

NUCLEAR REGULATORY COMMISSION**10 CFR Parts 2, 15, 37, 73, 110, 140, 170 and 171**

[NRC-2022-0046]

RIN 3150-AK74

Fee Schedules; Fee Recovery for Fiscal Year 2024**AGENCY:** Nuclear Regulatory Commission.**ACTION:** Proposed rule.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is proposing to amend the licensing, inspection, special project, and annual fees charged to its applicants and licensees. The proposed amendments are necessary to comply with the Nuclear Energy Innovation and Modernization Act, which requires the NRC to recover, to the maximum extent practicable, approximately 100 percent of its annual budget less certain amounts excluded from this fee recovery requirement.

DATES: Submit comments by March 21, 2024. Comments received after this date will be considered if it is practical to do so, but the NRC is only able to ensure consideration for comments received before this date. Because the Nuclear Energy Innovation and Modernization Act requires the NRC to collect fees for fiscal year 2024 by September 30, 2024, the NRC must finalize any revisions to its fee schedules promptly, and thus is unable to grant any extension request of the comment period.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website:

- *Federal rulemaking website:* Go to <https://www.regulations.gov> and search for Docket ID NRC-2022-0046. Address questions about NRC dockets to Dawn Forder; telephone: 301-415-3407; email: Dawn.Forder@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this proposed rule.

- *Email comments to:* Rulemaking.Comments@nrc.gov. If you do not receive an automatic email reply confirming receipt, then contact us at 301-415-1677.

- *Fax comments to:* Secretary, U.S. Nuclear Regulatory Commission at 301-415-1101.

- *Mail comments to:* Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, ATTN: Rulemakings and Adjudications Staff.

- *Hand deliver comments to:* 11555 Rockville Pike, Rockville, Maryland 20852, between 7:30 a.m. and 4:15 p.m. eastern time, Federal workdays; telephone: 301-415-1677.

You can read a plain language description of this proposed rule at <https://www.regulations.gov/docket/NRC-2022-0046>. For additional direction on obtaining information and submitting comments, see “Obtaining Information and Submitting Comments” in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Anthony Rossi, Office of the Chief Financial Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, telephone: 301-415-7341; email: Anthony.Rossi@nrc.gov.

I. Obtaining Information and Submitting Comments*A. Obtaining Information*

Please refer to Docket ID NRC-2022-0046 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to <https://www.regulations.gov> and search for Docket ID NRC-2022-0046.

- *NRC’s Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1-800-397-4209 or 301-415-4737, or by email to PDR.Resource@nrc.gov. For the convenience of the reader, the ADAMS accession numbers are provided in the “Availability of Documents” section of this document.

- *NRC’s PDR:* The PDR, where you may examine and order copies of

publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to PDR.Resource@nrc.gov or call 1-800-397-4209 or 301-415-4737, between 8 a.m. and 4 p.m. eastern time, Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic submission of comments through the Federal rulemaking website (<https://www.regulations.gov>). Please include Docket ID NRC-2022-0046 in your comment.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <https://www.regulations.gov> as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comments into ADAMS.

II. Background; Statutory Authority

The NRC’s fee regulations are primarily governed by two laws: (1) the Independent Offices Appropriation Act, 1952 (IOAA) (31 U.S.C. 9701); and (2) the Nuclear Energy Innovation and Modernization Act (NEIMA) (42 U.S.C. 2215). The IOAA authorizes and encourages Federal agencies to recover, to the fullest extent possible, costs attributable to services provided to identifiable recipients. Under NEIMA, the NRC must recover, to the maximum extent practicable, approximately 100 percent of its annual budget, less the budget authority for excluded activities. Under section 102(b)(1)(B) of NEIMA, “excluded activities” include any fee-relief activity as identified by the Commission, generic homeland security activities, waste incidental to reprocessing activities, Nuclear Waste Fund activities, advanced reactor regulatory infrastructure activities, Inspector General services for the Defense Nuclear Facilities Safety Board, research and development at universities in areas relevant to the

NRC’s mission, and a nuclear science and engineering grant program. In fiscal year (FY) 2024, in addition to the fee-relief activities identified by the Commission in prior fee rules the resources for the Minority Serving Institutions Grant Program are also identified as a fee-relief activity to be excluded from the fee recovery requirement (see Table 1, “Excluded Activities,” of this document for the list of all excluded activities).

Under NEIMA, the NRC must use its IOAA authority first to collect service fees for NRC work that provides specific benefits to identifiable recipients (such as licensing work, inspections, and special projects). The NRC’s regulations in part 170 of title 10 of the *Code of Federal Regulations* (10 CFR), “Fees for Facilities, Materials, Import and Export Licenses, and Other Regulatory Services Under the Atomic Energy Act of 1954, as Amended,” explain how the agency collects service fees from specific beneficiaries. Because the NRC’s fee recovery under the IOAA (10 CFR part 170) will not equal 100 percent of the agency’s total budget authority for the FY (less the budget authority for

excluded activities), the NRC also assesses “annual fees” under 10 CFR part 171, “Annual Fees for Reactor Licenses and Fuel Cycle Licenses and Materials Licenses, Including Holders of Certificates of Compliance, Registrations, and Quality Assurance Program Approvals and Government Agencies Licensed by the NRC,” to recover the remaining amount necessary to comply with NEIMA.

III. Discussion

FY 2024 Fee Collection—Overview

The NRC is issuing this FY 2024 proposed fee rule based on the FY 2024 budget request as further described in the NRC’s FY 2024 Congressional Budget Justification (CBJ) (NUREG–1100, Volume 39) because a full-year appropriation has not yet been enacted for FY 2024. The NRC will adjust the fees described in this proposed rule to reflect the enacted budget authority for FY 2024. The FY 2024 budget request is \$1,006.4 million and proposes the use of \$27.1 million in carryover to offset the Nuclear Reactor Safety budget. As a result, the gross budget authority in the FY 2024 budget request and the total

budget authority used in the FY 2024 proposed fee rule is \$979.2 million, which would be an increase of \$52.1 million from FY 2023. The increase is primarily to support salaries and benefits, in accordance with the U.S. Office of Management and Budget (OMB) guidance.

