

provide home visiting services to eligible families in at-risk communities.

Through the Home Visiting Assessment of Implementation Quality study, HRSA aims to examine specific components of the Home Visiting Implementation Quality Conceptual Framework to inform strategies for implementing high quality home visiting programs. One of the three quality components the study will focus on is support for supervisors of home visitors. A qualified, stable, and supported home visitor workforce is an important quality component of home visiting, and supervision is a key part of supporting that workforce. The requested information collection will explore how training for supervisors may be linked to home visitor job satisfaction. It will also examine how supervisor training in important content

areas (e.g., substance use, intimate partner violence) may affect the extent to which home visitors talk to families about these topics. Data collection will include an online recruitment survey, interviews, and focus groups.

Need and Proposed Use of the Information: HRSA is seeking additional information about how the MIECHV Program can train and support supervisors of home visitors to provide high-quality supervision. HRSA intends to use this information to identify practices that MIECHV awardees and LIAs could use to best support home visiting supervisors, improving home visitors' ability to deliver high-quality home visiting services.

Likely Respondents: MIECHV-funded LIA staff, including program directors, coordinators, supervisors, and home visitors.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Recruitment Survey	250	1	250	0.17	42.5
LIA Program Director Interview Guide	50	1	50	1.00	50.0
Supervisor Focus Group Protocol	50	1	50	1.50	75.0
Home Visitor Focus Group Protocol	50	1	50	1.50	75.0
Total	400	400	242.5

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.
