

In this notice, OSHA proposes to add two new test standards to the NRTL Program’s list of appropriate test standards. Table 2, below, lists the test

standards that are new to the NRTL Program. OSHA preliminarily determines that these test standards are appropriate test standards. OSHA seeks

public comment on this preliminary determination.

TABLE 2—STANDARDS OSHA IS PROPOSING TO ADD TO THE NRTL PROGRAM’S LIST OF APPROPRIATE TEST STANDARDS

Test standard	Test standard title
UL 6200	Controllers for Use in Power Production.
UL 62091	Low-Voltage Switchgear and Controlgear—Controllers for Drivers of Stationary Fire Pump.

IV. Preliminary Findings on the Application

UL submitted an acceptable application for expansion of the scope of recognition. OSHA’s review of the application files and related material preliminarily indicates that UL can meet the requirements prescribed by 29 CFR 1910.7 for expanding recognition to include the addition of the test standards listed above for NRTL testing and certification. This preliminary finding does not constitute an interim or temporary approval of UL’s application.

OSHA also preliminarily determined that the test standards listed above are appropriate test standards.

OSHA seeks public comment on these preliminary determinations.

V. Public Participation

OSHA welcomes public comment as to whether UL meets the requirements of 29 CFR 1910.7 for expansion of recognition as a NRTL and whether the test standard listed above is an appropriate test standard that should be included in the NRTL Program’s List of Appropriate Test Standards. Comments should consist of pertinent written documents and exhibits.

Commenters needing more time to comment must submit a request in writing, stating the reasons for the request by the due date for comments. OSHA will limit any extension to 10 days unless the requester justifies a longer time period. OSHA may deny a request for an extension if it is not adequately justified.

To review copies of the exhibits identified in this notice, as well as comments submitted to the docket, contact the Docket Office, Occupational Safety and Health Administration, U.S. Department of Labor. These materials also are generally available online at <https://www.regulations.gov> under Docket No. OSHA–2009–0025 (for further information, see the “Docket” heading in the section of this notice titled ADDRESSES).

OSHA staff will review all comments to the docket submitted in a timely manner and after addressing the issues

raised by these comments, make a recommendation to the Assistant Secretary for Occupational Safety and Health on whether to grant UL’s application for expansion of its scope of recognition and to add the test standards listed above to the NRTL Program’s List of Appropriate Test Standards. The Assistant Secretary will make the final decision on granting the application and on adding the test standards listed above to the NRTL Program’s List of Appropriate Test Standards. In making these decisions, the Assistant Secretary may undertake other proceedings prescribed in Appendix A to 29 CFR 1910.7.

OSHA will publish a public notice of its final decision in the **Federal Register**.

VI. Authority and Signature

James S. Frederick, Deputy Assistant Secretary of Labor for Occupational Safety and Health, authorized the preparation of this notice. NUCLEAR REGULATORY COMMISSION

[Docket No. 70-0152; NRC-2024-0021]

Purdue University; License Renewal Application

AGENCY: Nuclear Regulatory Commission.

ACTION: Acceptance for docketing; opportunity to request a hearing and to petition for leave to intervene; order imposing procedures.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has received an application from Purdue University (Purdue or the applicant), to renew Special Nuclear Material (SNM) License Number 142 (SNM-142). The renewed license would authorize the applicant to continue to use SNM in various research operations, calibration, and testing at its campus in West Lafayette, Indiana. If the license renewal application is approved, the license would authorize Purdue to continue to possess and use SNM under NRC regulations for 10 years beyond its current license. Because the license application contains sensitive unclassified non-safeguards information (SUNSI) and safeguards information (SGI), an order imposes procedures to obtain access to SUNSI and SGI for contention preparation.

DATES: A request for a hearing or petition for leave to intervene must be filed by April 9, 2024. Any potential party as defined in section 2.4 of title 10 of the *Code of Federal Regulations* (10 CFR) who believes access to SUNSI or SGI is necessary to respond to this notice must request document access by February 20, 2024.