As explained previously, certain portions of the NRC’s total budget authority are excluded from NEIMA’s fee recovery requirement under section 102(b)(1)(B) of NEIMA. Based on the FY 2024 budget request, these exclusions total \$156.0 million, which is an increase of \$19.0 million from FY 2023. These excluded activities consist of \$104.2 million for fee-relief activities, \$34.2 million for advanced reactor regulatory infrastructure activities, \$15.1 million for generic homeland security activities, \$1.0 million for waste incidental to reprocessing activities, and \$1.5 million for Inspector General services for the Defense Nuclear Facilities Safety Board. Table I summarizes the excluded activities for the FY 2024 proposed fee rule. The FY 2023 amounts are provided for comparison purposes.

TABLE I—EXCLUDED ACTIVITIES
[Dollars in millions]

	FY 2023 Final rule	FY 2024 Proposed rule
Fee-Relief Activities:		
International activities	28.8	37.5
Agreement State oversight	11.9	12.8
Medical isotope production infrastructure	3.5	0.7
Fee exemption for nonprofit educational institutions	13.5	19.0
Costs not recovered from small entities under 10 CFR 171.16(c)	8.9	10.4
Regulatory support to Agreement States	14.2	12.1
Generic decommissioning/reclamation activities (not related to the operating power reactors and spent fuel storage fee classes)	12.5	2.8
Uranium recovery program and unregistered general licensees	2.7	5.4
Potential Department of Defense remediation program Memorandum of Understanding activities	0.9	0.8
Non-military radium sites	0.2	0.2
Minority Serving Institutions Grant Program	N/A	2.5
Subtotal Fee-Relief Activities	97.1	104.2
Activities under section 102(b)(1)(B)(ii) of NEIMA (Generic Homeland Security activities, Waste Incidental to Reprocessing activities, and the Defense Nuclear Facilities Safety Board)	16.1	17.6
Advanced reactor regulatory infrastructure activities	23.8	34.2
Total Excluded Activities	137.0	156.0

After accounting for the exclusions from the fee recovery requirement and net billing adjustments (*i.e.*, for FY 2024 invoices that the NRC estimates will not be paid during the FY, less payments received in FY 2024 for prior-year invoices), the NRC estimates that it must recover approximately \$825.7 million in fees in FY 2024. Of this amount, the NRC estimates that \$205.5 million will be recovered through 10 CFR part 170

service fees and approximately \$620.2 million will be recovered through 10 CFR part 171 annual fees. Table II summarizes the fee recovery amounts for the FY 2024 proposed fee rule using the FY 2024 budget request and takes into account the budget authority for excluded activities and net billing adjustments. For all information presented in the following tables in this proposed rule, individual values may

not sum to totals due to rounding. Please see the work papers, available as indicated in the “Availability of Documents” section of this document, for actual amounts.

Since a full-year appropriation has not yet been enacted, the FY 2024 proposed fee rule is based on the FY 2024 budget request. As discussed in the FY 2024 budget request, this proposed rule assumes the utilization of

\$27.1 million in carryover to offset the Nuclear Reactor Safety budget. In addition, the proposed rule assumes the use of \$16.0 million in prior-year unobligated carryover funds for the

University Nuclear Leadership Program, which was not included in the budget request, but has historically been included by Congress in the final appropriations bill. The FY 2023

amounts are provided for comparison purposes. If the NRC receives an appropriation providing a different total budget authority, the final fee rule will reflect the final appropriation.

TABLE II—BUDGET AND FEE RECOVERY AMOUNTS
[Dollars in millions]

	FY 2023 Final rule	FY 2024 Proposed rule
Total Budget Authority	\$927.2	\$979.2
Less Budget Authority for Excluded Activities:	- 137.0	- 156.0
Balance	790.2	823.2
Fee Recovery Percent	100.0	100.0
Total Amount to be Recovered:	790.2	823.2
Less Estimated Amount to be Recovered through 10 CFR part 170 Fees	- 195.0	- 205.5
Estimated Amount to be Recovered through 10 CFR part 171 Fees	595.2	617.7
10 CFR part 171 Billing Adjustments:		
Unpaid Current Year Invoices (estimated)	3.7	4.5
Less Payments Received in Current Year for Previous Year Invoices (estimated)	- 3.3	- 2.0
Adjusted 10 CFR part 171 Annual Fee Collections Required	595.6	620.2
Adjusted Amount to be Recovered through 10 CFR parts 170 and 171 Fees	\$790.6	\$825.7

FY 2024 Fee Collection—Professional Hourly Rate

The NRC uses a professional hourly rate to assess fees under 10 CFR part 170 for specific services it provides. The professional hourly rate also helps determine flat fees (which are used for the review of certain types of license applications). This rate is applicable to all activities for which fees are assessed under §§ 170.21, “Schedule of fees for production and utilization facilities, review of standard referenced design

approvals, special projects, inspections and import and export licenses,” and 170.31, “Schedule of fees for materials licenses and other regulatory services, including inspections, and import and export licenses.” The NRC’s professional hourly rate is derived by adding budgeted resources for: (1) mission-direct program salaries and benefits; (2) mission-indirect program support; and (3) agency support (corporate support and the Inspector General (IG)). The NRC then subtracts certain offsetting receipts and divides

this total by the mission-direct full-time equivalent (FTE) converted to hours (the mission-direct FTE converted to hours is the product of the mission-direct FTE multiplied by the estimated annual mission-direct FTE productive hours). The only budgeted resources excluded from the professional hourly rate are those for mission-direct contract resources, which are generally billed to licensees separately. The following shows the professional hourly rate calculation:

$$\text{Professional Hourly Rate} = \frac{\text{Budgeted Resources}}{\text{Mission-Direct FTE Converted to Hours}} = \frac{\$834.1 \text{ million}}{1,730.4 \times 1,500} = \$321$$

For FY 2024, the NRC is proposing to increase the professional hourly rate from \$300 to \$321. The 7.1 percent increase in the professional hourly rate is primarily due to a 7.3 percent increase in budgeted resources of approximately \$56.6 million. The increase in budgeted resources is primarily due to the following: (1) an increase in mission-direct FTE to support new reactor licensing activities, the review of license renewal applications, an increased workload within the reactor decommissioning program; and (2) an increase in the fully-costed FTE rate compared to FY 2023 due to an increase in salaries and benefits to support Federal pay raises for NRC employees.

