

NATIONAL SCIENCE FOUNDATION**Notice of Permit Modification Received Under the Antarctic Conservation Act of 1978****AGENCY:** National Science Foundation.**ACTION:** Notice of permit modification request.

SUMMARY: The National Science Foundation (NSF) is required to publish a notice of requests to modify permits issued to conduct activities regulated under the Antarctic Conservation Act of 1978. This is the required notice of a requested permit modification.

DATES: Interested parties are invited to submit written data, comments, or views with respect to this permit application by February 26, 2024. Permit applications may be inspected by interested parties at the Permit Office, address below.

ADDRESSES: Comments should be addressed to Permit Office, Office of Polar Programs, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, Virginia 22314.

FOR FURTHER INFORMATION CONTACT: Andrew Titmus, ACA Permit Officer, Office of Polar Programs, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314; 703-292-4479; or ACApermits@nsf.gov.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Public Law 95-541), as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas as requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

Description of Permit Modification Requested: The Foundation issued a permit (ACA 2024-006) to Megan Cimino on August 14, 2023. The issued permit allows the permit holder and agents to enter Antarctic Specially Protected Areas (ASPAs), as well as engage in research activities that would result in Take, Harmful Interference, and Import into the USA. The permit holder and agents would conduct research as part of the Palmer Station Long-Term Ecological Research Program (Palmer LTER). The applicant would continue long term-research efforts to assess how annual environmental variability affects seabird diets, breeding success, growth rates, survival and

recruitment, behavior, population trends, foraging success, and seasonal dispersal. The study species include the Adelie Penguin, Chinstrap Penguin, Gentoo Penguin, Brown Skua, South Polar Skua, Southern Giant Petrel, Blue-Eyed Shag, Kelp Gull, Snowy Sheathbill. All seabirds involved in this research would be released unharmed. Up to four timelapse cameras attached to poles on square bases anchored by rocks would be deployed to monitor penguin occupation patterns.

Now, the permit holder proposes a permit modification to include incidental mortality during research activities given the risk associated with various techniques used on different species. Most of the permitted research activities are unlikely to result in an incidental mortality (e.g., censusing, mapping, collecting fecal samples) while other activities are higher risk (e.g., stomach lavage, deploying trackers). Handling alone is unlikely to result in a mortality but due to the unpredictable nature of animal behavior and/or human error, handling could result in an injury and subsequent mortality. Further, the act of attaching tracking devices to penguins, skuas and petrels is unlikely to result in mortality, but the device could influence the animal's behavior, including aero and hydrodynamics. The permit holder requests the following number of incidental mortalities by species: Adelie Penguin (2), Chinstrap Penguin (2), Gentoo Penguin (2), Brown Skua (2), South Polar Skua (2), Southern Giant Petrel (2), Blue-Eyed Shag (1), Kelp Gull (1), Snowy Sheathbill (1).

Location: Palmer Station area, Antarctic Peninsula; ASPA 107, Dion Islands; ASPA 113, Litchfield Island; ASPA 115, Lagotellerie Island; ASPA 117, Avian Island; ASPA 139, Biscoe Point; ASPA 170, Charcot Island; and ASPA 176 Rosenthal Islands.

Dates: October 1, 2023—September 30, 2028.

Kimiko S. Bowens-Knox,

Program Analyst, Office of Polar Programs.

BILLING CODE 7555-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-305; NRC-2024-0023]

Kewaunee Solutions, Inc.; Kewaunee Power Station; Environmental Assessment and Finding of No Significant Impact

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an exemption in response to the March 29, 2023, request from Kewaunee Solutions, Inc., (KS) Kewaunee Power Station (KPS), located in Kewaunee County, Wisconsin. The exemption would permit KS to use funds from the KPS nuclear decommissioning trust (NDT) for the management of site restoration activities and allow trust disbursements for site restoration activities to be made without prior notice to the NRC. The NRC staff is issuing an environmental assessment (EA) and finding of no significant impact (FONSI) associated with the proposed exemption.

DATES: The EA and FONSI referenced in this document are available on January 25, 2024.

ADDRESSES: Please refer to Docket ID NRC-2024-0023 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- *Federal Rulemaking website:* Go to <https://www.regulations.gov> and search for Docket ID NRC-2024-0023. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301-415-0624; email: Stacy.Schumann@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, at 301-415-4737, or by email to PDR.Resource@nrc.gov. For the convenience of the reader, instructions about obtaining materials referenced in this document are provided in the "Availability of Documents" section.

- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to PDR.Resource@nrc.gov or call 1-800-397-4209 or 301-415-4737, between 8 a.m. and 4 p.m. eastern time, Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Karl Sturzebecher, Office of Nuclear Material

Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, telephone: 301-415-8534, email: Karl.Sturzebecher@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is considering issuance of an exemption from the requirements of paragraph (a)(8)(i)(A) of section 50.82 “Termination of license,” of part 50, “Domestic Licensing of Production and Utilization Facilities,” of title 10 of the *Code of Federal Regulations* (10 CFR) and paragraph (h)(1)(iv) of 10 CFR 50.75, “Reporting and recordkeeping for decommissioning planning,” to KS for Renewed Facility Operating License (RFOL) No. DPR-43 for KPS, located in Kewaunee County, Wisconsin. The exemption was submitted on March 29, 2023, and supplemented on October 5, 2023, in response to a request for additional information from the NRC staff dated August 29, 2023, pertaining to the decommissioning trust fund (DTF) cash flows provided in the initial exemption request submittal.

The exemption would permit KS to use funds from the KPS NDT for site restoration activities for KPS in the same manner that funds from the NDT are used under 10 CFR 50.82(a)(8) for decommissioning activities. The exemption request submitted by KPS was based on its analysis of the expected KPS decommissioning and site restoration costs, as provided in the KPS Post-Shutdown Decommissioning Activities Report (PSDAR), as supplemented, which was submitted by KS to the NRC on May 13, 2021.

The exemption would also allow trust disbursements for site restoration activities to be made without prior notice to the NRC, which is consistent with a previous exemption allowing KS to use the KPS NDT for the management of spent fuel, and to allow trust disbursements for spent fuel management to be made without prior NRC notice, which was approved on May 21, 2014. The NRC staff’s analysis will include evaluation of the KPS NDT in view of the prior exemption.

Consistent with 10 CFR 51.21, “Criteria for and identification of licensing and regulatory actions requiring environmental assessments,” the NRC has determined that an EA is the appropriate form of environmental review for the requested action and prepared the following EA that analyzes the environmental impacts of the proposed action. Based on the results of the EA, which is provided in Section II of this document, and in accordance with paragraph (a) of 10 CFR 51.31, “Determinations based on

environmental assessment,” the NRC has determined not to prepare an environmental impact statement for the proposed action and is issuing a FONSI.

II. Environmental Assessment

Description of the Proposed Action

The proposed action would partially exempt KS from the requirements set forth in 10 CFR 50.82(a)(8)(i)(A) and 10 CFR 50.75(h)(1)(iv). Specifically, the proposed action would allow KS to use funds from the KPS NDT for site restoration activities not associated with radiological decommissioning activities and would exempt KS from the requirement for prior notification to the NRC for these withdrawals.

The proposed action is in accordance with KS’s application dated March 29, 2023, as supplemented by letter dated October 5, 2023.

Need for the Proposed Action

By letter dated February 25, 2013, the previous holder of the KPS RFOL, Dominion Energy Kewaunee (DEK), submitted a certification to the NRC indicating it would permanently cease power operations at KPS on May 7, 2013. On May 7, 2013, DEK permanently ceased power operation at KPS. On May 14, 2013, DEK certified that it had permanently defueled the KPS reactor vessel.

By letter dated March 29, 2023, as supplemented by letter dated October 5, 2023, KS requested an exemption to allow KPS NDT withdrawals, without prior written notification to the NRC, for site restoration activities for KPS.

As required by 10 CFR 50.82(a)(8)(i)(A), decommissioning trust funds may be used by the licensee if the withdrawals are for legitimate decommissioning activity expenses, consistent with the definition of decommissioning in 10 CFR 50.2, “Definitions.” This definition addresses radiological decommissioning and does not include activities associated with site restoration. Similarly, the requirements of 10 CFR 50.75(h)(1)(iv) restrict the use of decommissioning trust fund disbursements (other than for ordinary and incidental expenses) to decommissioning expenses until final decommissioning has been completed. Therefore, exemption from 10 CFR 50.82(a)(8)(i)(A) and 10 CFR 50.75(h)(1)(iv) is needed to allow KS to use funds from the KPS NDT for site restoration activities for KPS.

In the October 5, 2023, supplement to the exemption, KS stated that the KPS DTF Status Report demonstrates that the KPS NDT contains the funds needed to cover the estimated costs of KPS

radiological decommissioning and license termination, as well as spent fuel management and site restoration activities. The supplemental information also provided additional details on license termination, spent fuel management, site restoration costs, and total forecasted expenditure data, based on the DECON decommissioning method and the current schedule of decommissioning activities for KPS.

