Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service (Service), are initiating 5-year status reviews of the Aleutian shield fern (*Polystichum aleuticum*) and the Alaska breeding population of Steller's eider (*Polysticta stelleri*) under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). A 5-year status review is based on the best scientific

and commercial data available at the time of the review; therefore, we are requesting submission of any new information on this species that has become available since the last 5-year reviews were conducted in 2019.

Why do we conduct 5-year reviews?

Under the ESA, we maintain Lists of Endangered and Threatened Wildlife and Plants (which we collectively refer to as the List) in the Code of Federal Regulations (CFR) at 50 CFR 17.11 (for animals) and 17.12 (for plants). Section 4(c)(2)(A) of the ESA requires us to review each listed species' status at least once every 5 years. Further, our regulations at 50 CFR 424.21 require that we publish a notice in the **Federal Register** announcing those species under active review. For additional information about 5-year reviews, go to <http://www.fws.gov/endangered/what-we-do/recovery-overview.html>.

What information do we consider in our review?

In conducting these reviews, we consider the best scientific and commercial data that have become available since the listing determination or most recent status review, such as:

1. The biology of the species, including but not limited to population trends, distribution, abundance, demographics, and genetics;
2. Habitat conditions, including but not limited to amount, distribution, and suitability;
3. Conservation measures that have been implemented that benefit the species;
4. Threat status and trends in relation to the five listing factors (as defined in section 4(a)(1) of the ESA); and
5. Other new information, data, or corrections, including but not limited to taxonomic or nomenclatural changes, identification of erroneous information contained in the List, and improved analytical methods.

Any new information will be considered during the 5-year review and will also be useful in evaluating the ongoing recovery programs for the species.