In addition, the NRC anticipates an increase in mission-direct FTE to

support the increase in licensing and decommissioning activities. This anticipated increase in the number of mission-direct FTE compared to FY 2023 partially offsets the proposed increase in the professional hourly rate caused by the overall estimated increase in budgeted resources. The professional hourly rate is inversely related to the mission-direct FTE amount; therefore, as the number of mission-direct FTE increase, the professional hourly rate may decrease. Based on the FY 2024 budget request, the number of mission-direct FTE is expected to increase by approximately 58, primarily to support the following: (1) the review of new reactor licensing activities, including the review of standard design approvals, pre-application activities, and construction permits; (2) licensing and

oversight activities for the reactor decommissioning program, which includes both power and non-power reactors in various stages of decommissioning; (3) the review of licensing actions related to enrichment and manufacturing of high assay low-enrichment uranium (HALEU) fuel and accident tolerant fuel (ATF); and (4) the review of one new fuel facility license application (TRISO-X, LLC) and one new medical isotope facility (Niowave). The FY 2024 estimate for annual mission-direct FTE productive hours is 1,500 hours, which is a decrease from 1,551 hours in FY 2023. This estimate reflects the average number of hours that a mission-direct employee spends on mission-direct work annually. This estimate, therefore, excludes hours charged to annual leave, sick leave,

holidays, training, and general administrative tasks. Table III shows the professional hourly rate calculation

methodology. The FY 2023 amounts are provided for comparison purposes.

TABLE III—PROFESSIONAL HOURLY RATE CALCULATION
[Dollars in millions, except as noted]

	FY 2023 Final rule	FY 2024 Proposed rule
Mission-Direct Program Salaries & Benefits	\$359.2	\$395.1
Mission-Indirect Program Support	\$118.8	\$120.2
Agency Support (Corporate Support and the IG)	\$299.5	\$318.9
Subtotal	\$777.5	\$834.1
Less Offsetting Receipts ¹	\$0.0	\$0.0
Total Budgeted Resources Included in Professional Hourly Rate	\$777.5	\$834.1
Mission-Direct FTE	1,672.2	1,730.4
Annual Mission-Direct FTE Productive Hours (Whole numbers)	1,551	1,500
Mission-Direct FTE Converted to Hours (Mission-Direct FTE multiplied by Annual Mission-Direct FTE Productive Hours)	2,593,582	2,595,600
Professional Hourly Rate (Total Budgeted Resources Included in Professional Hourly Rate Divided by Mission-Direct FTE Converted to Hours) (Whole Numbers)	\$300	\$321

FY 2024 Fee Collection—Flat Application Fee Changes

The NRC proposes to amend the flat application fees it charges in its schedule of fees in § 170.31 to reflect the revised professional hourly rate of \$321. The NRC charges these fees to applicants for materials licenses and other regulatory services, as well as to holders of materials licenses. The NRC calculates these flat fees by multiplying the average professional staff hours needed to process the licensing actions by the professional hourly rate for FY 2024. As part of its calculations, the NRC analyzes the actual hours spent performing licensing actions and estimates the five-year average of professional staff hours that are needed to process licensing actions as part of its biennial review of fees. These actions are required by section 205(a) of the Chief Financial Officers Act of 1990 (31 U.S.C. 902(a)(8)). The NRC performed this review for the FY 2023 proposed fee rule and will perform this review again for the FY 2025 proposed fee rule. The higher professional hourly rate of \$321 is the primary reason for the increase in flat application fees (see the work papers).

In order to simplify billing, the NRC rounds these flat fees to a minimal degree. Specifically, the NRC rounds these flat fees (up or down) in such a way that ensures both convenience for its stakeholders and minimal effects due to rounding. Accordingly, fees under \$1,000 are rounded to the nearest \$10, fees between \$1,000 and \$100,000 are rounded to the nearest \$100, and fees greater than \$100,000 are rounded to the nearest \$1,000.

The proposed flat fees are applicable for certain materials licensing actions (see fee categories 1.C. through 1.D., 2.B. through 2.F., 3.A. through 3.S., 4.B. through 5.A., 6.A. through 9.D., 10.B., 15.A. through 15.L., 15.R., and 16 of § 170.31). Applications filed on or after the effective date of the FY 2024 final fee rule will be subject to the revised fees in the final rule. Since international activities are excluded from the fee recovery requirement, fees are not assessed for import and export licensing actions under 10 CFR parts 170 and 171.

FY 2024 Fee Collection—Low-Level Waste Surcharge

The NRC proposes to assess a generic low-level waste (LLW) surcharge of \$3.820 million. Disposal of LLW occurs

at commercially-operated LLW disposal facilities that are licensed by either the NRC or an Agreement State. Four existing LLW disposal facilities in the United States accept various types of LLW. All are located in Agreement States and, therefore, are regulated by an Agreement State, rather than the NRC. The NRC proposes to allocate this surcharge to its licensees based on data available in the U.S. Department of Energy’s (DOE) Manifest Information Management System. This database contains information on total LLW volumes disposed of by four generator classes: academic, industrial, medical, and utility. The ratio of waste volumes disposed of by these generator classes to total LLW volumes disposed over a period of time is used to estimate the portion of this surcharge that will be allocated to the power reactors, fuel facilities, and the materials users fee classes. The materials users fee class portion is adjusted to account for the large percentage of materials licensees that are licensed by the Agreement States rather than the NRC.

Table IV shows the allocation of the LLW surcharge and its allocation across the various fee classes.

¹ The fees collected by the NRC for Freedom of Information Act (FOIA) services and indemnity fees (financial protection required of all licensees for public liability claims at 10 CFR part 140) are subtracted from the budgeted resources amount

when calculating the 10 CFR part 170 professional hourly rate, per the guidance in OMB Circular A–25, “User Charges.” The budgeted resources for FOIA activities are allocated under the product for Information Services within the Corporate Support

business line. The budgeted resources for indemnity activities are allocated under the Licensing Actions and Research and Test Reactors products within the Operating Reactors business line.

