

management needs of the CAREWare user. The feedback will enable HRSA to assess, benchmark, and improve customer satisfaction with RWHAP grant recipients.

Likely Respondents: RWHAP recipients and providers who use CAREWare to produce data files for the Ryan White HIV/AIDS Program Service Report, the AIDS Drug Assistance Program Data Report, the Ending the HIV Epidemic Initiative Triannual Report, and the voluntary Clinical Quality Measures Performance Measures module.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review

the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

A pilot with seven RWHAP grant recipients concluded on November 20, 2023, one month after the 60-day FRN publication date of October 20, 2023. The pilot resulted in a lesser burden estimate than initially reported in the 60-day FRN.

TOTAL ESTIMATED ANNUALIZED BURDEN—HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
CAREWare User Survey	1,160	1	1,160	0.88	1,021
Total	1,160	1	1,160	0.88	1,021

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.
