SUPPLEMENTARY INFORMATION:

Proposed Action: The draft EA analyzes the proposed action, which is issuing wind energy leases in the Central Atlantic WEAs, and the no action alternative. The lease sale itself would not authorize any activities on the OCS. Therefore, the EA considers the reasonably foreseeable environmental consequences of site characterization surveys (*i.e.*, biological, archeological, geological and geophysical surveys, and core samples) and site assessment activities (*i.e.*, installation of meteorological buoys), which are expected to take place following lease issuance. BOEM decided to prepare an EA for this proposed action in order to assist the agency’s planning and decision-making (40 CFR 1501.5(b)).

Availability of the Draft EA: The draft EA and associated information are available on BOEM’s website at: <https://www.boem.gov/renewable-energy/state-activities/central-atlantic>. If you require a digital copy on a flash drive or a paper copy, BOEM will provide one upon request, if supplies are available. You may request a flash drive or paper copy of the draft EA by contacting Lisa Landers at (703) 787–1520 or lisa.landlers@boem.gov.

Cooperating Agencies: The following Federal agencies participated as cooperating agencies in the preparation of the draft EA: the Bureau of Safety and Environmental Enforcement, National Marine Fisheries Service, U.S. Army Corps of Engineers, and the Environmental Protection Agency. The Town of Ocean City, Maryland, also participated as a cooperating agency in the preparation of the draft EA.

BOEM will protect privileged or confidential information that you submit as required by the Freedom of Information Act (FOIA). Exemption 4 of FOIA applies to trade secrets and commercial or financial information that is privileged or confidential. You must also briefly describe any possible harmful consequences of the disclosure of information, such as embarrassment, injury, or other harm. Even if BOEM withholds your information in the context of this notice, your comment is subject to FOIA. If your comment is requested under FOIA, BOEM will withhold your information only if it determines that one of FOIA’s exemptions to disclosure applies. BILLING CODE 7020-02-P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Stipulation and Order Modifying Consent Decree Under the Clean Air Act

On January 8, 2024, the Department of Justice lodged a proposed Stipulation and Order Modifying Consent Decree ("Stipulation") with the United States District Court for the Eastern District of

Louisiana in the lawsuit entitled *United States and the Louisiana Department of Environmental Quality v. The Dow Chemical Company, Union Carbide Corp. and Performance Materials, NA, Inc.*, Civil Action No. 2:21-cv-00114-MLCF-JVM.

The United States and Louisiana Department of Environmental Quality filed this lawsuit under the Clean Air Act and Louisiana Environmental Quality Act in January 2021. The complaint sought injunctive relief and civil penalties based on violations of the Clean Air Act's New Source Review requirements, New Source Performance Standards, National Emissions Standards for Hazardous Air Pollutants, "Title V" program requirements and operating permits, and related Texas and Louisiana state implementation plan requirements. The alleged violations involved flares used at petrochemical manufacturing plants owned and operated by the defendants, The Dow Chemical Company, Union Carbide Corp. and Performance Materials, NA, Inc., in Hahnville and Plaquemine, Louisiana, and Freeport and Orange, Texas. The Consent Decree, approved and entered by the Court in June 2021, required the defendants to perform injunctive relief, including (among other things) the installation and operation of Flare Gas Recovery System ("FGRS") compressors at the Orange Facility covered by the Consent Decree, pay a \$3,000,000 civil penalty, and perform three state-authorized Beneficial Environmental Projects in Louisiana.

The Stipulation lodged today changes the number of FGRS compressors at the Orange Facility to three from two; modifies the requirements for FGRS operation time to reflect the additional FGRS compressor (specifically, once the third compressor is operating, the Stipulation requires the Orange Facility to have two "Compressors Available for Operation or in operation 95% of the time and one Compressor Available for Operation or in operation at all times," increased from "one Compressor Available for Operation or in operation 98% of the time and two Compressors Available for Operation or in operation 90% of the time"); adds default molecular weights for nitrogen, natural gas, and methane; and corrects an incorrect paragraph cross reference in Appendix 1.2, Step 2, of the Consent Decree.

The publication of this notice opens a period for public comment on the proposed Stipulation. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to
