

expedite their entry process into the United States.

MPC Expansion

Mobile Passport Control (MPC) program will expand to include U.S. Legal permanent residents (LPR) and Visa Waiver Program (VWP) country visitors arriving for their second visit to the United States. The Automated Passport Control (APC) program previously captured this population, and CBP is now expanding the MPC program to be used by these populations. U.S. LPRs are eligible for SA's photo biometric confirmation upon arrival into the United States. Other classes of admission eligible for SA's photo biometric confirmation will be considered for MPC inclusion as a future update.

CBP One™ Mobile Application

A new mobile application testing the operational effectiveness of a process which allows travelers to use a mobile application to submit information to CBP, in advance, prior to arrival. This second mobile capability is under the current CBP One™ application which is a platform application that serves as a single portal for travelers and stakeholders to virtually interact with CBP. The CBP One™ application will also allow travelers to self-segment upon arrival at land borders in the United States.

Similar to the MPC application, the CBP One™ application eliminates the administrative tasks performed by the officer during a traditional inspection and in most cases will eliminate the need for respondents/travelers to fill out a paper declaration. In addition, the CBP One™ application will also provide a more efficient and secure in person inspection between the CBP Officer and the traveler at the land border.

Unique to the CBP One™ application is that while the MPC submission is completed upon arrival, the CBP One™ application must be submitted in advance and will require the additional data elements:

1. Traveler Identify the Port of Entry (POE).
2. Time and/or date of arrival.

In addition, like the MPC application, travelers will provide their answers to CBP's questions, take a self-picture/selfie and submit the information via the CBP One™ application, after the plane lands. This will allow for advance vetting and proper resource management at the POE. This capability through the CBP One™ application is available to all travelers arriving with

authorized travel documents, including foreign nationals.