TABLE IV—ALLOCATION OF LLW SURCHARGE, FY 2024
[Dollars in millions]

Fee classes	LLW surcharge	
	Percent	\$
Operating Power Reactors	86.9	3.320
Spent Fuel Storage/Reactor Decommissioning	0.0	0.000
Non-Power Production or Utilization Facilities	0.0	0.000
Fuel Facilities	10.4	0.397
Materials Users	2.7	0.103
Transportation	0.0	0.000
Rare Earth Facilities	0.0	0.000
Uranium Recovery	0.0	0.000
Total	100.0	3.820

FY 2024 Fee Collection—Revised Annual Fees

In accordance with SECY-05-0164, “Annual Fee Calculation Method,” the NRC rebaselines its annual fees every year. “Rebaselining” entails analyzing the budget in detail and then allocating the FY 2024 budgeted resources to various classes or subclasses of

licensees. It also includes updating the number of NRC licensees in its fee calculation methodology.

The NRC is proposing revisions to its annual fees in §§ 171.15 and 171.16 to recover approximately 100 percent of the FY 2024 budget request less the budget authority for excluded activities, the estimated amount to be recovered

through 10 CFR part 170 fees, and the assumed utilization of \$27.1 million in carryover to offset the Nuclear Reactor Safety budget.

Table V shows the proposed rebaselined fees for FY 2024 for a sample of licensee categories. The FY 2023 amounts are provided for comparison purposes.

TABLE V—REBASELINED ANNUAL FEES
[Actual dollars]

Class/category of licenses	FY 2023 final annual fee	FY 2024 proposed annual fee
Operating Power Reactors	\$5,492,000	\$5,488,000
+ Spent Fuel Storage/Reactor Decommissioning	261,000	330,000
Total, Combined Fee	5,753,000	5,818,000
Spent Fuel Storage/Reactor Decommissioning	261,000	330,000
Non-Power Production or Utilization Facilities	96,300	97,700
High Enriched Uranium Fuel Facility (Category 1.A.(1)(a))	5,156,000	6,307,000
Low Enriched Uranium Fuel Facility (Category 1.A.(1)(b))	1,747,000	2,138,000
Uranium Enrichment (Category 1.E)	2,247,000	2,748,000
UF ₆ Conversion and Deconversion Facility (Category 2.A.(1))	1,095,000	1,339,000
Basic <i>In Situ</i> Recovery Facilities (Category 2.A.(2)(b))	52,200	54,300
Typical Users:		
Radiographers (Category 3O)	37,900	43,900
All Other Specific Byproduct Material Licensees (Category 3P)	12,300	14,500
Medical Other (Category 7C)	18,000	21,400
Device/Product Safety Evaluation—Broad (Category 9A)	24,100	29,600

The work papers that support this proposed rule show in detail how the NRC allocates the budgeted resources for each class of licensees and calculates the fees.

Paragraphs a. through h. of this section describe the budgeted resources

allocated to each class of licensees and the calculations of the rebaselined fees. For more information about detailed fee calculations for each class, please consult the accompanying work papers for this proposed rule.

a. Operating Power Reactors

The NRC proposes to collect \$515.9 million in annual fees from the operating power reactors fee class in FY 2024, as shown in table VI. The FY 2023 operating power reactors fees are shown for comparison purposes.

TABLE VI—ANNUAL FEE SUMMARY CALCULATIONS FOR OPERATING POWER REACTORS
[Dollars in millions]

Summary fee calculations	FY 2023 final rule	FY 2024 proposed rule
Total budgeted resources	\$665.3	\$675.1
Less estimated 10 CFR part 170 receipts	– 158.9	– 165.3
Net 10 CFR part 171 resources	506.4	509.9

TABLE VI—ANNUAL FEE SUMMARY CALCULATIONS FOR OPERATING POWER REACTORS—Continued
[Dollars in millions]

Summary fee calculations	FY 2023 final rule	FY 2024 proposed rule
Allocated generic transportation	0.5	0.6
Allocated LLW surcharge	3.5	3.3
Billing adjustment	0.3	2.1
Total required annual fee recovery	510.7	515.9
Total operating reactors	93	94
Annual fee per operating reactor	\$5.492	\$5.488

In comparison to FY 2023, the FY 2024 proposed annual fee for the operating power reactors fee class is decreasing primarily due to the following: (1) an anticipated increase in 10 CFR part 170 estimated billings; (2) an increase in the total number of operating power reactors from 93 to 94; and (3) the assumed utilization of \$27.1 million in carryover to offset the Nuclear Reactor Safety budget. As discussed further below, the assumed utilization of carryover mitigates the proposed increase in the budgeted resources for the operating power reactors fee class.² The decrease in the proposed annual fee for the operating power reactors fee class is partially offset due to the following: (1) an increase in the budgeted resources; and (2) an increase in the 10 CFR part 171 billing adjustment.

The 10 CFR part 170 estimated billings increased primarily due to the following: (1) an anticipated increase in hours associated with the review of an increasing number of license renewal applications; and (2) an anticipated increase in new reactor licensing activities, including the review of standard design approvals, pre-application activities, and construction permits. This estimated increase is partially offset by an expected decline in the submission of topical reports. As explained above, because the NRC’s fee recovery under 10 CFR part 170 will not equal approximately 100 percent of the agency’s budget authority for the fiscal year, the NRC also assesses 10 CFR part 171 annual fees. Estimated 10 CFR part 170 billings, therefore, are inversely related to the projected annual fee for a fee class. The more the NRC estimates to collect in 10 CFR part 170 billings,

the less it estimates to collect in annual fees.

The increase in the budgeted resources for the operating power reactors fee class is primarily due to the following: (1) an increase to support new reactor licensing activities, including the review of standard design approvals, pre-application activities, and construction permits; (2) an increase to support the review of license renewal applications; and (3) an increase in the fully-costed FTE rate compared to FY 2023 due to an increase in salaries and benefits. However, the effect of the increase on the proposed annual fee for the operating power reactors fee class is offset primarily due to the assumed use of \$27.1 million in carryover to offset the Nuclear Reactor Safety budget as described in the FY 2024 budget request. The increase in budgeted resources is also mitigated by the following: (1) an expected decline in topical report submissions, guidance development, and process improvement activities; (2) a reduction in construction inspection activities due to the transition of the Vogtle Electric Generating Plant (Vogtle Unit 3) and the expected transition of Vogtle Unit 4 from construction into operation; and (3) a reduction in rulemaking activities.