The adequacy of funds in the KPS NDT to cover the costs of activities associated with site restoration and radiological decommissioning through license termination is supported by the KS KPS PSDAR. To support site restoration activities not associated with radiological decommissioning, KS stated that it needs access to the funds in the KPS NDT in excess of those needed for radiological decommissioning.

The requirements of 10 CFR 50.75(h)(1)(iv) further provide that, except for withdrawals being made under 10 CFR 50.82(a)(8) or for payments of ordinary administrative costs and other incidental expenses of the NDT in connection with the operation of the NDT, no disbursement may be made from the NDT without written notice to the NRC at least 30 working days in advance. Therefore, an exemption from 10 CFR 50.75(h)(1)(iv) is also requested by KS to allow KS to use funds from the KPS NDT for spent fuel management and site restoration activities without prior NRC notification.

Environmental Impacts of the Proposed Action

The proposed action involves an exemption from regulatory requirements that are of a financial or administrative nature and that do not have an impact on the environment. Before the NRC could approve the proposed action, it would have to conclude that there is reasonable assurance that adequate funds are available in the NDT to complete all activities associated with radiological decommissioning as well as spent fuel management and site restoration. Therefore, there would be no decrease in safety associated with the use of the NDT to also fund activities associated with site restoration.

Section 50.82(a)(8)(v) of 10 CFR requires a licensee to submit a financial assurance status report annually between the time of submitting its site-specific decommissioning cost estimate and submitting its final radiation survey to demonstrate that residual radioactivity has been reduced to a level that permits termination of its license. Section 50.82(a)(8)(vi) of 10 CFR

requires that if the sum of the balance of any remaining decommissioning funds, plus expected rate of return, plus any other financial surety mechanism, does not cover the estimated cost to complete radiological decommissioning, additional financial assurance must be provided to cover the cost of completion. These annual reports provide a means for the NRC to continually monitor the adequacy of available funding. Since the exemption would allow KS to use funds from the KPS NDT that are in excess of those required for radiological decommissioning, the adequacy of the funds dedicated for radiological decommissioning would not be affected by the proposed exemption. Therefore, there is reasonable assurance that there would be no environmental impact due to lack of adequate funding for radiological decommissioning.

The proposed action would not significantly increase the probability or consequences of radiological accidents. The proposed action has no direct radiological impacts. There would be no change to the types or amounts of radiological effluents that may be released; therefore, there would be no change in occupational or public radiation exposure from the proposed action. There are no materials or chemicals introduced into the plant that could affect the characteristics or types of effluents released offsite. In addition, the method of operation of waste processing systems would not be affected by the exemption. The proposed action would not result in changes to the design basis requirements of structures, systems, and components (SSCs) that function to limit or monitor the release of effluents. All the SSCs associated with limiting the release of effluents would continue to be able to perform their functions. Moreover, no changes would be made to plant buildings or the site property from the proposed action. Therefore, there are no significant radiological

environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action would have no direct impacts on land use or water resources, including terrestrial and aquatic biota, as it involves no new construction or modification of plant operational systems. There would be no changes to the quality or quantity of nonradiological effluents and no changes to the plant's National Pollutant Discharge Elimination System permits would be needed. In addition, there would be no noticeable effect on socioeconomic conditions in the region, no environment justice impacts, no air quality impacts, and no impacts to historic and cultural resources from the proposed action. Therefore, there are no significant nonradiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the NRC staff considered denial of the proposed action (*i.e.*, the “no-action” alternative). Denial of the proposed action would result in no change in current environmental impacts. Therefore, the environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

There are no unresolved conflicts concerning alternative uses of available resources under the proposed action.

Agencies or Persons Consulted

No additional agencies or persons were consulted regarding the environmental impact of the proposed action. On January 17, 2024, the State of Wisconsin representative was notified of this EA and FONSI.

III. Finding of No Significant Impact

The requested exemption from 10 CFR 50.82(a)(8)(i)(A) and 10 CFR 50.75(h)(1)(iv) would allow KS to use funds from the KPS NDT for site restoration activities for KPS, without prior written notification to the NRC. The proposed action would not significantly affect plant safety, would not have a significant adverse effect on the probability of an accident occurring, and would not have any significant radiological or nonradiological impacts. The proposed action involves an exemption from requirements that are of a financial or administrative nature and that would not have an impact on the human environment. Consistent with 10 CFR 51.21, the NRC conducted the EA for the proposed action, and this FONSI incorporates by reference the EA included in Section II of this document. Therefore, the NRC concludes that the proposed action will not have significant effects on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

Other than KS's letter dated March 29, 2023, as supplemented by letter dated October 5, 2023, there are no other environmental documents associated with this review.

