

EPA ICR No.: 2517.04.

OMB Control No.: 2070–0194.

ICR status: This ICR is currently approved through September 30, 2024. Under the PRA, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the Code of Federal Regulations (CFR), after appearing in the **Federal Register** when approved, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This information collection request (ICR) covers reporting and recordkeeping requirements for persons who manufacture or process chemical substances as nanoscale materials under the authority of section 8(a) of the Toxic Substances Control Act (TSCA) and implementing regulations in 40 CFR part 704.20.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 107.5 hours per response. Burden is defined in 5 CFR 1320.3(b).

The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here:

Respondents/affected entities: Entities potentially affected are those that manufacture or process chemical substances as nanoscale materials and is related to a final rule issued under the authority of section 8(a) of the Toxic Substances Control Act (TSCA). The following North American Industrial Classification System (NAICS) codes have been provided to assist in determining whether this action might apply to certain entities:

- 325 Chemical Manufacturers and Processors;
- 325130 Synthetic Dye and Pigment Manufacturing;
- 324110 Petroleum Refineries;
- 325180 Other Basic Inorganic Chemical Manufacturing;
- 331221 Rolled Steel Shape Manufacturing;
- 334413 Semiconductor and Related Device Manufacturing;
- 335991 Carbon and Graphite Product Manufacturing;
- 423220 Home Furnishing Merchant Wholesalers;

- 423330 Roofing, Sliding, and Insulation Material Merchant Wholesalers; and
- 423510 Metal Service Centers and Other Metal Merchant Wholesalers.

Respondent's obligation to respond: Mandatory. TSCA section 8(a) and 40 CFR 704.20.

Forms: EPA Form 9600–07.

Frequency of response: Occasional.

Total estimated number of potential respondents: 9.

Total estimated average number of responses for each respondent: 1.7.

Total estimated annual burden hours: 961 hours.

Total estimated annual costs: \$69,197, which includes an estimated cost of \$0 for capital investment or maintenance and operational costs.

III. Are there changes in the estimates from the last approval?

There is a decrease of 39,128 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease reflects EPA's adjustments in the estimation methodology of the costs and burden. The adjustments made to the estimation methodology include:

- Burden estimates based on expected submissions, not on actual submissions received by the Agency, while the reporting covered in this period is based on actual submissions received by the Agency. This significant change accounts for the almost all the decrease in burden and cost estimates.

- Burden estimates estimated separately for manufactures and processors, while the reporting covered in this period calculates a weighted burden for any given respondent without separating the manufacturers from the processors. This approach was deemed reasonable given that the Agency received only 27 submissions related to TSCA 8(a) nanomaterials in the three-year ICR period.

In addition, OMB has requested that EPA adopt the 18-question format for ICR Supporting Statements that is used by other federal agencies and departments which is based on the submission instructions established by OMB, replacing the alternate format that has been used by EPA. Although this Supporting Statement has been modified to reflect the 18-question format, the change in format has not changed the information collection activities or related estimated burden and costs.

IV. What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as

appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

EPA Document in Support of the Paraquat Interim Registration Review Decision; Notice of Availability

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In July 2021, the Environmental Protection Agency (EPA or the Agency) completed the Paraquat Dichloride Interim Registration Review Decision (Paraquat ID). The Paraquat ID finalized certain portions of EPA's analysis of paraquat's risks and benefits and determined that certain mitigation measures were necessary for paraquat to meet the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) standard for registration. In September 2021, the California Rural Legal Assistance Foundation, *et al.* (Petitioners) filed a Petition for Review of the Paraquat ID in the U.S. Court of Appeals for the Ninth Circuit. As part of that litigation, EPA has further considered several substantive issues raised by the Petitioners in relation to the Paraquat ID, including concerns related to human health and EPA's balancing of risks and benefits. This document announces the availability of and solicits public comment on a document that presents EPA's preliminary reconsideration of the issues raised by Petitioners in relation to the Paraquat ID.

DATES: Comments must be received on or before April 1, 2024.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPP–2011–0855,

II. What action is the Agency taking?

This notice announces the availability of a document outlining the Agency's preliminary reconsideration of the several issues identified by Petitioners in relation to the Paraquat ID. See *California Rural Legal Assistance Foundation, et al. v. USEPA*, Case No. 21-71287 (9th Cir.) Those issues include concerns raised about the Agency's assessment of whether

paraquat poses a risk of Parkinson's Disease; its analysis of respiratory and dermal exposures, as well as exposures to direct and indirect paraquat drift; the analysis of benefits; the consideration of health-related costs; and the required balancing of paraquat's risks and benefits. This document, titled "EPA'S Preliminary Supplemental Consideration of Certain Issues in Support of its Interim Registration Review Decision for Paraquat," is available in the docket at <https://www.regulations.gov>, under docket number EPA-HQ-OPP-2011-0855.

The Agency will review and consider all significant comments on this document that are submitted during the public comment period. Following EPA's consideration of those comments, EPA intends to issue a final document (or documents) by January 17, 2025, consistent with its obligations in the pending litigation.