The proposed annual fee is also affected by: (1) an increase in the 10 CFR part 171 billing adjustment due to the timing of invoices issued in FY 2023; and (2) an increase in the generic transportation surcharge due to an increase in the overall budgeted resources for certificates of compliance (CoCs) for the operating power reactors fee class.

The proposed fee-recoverable budgeted resources are divided equally among the 94 licensed operating power reactors, an increase of one operating power reactor compared to FY 2023 due to the proposed assessment of annual fees for Vogtle Unit 4, resulting in a proposed annual fee of \$5,488,000 per operating power reactor. Additionally, the NRC estimates that each licensed operating power reactor will be assessed

the FY 2024 spent fuel storage/reactor decommissioning proposed annual fee of \$330,000 (see Table VII and the discussion that follows). The NRC estimates that the combined FY 2024 proposed annual fee for each operating power reactor will be \$5,818,000.

Section 102(b)(3)(B)(i) of NEIMA established a cap for the annual fees charged to operating reactor licensees; under this provision, the annual fee for an operating reactor licensee, to the maximum extent practicable, shall not exceed the annual fee amount per operating reactor licensee established in the FY 2015 final fee rule (80 FR 37432; June 30, 2015), adjusted for inflation. The NRC included an estimate of the operating power reactors fee class annual fee in Appendix C, “Estimated Operating Power Reactors Annual Fee,” of the FY 2024 CBJ to increase transparency for stakeholders. The NRC developed this estimate based on the staff’s allocation of the FY 2024 CBJ to fee classes under 10 CFR part 170, and allocations within the operating power reactors fee class under 10 CFR part 171. The fee estimate included in the FY 2024 CBJ assumed 94 operating power reactors in FY 2024 and applied various data assumptions from the FY 2022 final fee rule. Based on these allocations and assumptions, the operating power reactors fee class annual fee included in the FY 2024 CBJ was estimated to be \$5.3 million, approximately \$0.6 million below the FY 2015 operating power reactors annual fee amount adjusted for inflation of \$5.9 million. Although this proposed rule is based on the FY 2024 budget request, the assumptions made between budget formulation and the development of this proposed rule have changed such that the proposed annual fee for the operating power reactor fee class is \$5.488, compared to the estimated \$5.3 million in the CBJ. However, the FY 2024 proposed annual fee of \$5,488,000 remains below the FY 2015 operating power reactors fee class annual fee amount, as adjusted for inflation.

² As explained above, the NRC is issuing this FY 2024 proposed fee rule based on the FY 2024 budget request because a full-year appropriation has not yet been enacted for FY 2024. If the enacted budget authority for FY 2024 does not include the assumed utilization of \$27.1 million in carryover to offset the Nuclear Reactor Safety budget, it is likely that the annual fee for the operating power reactors fee class could increase.

In FY 2016, the NRC amended 10 CFR 171.15 to establish a variable annual fee structure for light-water reactor (LWR) small modular reactors (SMRs) (81 FR 32617; May 24, 2016). In FY 2023, the NRC further amended § 171.5 to: (1) expand the applicability of the SMR variable fee structure to include non-LWR SMRs; and (2) establish an additional minimum fee and variable rate applicable to SMRs with a licensed thermal power rating of less than or equal to 250 megawatts-thermal (MWt) (88 FR 39120; June 15, 2023). This

revision to the SMR variable annual fee structure retained the bundled unit concept for SMRs and the approach for calculating fees for reactors, or bundled units, with licensed thermal power ratings greater than 250 MWt.

Currently, there are no operating SMRs; therefore, the NRC will not assess an annual fee in FY 2024 for this type of licensee.

b. Spent Fuel Storage/Reactor Decommissioning

The NRC proposes to collect \$41.0 million in annual fees from 10 CFR part

50 and 10 CFR part 52 power reactor licensees, and from 10 CFR part 72 licensees that do not hold a 10 CFR part 50 license or a 10 CFR part 52 combined license, to recover the budgeted resources for the spent fuel storage/reactor decommissioning fee class in FY 2024, as shown in table VII. The FY 2023 spent fuel storage/reactor decommissioning fees are shown for comparison purposes.

TABLE VII—ANNUAL FEE SUMMARY CALCULATIONS FOR SPENT FUEL STORAGE/REACTOR DECOMMISSIONING
[Dollars in millions]

Summary fee calculations	FY 2023 final rule	FY 2024 proposed rule
Total budgeted resources	\$42.9	\$51.0
Less estimated 10 CFR part 170 receipts	- 12.4	- 12.2
Net 10 CFR part 171 resources	30.5	38.8
Allocated generic transportation costs	1.6	2.0
Billing adjustments	0.0	0.2
Total required annual fee recovery	32.1	41.0
Total spent fuel storage facilities	123	124
Annual fee per facility	\$0.261	\$0.330

In comparison to FY 2023, the FY 2024 proposed annual fee for the spent fuel storage/reactor decommissioning fee class is increasing primarily due to a rise in the budgeted resources and an expected decrease in 10 CFR part 170 estimated billings. The proposed annual fee is partially offset by an increase in the number of licensees increasing from 123 to 124.

The budgeted resources increased primarily to support the following: (1) an increase in FTEs to support licensing and oversight activities for the reactor decommissioning program, which includes both power and non-power reactors in various stages of decommissioning; and (2) an increase in the fully-costed FTE rate compared to FY 2023 due to an increase in salaries and benefits.

The proposed annual fee is also increasing due to the expected decrease

in the 10 CFR part 170 estimated billings, which in turn is primarily due to the following: (1) the completion of the safety and environmental review of the Holtec HI-STORE consolidated interim storage facility application; (2) the termination of the license for the La Crosse Boiling Water Reactor; and (3) a decrease in decommissioning licensing and inspection activities at multiple sites. This decrease is expected to be partially offset by the following: (1) an increase in hours to support the staff's review of a new fuel storage system; and (2) an increase to support the staff's review of applications for renewals, amendments, exemptions, and inspections for independent spent fuel storage installation and dry cask storage CoCs at multiple sites.

