Amendment of Class D and Class E Airspace; Ozark, AL and Columbus, GA; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; correction.

SUMMARY: The FAA is correcting a final rule that published in the **Federal Register** on December 12, 2023. This action corrects errors in the Class E legal descriptions for both Air Fields.

DATES: Effective 0901 UTC, March 21, 2024. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order JO 7400.11 and publication of conforming amendments.

SUPPLEMENTARY INFORMATION:

History

The FAA published a final rule in the **Federal Register** on December 12, 2023 (88 FR 86039), for Docket No. FAA-2023-1352, updating the Class D airspace and Class E airspace for Fort Novosel, Ozark, AL, and Fort Moore, Columbus, GA, by updating each airport's name and replacing Notice to Airmen with Notice to Air Missions, and replacing the term Airport/Facility Directory with Chart Supplement in the appropriate descriptions. After publication, the FAA found the Class E surface description for Fort Novosel was inadvertently transposed. Also, the Class E airspace extending upward from 700 feet above the surface for Columbus, GA, was incorrectly transposed with the Columbus, MS description. This action corrects these errors.

Correction to the Final Rule

In FR Doc 2023-27195 at 86039, published in the **Federal Register** on December 12, 2023, the FAA makes the following corrections:

■ 1. On page 86040, in the first column, correct the ASO AL E2 description for Fort Novosel (Ozark), AL, to read as follows:

ASO AL E2 Fort Novosel (Ozark), AL [Corrected]

Cairns Army Air Field (Fort Novosel), AL

This Class E airspace area is effective during the specific dates and times established in advance by a Notice to Air Missions. The effective date and time will thereafter be continuously published in the Chart Supplement.

■ 2. On page 86040, beginning in the first column under Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth, correct the Class E Airspace Areas description to read as follows:

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it amends the Class E airspace extending upward from 700 feet above the surface at James A. Rhodes Airport, Jackson, OH, to support IFR operations at this airport.

History

The FAA published an NPRM for Docket No. FAA-2023-2113 in the **Federal Register** (88 FR 76158; November 6, 2023) proposing to amend the Class E airspace at Jackson, OH. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Incorporation by Reference

Class E airspace designations are published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document amends the current version of that order, FAA Order JO 7400.11H, dated August 11, 2023, and effective September 15, 2023. FAA Order JO 7400.11H is publicly available as listed in the **ADDRESSES** section of this document. These amendments will be published in the next update to FAA Order JO 7400.11.

FAA Order JO 7400.11H lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This amendment to 14 CFR part 71 modifies the Class E airspace extending upward from 700 feet above the surface to within a 6.8-mile (decreased from a 7.5-mile) radius of James A. Rhodes Airport, Jackson, OH; updates the geographic coordinates of airport to coincide with the FAA's aeronautical database; and removes the city associated with the airport from the header to comply with changes to FAA Order JO 7400.2P, Procedures for Handling Airspace Matters.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures," paragraph 5-6.5.a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.