Previous considerations regarding the environmental impacts of operating KPS are described in NUREG-1437, Supplement 40, “Generic Environmental Impact Statement for License Renewal of Nuclear Plants: Regarding Kewaunee Power Station, Final Report,” which provides the latest environmental review of current operations and description of environmental conditions at KPS.

IV. Availability of Documents

The documents identified in the following table are available to interested persons through one or more of the following methods, as indicated.

Document description	Adams accession No./Federal Register Notice
Kewaunee Solutions, Inc., Request for Exemptions from 10 CFR 50.82(a)(8)(i)(A) and 50.75(h)(1)(iv) for Site Restoration Activities, dated March 29, 2023.	ML23093A031.
Kewaunee Solutions, Inc., Response to Request for Additional Information (RAI) Application for Kewaunee Solutions (KS) Site Restoration Activities (EPID NO. L-2023-LLE-0008), dated October 5, 2023.	ML23278A100.
NRC, Letter RAI Exemption Site Restoration Final Repaired, dated August 29, 2023	ML23222A152.
Energy Solutions LLC., Notification of Amended Post-Shutdown Decommissioning Activities Report (Revision 2) for Kewaunee Power Station, dated May 13, 2021.	ML21145A083.
Kewaunee Power Station, FRN, Exemption from the Requirements of 10 CFR part 50, section 50.82(a)(8)(i)(A) and 50.75(h)(1)(iv) (TAC MF1438), dated May 21, 2014.	ML13225A224/79 FR 30900.

POSTAL SERVICE

International Product Change—Priority Mail Express International, Priority Mail International & First-Class Package International Service Agreement

AGENCY: Postal Service™.

ACTION: Notice.

SUMMARY: The Postal Service gives notice of filing a request with the Postal Regulatory Commission to add a Priority Mail Express International, Priority Mail International & First-Class Package International Service contract to the list of Negotiated Service Agreements in the Competitive Product List in the Mail Classification Schedule.

DATES: *Date of notice:* January 25, 2024.

FOR FURTHER INFORMATION CONTACT: Christopher C. Meyerson, (202) 268-7820.

SUPPLEMENTARY INFORMATION: The United States Postal Service® hereby gives notice that, pursuant to 39 U.S.C. 3642 and 3632(b)(3), on January 12, 2024, it filed with the Postal Regulatory Commission a *USPS Request to Add Priority Mail Express International, Priority Mail International & First-Class Package International Service Contract 35 to Competitive Product List*. Documents are available at www.prc.gov, Docket Nos. MC2024-166 and CP2024-172.

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

Performance Review Board Membership

AGENCY: Office of Science and Technology Policy.

ACTION: Notice.

SUMMARY: The Office of Science and Technology Policy publishes the names of the members selected to serve on its SES Performance Review Board (PRB).

DATES: Membership is effective on the date of this notice to January 2026.

FOR FURTHER INFORMATION CONTACT: Ms. Caitlin Pepicelli, Human Capital Specialist, Office of Science and Technology Policy, 1650 Pennsylvania Ave. NW, Washington, DC 20504. Telephone 202-881-4946.

SUPPLEMENTARY INFORMATION: 5 U.S.C. 4314(c) requires each agency to establish, in accordance with regulations prescribed by the Office of Personnel Management, one or more PRBs. The purpose of this PRB is to review and make recommendations concerning proposed performance appraisals, ratings, bonuses, pay adjustments, and other appropriate personnel actions for incumbents of the SES positions. The Board shall consist of at least three members and more than half of the members shall consist of career appointees. The names and titles of the PRB members are as follows:

Marie Scott, Associate General Counsel, Children, Families and Aging Division, Department of Health and Human Services;

Scott Driggs, Chief Counsel, Office of the Chief Counsel, Denver, Department of Health and Human Services;

Rachel Park, Chief Counsel, Office of the Chief Counsel, New York, Department of Health and Human Services;

Constance Kossally, Chief Counsel, Office of the Chief Counsel, Atlanta, Department of Health and Human Services;

Alphonso J. Hughes, Executive Assistant Director, Administration Group, Bureau of ATF, Department of Justice;

Paula Lee, Chief Counsel, Office of the General Counsel, San Francisco,

Department of Health and Human Services.

Dated: January 19, 2024.

Stacy Murphy,

Deputy Chief Operations Officer/Security Officer.