The proposed increase in the annual fee is also affected by these contributing factors: (1) an increase in the generic

transportation surcharge due to an increase in the generic transportation budgeted resources for the spent fuel storage/reactor decommissioning fee class; and (2) an increase in the 10 CFR part 171 billing adjustment due to the timing of invoices in FY 2023.

The required annual fee recovery amount is divided equally among 124 licensees, an increase of one licensee compared to FY 2023 due to the proposed assessment of annual fees for Vogtle Unit 4, resulting in a proposed FY 2024 annual fee of \$330,000 per licensee.

c. Fuel Facilities

The NRC proposes to collect \$24.9 million in annual fees from the fuel facilities fee class in FY 2024, as shown in table VIII. The FY 2023 fuel facilities fees are shown for comparison purposes.

TABLE VIII—ANNUAL FEE SUMMARY CALCULATIONS FOR FUEL FACILITIES
[Dollars in millions]

Summary fee calculations	FY 2023 final rule	FY 2024 proposed rule
Total budgeted resources	\$26.6	\$32.4
Less estimated 10 CFR part 170 receipts	- 9.2	- 10.5
Net 10 CFR part 171 resources	17.4	21.9
Allocated generic transportation	1.9	2.5
Allocated LLW surcharge	0.4	0.4

TABLE VIII—ANNUAL FEE SUMMARY CALCULATIONS FOR FUEL FACILITIES—Continued
[Dollars in millions]

Summary fee calculations	FY 2023 final rule	FY 2024 proposed rule
Billing adjustments	0.0	0.1
Total remaining required annual fee recovery	\$19.7	\$24.9

In comparison to FY 2023, the FY 2024 proposed annual fee for the fuel facilities fee class is increasing primarily due to a rise in budgeted resources. This is partially offset by an expected increase in 10 CFR part 170 estimated billings. As explained above, because the NRC’s fee recovery under 10 CFR part 170 will not equal approximately 100 percent of the agency’s budget authority for the fiscal year (less the budget authority for excluded activities), the NRC also assesses 10 CFR part 171 annual fees. Estimated 10 CFR part 170 billings, therefore, are inversely related to the proposed annual fee for a fee class. The more the NRC estimates to collect in 10 CFR part 170 billings, the less it estimates to collect in annual fees. While the NRC anticipates an increase in 10 CFR part 170 estimated billings, this anticipated increase was not enough to offset the overall increase in budgetary resources in the FY 2024 budget request.

In the FY 2024 budget request, which this proposed rule is based on, the budgeted resources increased primarily to support the following: (1) the review of licensing actions related to enrichment and manufacturing of HALEU fuel and ATF; (2) the review of two fuel facility license applications; (3) the development and maintenance of licensing guidance; (4) emergency preparedness and physical security reviews for license amendments and renewals; (5) programmatic oversight activities in support for Category II fuel facilities and an anticipated new fuel facility; (6) associated fuel facilities

rulemaking activities; and (7) an increase in the fully-costed FTE rate compared to FY 2023 due to an increase in salaries and benefits. The increase in budgetary resources is partially offset due to a decline in IT services.

The proposed increase in the annual fee is also affected by these contributing factors: (1) a rise in the generic transportation surcharge due to a new CoC within the fuel facilities fee class; and (2) a surcharge in the 10 CFR part 171 billing adjustment due to the timing of invoices in FY 2023.

The proposed annual fee is partially offset by an anticipated increase in the 10 CFR part 170 estimated billings. The 10 CFR part 170 estimated billings are expected to increase primarily due to the following: (1) the continued review of the TRISO-X, LLC, fuel fabrication facility application; (2) the review of anticipated license amendment requests; and (3) the review of the National Institute of Standards and Technology’s license renewal application for possession and use of its special nuclear material. Yet, this increase is offset by the following: (1) the completion of the review of Westinghouse Electric Company, LLC’s license transfer application; (2) the near completion of the review of the Global Nuclear Fuel Americas, LLC, amendment for an increase in enrichment activities up to 8 weight percent uranium-235; (3) the delay of the submittal of Global Nuclear Fuel Americas, LLC, amendment for an increase in enrichment activities up to 20 weight percent uranium-235; and (4)

the delay of a new fuel facility application.

The NRC will continue allocating annual fees to individual fuel facility licensees based on the effort/fee determination matrix developed in the FY 1999 final fee rule (64 FR 31448; June 10, 1999). To briefly recap, the matrix groups licensees within this fee class into various fee categories. The matrix lists processes that are conducted at licensed sites and assigns effort factors for the safety and safeguards activities associated with each process (these effort levels are reflected in table IX). The annual fees are then distributed across the fee class based on the regulatory effort assigned by the matrix. The effort factors in the matrix represent regulatory effort that is not recovered through 10 CFR part 170 fees (e.g., rulemaking, guidance). Regulatory effort for activities that are subject to 10 CFR part 170 fees, such as the number of inspections, is not applicable to the effort factor.

NRC authorized the Centrus American Centrifuge Plant to begin its HALEU demonstration program operations at the Category II level on September 21, 2023. In the FY 2024 proposed fee rule, this change in operations caused the safeguard effort factors for “scrap/waste” to increase from 0 (no effort) to 1 (low effort), “enrichment” to increase from 5 (moderate effort) to 10 (high effort) and “sensitive information” to increase from 5 (moderate effort) to 10 (high effort), resulting in an increase of the safeguards efforts factors from 11 to 22 compared to the FY 2023 final fee rule.

