[Docket No. FR-7092-N-09]

Privacy Act of 1974; System of Records

AGENCY: Office of Policy Development and Research, HUD.

ACTION: Notice of a new system of records.

SUMMARY: Pursuant to the provisions of the Privacy Act of 1974, as amended, the Department of the Housing and Urban Development (HUD), Office of Policy Development & Research (PD&R) is issuing a public notice of its intent to establish a Privacy Act system of records titled “Moving to Work (MTW)

Asset Building Cohort Evaluation Data Files.” The purpose of the system is to serve as a repository that stores and maintains statistically analyzed data collected to evaluate asset building programs implemented by the Public Housing Agencies (PHAs) participating in the Moving to Work (MTW) Asset Building Cohort.

SUPPLEMENTARY INFORMATION: The Consolidated Appropriations Act of 2016 authorized HUD to award Moving to Work (MTW) authority to 100 additional Public Housing Authorities (PHAs) by September 2023, and required that new MTW agencies be selected in cohorts with a specific policy focus. The participating PHAs will implement either a rent reporting for credit building program, an opt-out savings account program, or a PHA-

designed asset building program. The Asset Building Cohort will test two types of asset building programs for HUD households, rent reporting for credit building and an opt-out savings account program. To enable rigorous evaluation, households will be randomly assigned to participate in the asset building program or be in the control group. Households assigned to the opt-out savings account program will be automatically enrolled and then informed that they have access to savings that the PHA is depositing into an escrow account for them, which will be a minimum of \$10 a month for two years.

Moving to Work Asset Building Cohort Evaluation Data Files stores information needed to evaluate the impact of the asset building programs. The study sample for rent reporting will be drawn from households who volunteer to have their rental payments reported to credit agencies to build credit. To rigorously study the impact of rent reporting, volunteers will be randomly assigned to a treatment group for whom rental payments are reported or a control group for whom such reporting does not occur. The rent reporting study will include a longitudinal panel of families who will participate in qualitative, in-depth interviews to provide insight into how they understand and experience rent reporting for credit building. The evaluation of the MTW Asset Building Cohort will help HUD determine if asset building programs of the types studied can be effectively implemented by PHAs and if they positively impact the well-being of HUD-assisted households.

HUD researchers (including Abt Associates and MEF Associates) will use this information to examine household outcomes related to housing stability and financial wellbeing. Researchers will also seek to understand the experience of households participating in the asset building programs and the PHAs that implement the asset building programs. This System of Records will contain data necessary to evaluate the effect of these new asset building programs.
