Consumers Energy Company; Notice of Intent To Prepare an Environmental Assessment

On September 2, 2022, and supplemented on November 8, 2022, March 17, 2023, and August 8, 2023, Consumers Energy Company (licensee), licensee for the Hardy Hydroelectric Project No. 2452 (project) filed an application for a non-capacity license amendment. The project is located on the Muskegon River in Newago and Mecosta counties, Michigan and does not occupy federal lands.

In collaboration with the Commission's Division of Dam Safety and Inspections, the licensee proposes to construct several modifications to the auxiliary spillway to increase its capacity and repair and upgrade the spillway discharge channel to improve stability and safety. In addition to the auxiliary spillway modifications, the licensee proposes to upgrade the dam crest to improve transportation infrastructure by replacing and widening the road on the dam crest, which would also require replacement of the access bridge to the intake tower and replacement of the existing splash wall. A Notice of Application Accepted for Filing and Soliciting Comments, Motions to Intervene, and Protest was issued on October 12, 2022. No comments were received.

This notice identifies Commission staff's intention to prepare an environmental assessment (EA) for the proposed action. The planned schedule for the completion of the EA is March 2024.¹ Revisions to the schedule may be

Abstract: The PM_{2.5} NAAQS State Implementation Plan (SIP) Requirements Rule (PM_{2.5} SIP Requirements Rule) was effective on October 24, 2016 (81 FR 58010, August 24, 2016). This rule provides the framework of Clean Air Act (CAA) requirements for air agencies to develop state implementation plans to attain and maintain the PM_{2.5} NAAQS. States have applied this framework to develop attainment plans and redesignation requests and maintenance plans for areas designated nonattainment for the 1997 PM_{2.5} NAAQS, the 2006 PM_{2.5} NAAQS, and the 2012 PM_{2.5} NAAQS. This proposed ICR renewal covers the period February 1, 2024–January 31, 2027.

The initial ICR finalized with the PM_{2.5} NAAQS SIP Requirements Rule estimated, for the 3 years following the ICR approval date, the burden associated with plan development and plan revisions related to ongoing implementation efforts in 31 areas designated nonattainment for the 1997, 2006 and/or 2012 PM_{2.5} NAAQS. The estimates included the burden to develop and submit, and the burden to the EPA to review and to approve or disapprove, attainment plans to meet the requirements prescribed in CAA sections 110 and part D, subparts 1 and 4 of title I. A PM_{2.5} NAAQS attainment plan contains rules and other measures designed to improve air quality and achieve the NAAQS by the deadlines established under the CAA. It also must address several additional CAA requirements related to demonstrating timely attainment and must contain contingency measures in the event the nonattainment area does not achieve reasonable further progress throughout

the attainment period or in the event the area does not attain the NAAQS by its attainment date. States that have attained by the applicable attainment date may be eligible to submit a redesignation request and maintenance plan to receive a redesignation from "nonattainment" to "attainment." After a state submits an attainment or maintenance plan, the CAA requires the EPA to take action on the plan. Tribes located within the geographic boundary of a nonattainment area may develop or submit attainment plans, but they are not required to do so.

This ICR supersedes the existing ICR—for which the EPA is proposing renewal in this action—for purposes of PM_{2.5} NAAQS implementation.

Form Numbers: None.

Respondents/affected entities: State and local governments.

Respondent's obligation to respond: Mandatory.

Estimated number of respondents: 12.

Frequency of response: Once per triggering event (*i.e.*, an air agency is required to revise and submit a SIP revision when the area is initially designated as nonattainment, reclassified to a higher classification, when an areas fails to achieve reasonable further progress, when a Serious nonattainment area fails to timely attain, and/or when a state requests redesignation for a PM_{2.5} nonattainment area that attains the NAAQS).

Total estimated burden: 24,900 hours (per year). Burden is defined as 5 CFR 1320.03(b).

Total estimated cost: \$1.76M (present value per year), which includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 1800 hours of total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to the reduction in nonattainment areas from 18 to 12. While the hours decreased due to the fewer number of respondents, there is a present-day value increase in estimated costs due to the increase in labor rates and the need for several areas to continue to develop plans to help address complex air quality issues.

Director, Regulatory Support Division.
