DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP23–513–000]

Port Arthur Pipeline, LLC; Notice of Availability of the Environmental Assessment for the Proposed Louisiana Connector Pipeline Amendment

The staff of the Federal Energy
Regulatory Commission (FERC or
Commission) has prepared an
environmental assessment (EA) for the
Louisiana Connector Pipeline
Amendment, proposed by Port Arthur
Pipeline, LLC (PAPL) in the above-
referenced docket. PAPL requests
authorization to make modifications to
its previously authorized Louisiana
Connector Project pipeline, construction
footprint, and installation methods in 38
locations. The Louisiana Connector
Project was approved by the
Commission on April 18, 2019, in
Docket No. CP18–7–000.

The EA assesses the potential
environmental effects of the
construction and operation of the
Louisiana Connector Pipeline
Amendment in accordance with the
requirements of the National
Environmental Policy Act (NEPA). The
FERC staff concludes that approval of
the proposed amendment, with
appropriate mitigating measures, would
not constitute a major Federal action
significantly affecting the quality of the
human environment.

The U.S. Army Corps of Engineers
participated as a cooperating agency in
the preparation of the EA. Cooperating
agencies have jurisdiction by law or
special expertise with respect to
resources potentially affected by the
proposal and participate in the NEPA
analysis.

The proposed amended facilities are
specific to 38 locations in Jefferson

County, Texas and Cameron, Calcasieu,
Beauregard, and Allen Parishes,
Louisiana (between milepost 0 and
milepost 82.5), as detailed below:

- modifications to pipeline routes,
construction methods, horizontal
directional drill (HDD) entry points, and
additional temporary workspaces to
accommodate landowner requests,
reduce environmental impacts, avoid
newly identified non-PAPL pipelines
and new structures, and allow for safe
construction access;

- shifting of pipeline permanent
easements to abut other existing
easements;

- addition and modification of access
roads for HDD construction and
inspection;

- modification of storage and staging
areas to utilize areas that were recently
and permanently impacted by other
parties;

- modification of access roads due to
obstructions and removal of access
roads no longer required;
- modification to water approaches to
use existing boat ramp/dock
improvements;

- relocation of mainline valves to
facilitate operations and maintenance,
provide for safer road access, and access
to power and communication facilities;

- modification of three waterbody
crossings methods from open cut to an
HDD as requested by the U.S. Army
Corps of Engineers;

- combination, in two locations, of
multiple HDDs into a single HDD to
avoid an open-cut crossing and
eliminate an HDD; and

- modification of HDD alignments to
avoid conflicts with potential future
deeper canal depths.

The Commission mailed a copy of the
Notice of Availability of this EA to
Federal, State, and local government
representatives and agencies; elected
officials; environmental and public
interest groups; Native American tribes;
potentially affected landowners and
other interested individuals and groups;
and newspapers and libraries in the
amended project area. The EA is only
available in electronic format. It may be
viewed and downloaded from the
FERC's website (www.ferc.gov), on the
natural gas environmental documents
page ([https://www.ferc.gov/industries-
data/natural-gas/environment/