TABLE IX—EFFORT FACTORS FOR FUEL FACILITIES, FY 2024

Facility type (fee category)	Number of facilities	Effort factors	
		Safety	Safeguards
High Enriched Uranium Fuel (1.A.(1)(a))	2	88	91
Low Enriched Uranium Fuel (1.A.(1)(b))	3	70	21
Limited Operations (1.A.(2)(a))	1	3	22
Gas Centrifuge Enrichment Demonstration (1.A.(2)(b))	0	0	0
Hot Cell (and others) (1.A.(2)(c))	0	0	0
Uranium Enrichment (1.E.)	1	16	23
UF ₆ Conversion and Deconversion (2.A.(1))	1	12	7
Total	8	189	164

In FY 2024, the total remaining amount of the proposed annual fees that the NRC estimates to be recovered, \$24.9 million, is attributable to safety activities, safeguards activities, and the LLW surcharge. For FY 2024, the total budgeted resources proposed to be recovered as annual fees for safety activities are approximately \$13.1 million. To calculate the annual fee, the NRC allocates this amount to each fee

category based on its percentage of the total regulatory effort for safety activities. Similarly, the NRC allocates the budgeted resources that the NRC estimates to be recovered as annual fees for safeguards activities, \$11.4 million, to each fee category based on its percentage of the total regulatory effort for safeguards activities. Finally, the fuel facilities fee class portion of the LLW surcharge—\$0.4 million—is

allocated to each fee category based on its percentage of the total regulatory effort for both safety and safeguards activities. The proposed annual fee per licensee is then calculated by dividing the estimated total allocated budgeted resources for the fee category by the number of licensees in that fee category. The proposed annual fee for each facility is summarized in table X.

TABLE X—ANNUAL FEES FOR FUEL FACILITIES
[Actual dollars]

Facility type (fee category)	FY 2023 final annual fee	FY 2024 proposed annual fee
High Enriched Uranium Fuel (1.A.(1)(a))	\$5,156,000	\$6,307,000
Low Enriched Uranium Fuel (1.A.(1)(b))	1,747,000	2,138,000
Facilities with limited operations (1.A.(2)(a))	807,000	1,762,000
Gas Centrifuge Enrichment Demonstration (1.A.(2)(b))	N/A	N/A
Hot Cell (and others) (1.A.(2)(c))	N/A	N/A
Uranium Enrichment (1.E.)	2,247,000	2,748,000
UF ₆ Conversion and Deconversion (2.A.(1))	1,095,000	1,339,000

d. Uranium Recovery Facilities

The NRC proposes to collect \$0.3 million in annual fees from the uranium

recovery facilities fee class in FY 2024, as shown in table XI. The FY 2023

uranium recovery facilities fees are shown for comparison purposes.

TABLE XI—ANNUAL FEE SUMMARY CALCULATIONS FOR URANIUM RECOVERY FACILITIES
[Dollars in millions]

Summary fee calculations	FY 2023 final rule	FY 2024 proposed rule
Total budgeted resources	\$0.5	\$0.7
Less estimated 10 CFR part 170 receipts	−0.3	−0.4
Net 10 CFR part 171 resources	0.2	0.3
Allocated generic transportation	N/A	N/A
Billing adjustments	0.0	0.0
Total required annual fee recovery	\$0.2	\$0.3

In comparison to FY 2023, the FY 2024 proposed annual fee for the non-DOE licensee in the uranium recovery facilities fee class is increasing primarily due to a rise in budgeted resources attributed to licensing reviews associated with one licensed uranium recovery facility and two licensed, but not yet constructed, uranium recovery facilities.

³ Congress established the two programs, Title I and Title II, under UMTRCA to protect the public and the environment from hazards associated with uranium milling. The UMTRCA Title I program is for remedial action at abandoned mill tailings sites where tailings resulted largely from production of uranium for weapons programs. The NRC also regulates DOE's UMTRCA Title II program, which is directed toward uranium mill sites licensed by the NRC or Agreement States in or after 1978.

The NRC regulates DOE's Title I and Title II activities under the Uranium Mill Tailings Radiation Control Act (UMTRCA).³ The proposed annual fee assessed to DOE includes the resources specifically budgeted for the NRC's UMTRCA Title I and Title II activities, as well as 10 percent of the remaining budgeted resources for this fee class. The NRC described the overall methodology for determining fees for UMTRCA in the FY 2002 fee rule (67 FR 42612; June 24, 2002), and the NRC continues to use this methodology. DOE's UMTRCA proposed annual fee is increasing compared to FY 2023 primarily due to a rise in budgeted resources needed to conduct generic work that the staff will be performing to resolve the following: (1) issues

associated with abandoned uranium mine waste cleanups and the potential waste disposal on or near uranium mill tailings sites including existing DOE sites under NRC oversight; (2) coordination on license termination strategies for sites; and (3) performance issues relating to existing cover systems at mill tailings sites. The proposed annual fee is partially offset by a rise in the 10 CFR part 170 estimated billings for the anticipated workload increases at various DOE UMTRCA sites. The NRC assesses the remaining 90 percent of its budgeted resources to the remaining licensee in this fee class, as described in the work papers, which is reflected in table XII.

TABLE XII—COSTS RECOVERED THROUGH ANNUAL FEES; URANIUM RECOVERY FACILITIES FEE CLASS
[Actual dollars]

Summary of costs	FY 2023 final annual fee	FY 2024 proposed annual fee
DOE Annual Fee Amount (UMTRCA Title I and Title II) General Licenses:		
UMTRCA Title I and Title II budgeted resources less 10 CFR part 170 receipts	\$142,181	\$264,606
10 percent of generic/other uranium recovery budgeted resources	5,798	6,028
10 percent of uranium recovery fee-relief adjustment	N/A	N/A
Total Annual Fee Amount for DOE (rounded)	148,000	271,000
Annual Fee Amount for Other Uranium Recovery Licenses:		
90 percent of generic/other uranium recovery budgeted resources less the amounts specifically budgeted for UMTRCA Title I and Title II activities	52,185	54,255
90 percent of uranium recovery fee-relief adjustment	N/A	N/A
Total Annual Fee Amount for Other Uranium Recovery Licensees	52,185	54,255

Further, for any non-DOE licensees, the NRC will continue using a matrix to determine the effort levels associated with conducting generic regulatory actions for the different licensees in the uranium recovery facilities fee class; this is similar to the NRC’s approach for fuel facilities, described previously. The matrix methodology for uranium

recovery licensees first identifies the licensee categories included within this fee class (excluding DOE). These categories are conventional uranium mills and heap leach facilities, uranium *in situ* recovery (ISR) and resin ISR facilities, and mill tailings disposal facilities. The matrix identifies the types of operating activities that support and

benefit these licensees, along with each activity’s relative weight (see the work papers). Currently, there is only one remaining non-DOE licensee, which is a basic ISR facility. table XIII displays the benefit factors for the non-DOE licensee in that fee category.

