Current Actions: The purpose of the Native American Library Services Basic Grants Program is to assist Native American tribes in improving library services for their communities. IMLS recognizes that information needs, and approaches to meeting them, are evolving at an unprecedented pace in all communities, and to operate within this environment effectively for the benefit of their users, libraries must be able to both strengthen existing services and move quickly to adopt new and emerging technologies.

The two goals for this program will be (1) to improve services for learning and accessing information in a variety of formats to support needs for education, workforce development, economic and business development, health information, critical thinking skills, and digital literacy skills; and (2) to enhance the skills of the current library workforce and leadership through training, continuing education, and opportunities for professional development.

This action is to renew the forms and instructions for the Notice of Funding Opportunities for the next three years.

The 60-Day Notice was published in the **Federal Register** on November 7, 2023 (88 FR 76862-76863). The agency has taken into consideration the one comment that was received under this notice.

SUPPLEMENTARY INFORMATION:

Title of Collection: Computer Science for All—Evaluation and Systematic Review of Grantee Documents.

OMB Number: 3145-NEW.

Expiration Date of Approval: Not applicable.

Type of Request: Intent to seek approval to establish an information collection for post-award output and outcome monitoring system.

Abstract: Computer Science for All Researcher Practitioner Partnership (RPP) grantees are required to submit Annual Reports and Project Outcome reports to NSF that summarize the outputs, outcomes, and impact of their funded work. NSF is required by Congress to demonstrate the long-term outcomes for the CSforAll RPP initiative, defined as those that occur at least 5 years since grantees received funding. The first year where these long-term outcomes can be documented for the first CSforAll RPP cohort, funded in 2017, was 2023. This multi-year evaluation is focused on documenting the long-term outcomes for the first three cohorts of the initiative—2017, 2018, and 2019. There are a total of 73 funded grants from the three cohorts. To effectively extract and analyze the needed information to document long-term outcomes for these 73 RPP grants, a systematic review of all grantee reports of outputs, outcomes, and impacts will be conducted, following these steps:

Develop a document review form. The researchers conducting the evaluation of these long-term outcomes for the three cohorts of grantees will develop and use a document review form that will include fields for recording information needed for this evaluation, guided by the required outputs, outcomes, and impacts that NSF must document in a report to Congress. The form will include all information that the researchers were able to glean from the grantees' reports and will highlight where information is missing about each grant's outputs and outcomes during the period of performance, and up to at least 5 years after the grant was funded. The review form will focus on the relevant outputs, outcomes, and impacts related to each of the three strands of the CSforAll RPPs initiative (preK-8, high school, and multi-grade pathways) to document the long-term outcomes for each of those strands.

Review all grantee documents using the review form. The document review form will be completed and compiled by trained researchers who conduct a primary and secondary review of all relevant grantee documents related to the funded RPP, including the grantees' reports to NSF, as well as any related publications and websites, to help ensure thoroughness, consistency, and accuracy. The researchers will
