, its purpose and operation, its effect, and a legal analysis of its consistency with applicable requirements must all be sufficiently detailed and specific to support an affirmative Commission finding,²⁹ and any failure of an SRO to provide this information may result in the Commission not having a sufficient basis to make an affirmative finding that a proposed rule change is consistent with the Exchange Act and the applicable rules and regulations.³⁰ The Commission is instituting proceedings to allow for additional consideration and comment on the issues raised herein.

III. Procedure: Request for Written Comments

The Commission requests that interested persons provide written submissions of their data, views, and arguments with respect to the issues identified above, as well as any other

concerns they may have with the proposal. In particular, the Commission invites the written views of interested persons concerning whether the proposed rule change is consistent with the Exchange Act and the rules and regulations thereunder.

Although there do not appear to be any issues relevant to approval or disapproval that would be facilitated by an oral presentation of data, views, and arguments, the Commission will consider, pursuant to Rule 19b-4 under the Act,³¹ any request for an opportunity to make an oral presentation.³²

Interested persons are invited to submit written data, views, and arguments regarding whether the proposed rule change should be approved or disapproved by January 24, 2024. Any person who wishes to file a rebuttal to any other person’s submission must file that rebuttal by February 7, 2024.

BILLING CODE 8011-01-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No. FAA-2023-1114]

Agency Information Collection Activities: Requests for Comments; Clearance of Renewed Approval of Information Collection: Noise Certification Standards for Subsonic Jet Airplanes and Subsonic Transport Category Large Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval to renew an information collection. The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on May 8, 2023.

DATES: Written comments should be submitted by February 2, 2024.

³³ 17 CFR 200.30-3(a)(57).

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT:

Sandy Liu by email at: sandy.liu@faa.gov; phone: 202-267-4748.

SUPPLEMENTARY INFORMATION: The collection involves the noise certification regulations of 14 CFR part 36 for aircraft. This includes information collection requirements for the noise certification of subsonic aircraft—jet airplanes and subsonic transport category large airplanes, small propeller driven airplanes and rotorcraft. The information collected are the results of noise certification tests that demonstrate compliance with 14 CFR part 36. The original information collection was implemented to show compliance in accordance with the Aircraft Noise Abatement Act of 1968; that statute is now part of the overall codification of the FAA’s regulatory authority over aircraft noise in 49 U.S.C. 44715. The noise compliance report is used by the FAA in making a finding that the airplane is in noise compliance with the regulations. These compliance reports are required only once when an applicant wants to certificate an aircraft type. Without this data collection, the FAA would be unable to make the required noise certification compliance finding.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA’s performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information.

OMB Control Number: 2120-0659.

Title: Noise Certification Standards for Subsonic Jet Airplanes and Subsonic Transport Category Large Airplanes.

Form Numbers: None.

Type of Review: Renewal of an information collection.

Background: The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on May 8, 2023 (FR 29801). The aircraft noise information collected are the results of noise certification tests that

demonstrate compliance with 14 CFR part 36. The original information collection was implemented to show compliance in accordance with the Aircraft Noise Abatement Act of 1968; that statute is now part of the overall codification of the FAA’s regulatory authority over aircraft noise in 49 U.S.C. 44715. For this renewal, the FAA proposes to maintain this PRA collection at 14 total noise certification projects per year. Each applicant’s collected information is incorporated into a noise compliance report that is provided to and approved by the FAA. The noise compliance report is used by the FAA in making a finding that the airplane is in noise compliance with the regulations. These compliance reports are required only once when an applicant wants to certificate an aircraft type. Without this data collection, the FAA would be unable to make the required noise certification compliance finding.

Respondents: Aircraft manufacturer/applicant seeking type certification;

Frequency: Estimated 15 total applicants per year;

Estimated Average Burden per Response: Estimated 200 hours per applicant for the compliance report;

Estimated Total Annual Burden: \$20,160 per applicant or cumulative total \$302,400 per year for 15 applicants.

Issued in Washington, DC, on December 28, 2023.

Sandy Liu,

Engineer, Office of Environment and Energy, Noise Division (AEE-100).
