I. Background Information

On July 8, 2022, IEPA submitted a request to EPA to incorporate revisions to the Illinois air pollution control rules in Title 35 of the Illinois Administrative Code, Part 243—Air Quality Standards. Part 243 sets forth the NAAQS adopted by EPA under section 109 of the Clean Air Act (CAA). The submission updates Part 243: Sections 243.108 and 243.122, effective May 18, 2022. Illinois revised Part 243 to reflect amendments to EPA’s “List of Designated References and Equivalent Methods” used to determine compliance with the NAAQS (fine particulate matter and coarse particulate matter, sulfur dioxide (SO₂), carbon monoxide, lead, oxides of nitrogen, and ozone). In addition to these changes, Illinois updated existing rule language to address EPA’s revocation of the 1971 primary, 24-hour, and annual average NAAQS for SO₂. An explanation of the CAA requirements, a detailed analysis

of the revisions, and EPA’s reasons for proposing approval were provided in the notice of proposed rulemaking and will not be restated here. The public comment period for this proposed rule ended on August 23, 2023.

During the comment period, EPA received one comment that covered a variety of topics including comments on administrative changes being made that could increase the complexity and burden of regulatory compliance on affected industry. The comment is summarized and addressed below and the comment itself is included in the docket for this action. We do not consider this comment to be germane or relevant to this action and therefore not adverse to this action. The comment lacks the required specificity to the proposed SIP revision and the relevant requirements of CAA section 110. Moreover, the comment does not address a specific regulation or provision in question or recommend a different action on the SIP submission from what EPA proposed. Therefore, we are finalizing our action as proposed.

II. Response to Public Comments

Comment 1: The commenter is concerned that the potential complexity of these administrative changes could increase the complexity of regulatory compliance and reporting. The commenter states that businesses may be required to dedicate more resources for compliance, which could place a financial burden on small and medium businesses. The commenter also states that the changes require consistent monitoring, increasing the possibility of non-compliance due to unawareness or misunderstanding.

Response 1: Illinois is adopting requirements that are already established at the Federal level and making them applicable at the State level. Illinois is incorporating these Federal regulations into the Illinois air pollution control rules entitled “Part 243—Ambient Air Quality Standards” and also updating the “List of Designated Reference and Equivalent Methods” in response to EPA rulemakings. Illinois is also changing Section 243.122 to be consistent with the Round 4 area designations for the primary 2010 NAAQS for SO₂ that EPA issued in 2021. These administrative changes do not place additional requirements on regulated entities beyond those already established in the NAAQS. The commenter stated that the administrative changes should be consolidated to a degree that decreases the frequency of these changes. These administrative changes have been consolidated to include the Illinois