TABLE XIII—BENEFIT FACTORS FOR URANIUM RECOVERY LICENSES, 2024

Fee category	Number of licensees	Benefit factor per licensee	Total value	Benefit factor percent total
Conventional and Heap Leach mills (2.A.(2)(a))	0	0
Basic <i>In Situ</i> Recovery facilities (2.A.(2)(b))	1	190	190	100
Expanded <i>In Situ</i> Recovery facilities (2.A.(2)(c))	0	0
Section 11e.(2) disposal incidental to existing tailings sites (2.A.(4))	0	0
Total	1	190	190	100

The FY 2024 proposed annual fee for the remaining non-DOE licensee is calculated by allocating 100 percent of

the budgeted resources, as summarized in table XIV.

TABLE XIV—ANNUAL FEES FOR URANIUM RECOVERY LICENSEES
[Other than DOE]
[Actual dollars]

Facility type (fee category)	FY 2023 final annual fee	FY 2024 proposed annual fee
Conventional and Heap Leach mills (2.A.(2)(a))	N/A	N/A
Basic <i>In Situ</i> Recovery facilities (2.A.(2)(b))	\$52,200	\$54,300
Expanded <i>In Situ</i> Recovery facilities (2.A.(2)(c))	N/A	N/A
Section 11e.(2) disposal incidental to existing tailings sites (2.A.(4))	N/A	N/A

e. Non-Power Production or Utilization Facilities

The NRC proposes to collect \$0.293 million in annual fees from the non-

power production or utilization facilities fee class in FY 2024, as shown in table XV. The FY 2023 non-power

production or utilization facilities fees are shown for comparison purposes.

TABLE XV—ANNUAL FEE SUMMARY CALCULATIONS FOR NON-POWER PRODUCTION OR UTILIZATION FACILITIES
[Dollars in millions]

Summary fee calculations	FY 2023 final rule	FY 2024 proposed rule
Total budgeted resources	\$5.115	\$4.876
Less estimated 10 CFR part 170 receipts	-4.869	-4.648
Net 10 CFR part 171 resources	0.246	0.228
Allocated generic transportation	0.040	0.050
Billing adjustments	0.003	0.015
Total required annual fee recovery	0.289	0.293
Total non-power production or utilization facilities licenses	3	3
Total annual fee per license (rounded)	\$0.0963	\$0.0977

In comparison to FY 2023, the FY 2024 proposed annual fee for the non-power production or utilization facilities fee class is increasing, as discussed in the following paragraphs.

In FY 2024, the budgeted resources decreased primarily due to a reduction in medical radioisotope production facilities workload primarily due to a delay with the SHINE Technologies LLC’s (SHINE) operating license application for a medical radioisotope production facility and a delay in the construction schedule. The offset to the decline in budgetary resources is the rise in the fully-costed FTE rate compared to FY 2023 due to an increase in salaries and benefits.

The 10 CFR part 170 estimated billings associated with the current fleet of operating non-power production or utilization facilities licensees subject to annual fees have declined compared to FY 2023 due to a reduction in workload for license amendment activities associated with the anticipated shutdown of the General Electric Hitachi Vallecitos Nuclear Center in FY 2024. The 10 CFR part 170 estimated

billings with respect to medical radioisotope production facilities and advanced research and test reactors have declined when compared with FY 2023 primarily due to the following: (1) a reduction in staff hours due to the delay with SHINE’s operating license application and a delay in the construction schedule; and (2) the completion of the staff’s safety review of the Kairos Power, LLC’s (Kairos) application for a permit to construct the Hermes 1 test reactor. This decline in 10 CFR part 170 estimated billings is offset due to the following: (1) the staff’s review of the Kairos Hermes 2 application for a permit to construct two test reactors; and (2) conducting pre-application meetings due to the anticipated submission of several license applications.

Furthermore, the proposed increase in the annual fee is also affected by these contributing factors: (1) an increase in the 10 CFR part 171 billing adjustment due to the timing of invoices in FY 2023; and (2) an increase in the generic transportation surcharge due to an increase in the generic transportation

budgeted resources for the non-power production or utilization facilities fee class.

The annual fee recovery amount is divided equally among the three non-power production or utilization facilities licensees subject to annual fees and results in an FY 2024 proposed annual fee of \$97,700 for each licensee.

f. Rare Earth

In FY 2024, the NRC has allocated approximately \$0.2 million in budgeted resources to this fee class; however, because all the budgeted resources will be recovered through service fees assessed under 10 CFR part 170, the NRC is not proposing to assess and collect annual fees in FY 2024 for this fee class.

g. Materials Users

The NRC proposes to collect \$46.2 million in annual fees from materials users licensed under 10 CFR parts 30, 40, and 70 in FY 2023, as shown in table XVI. The FY 2023 materials users fees are shown for comparison purposes.

TABLE XVI—ANNUAL FEE SUMMARY CALCULATIONS FOR MATERIALS USERS
[Dollars in millions]

Summary fee calculations	FY 2023 final rule	FY 2024 proposed rule
Total budgeted resources for licensees not regulated by Agreement States	\$38.7	\$44.3
Less estimated 10 CFR part 170 receipts	-1.2	-0.8
Net 10 CFR part 171 resources	37.5	43.5
Allocated generic transportation	2.0	2.5
LLW surcharge	0.1	0.1
Billing adjustments	0.0	0.1
Total required annual fee recovery	\$39.7	\$46.2

The formula for calculating 10 CFR part 171 annual fees for the various categories of materials users is described in detail in the work papers. Generally,

the calculation results in a single annual fee that includes 10 CFR part 170 costs, such as amendments, renewals,

inspections, and other licensing actions specific to individual fee categories.

The total annual fee recovery of \$46.2 million for FY 2024 shown in table XVI

consists of \$36.4 million for general costs, \$9.7 million for inspection costs, and \$0.1 million for LLW costs. To equitably and fairly allocate the \$46.2 million required to be collected among approximately 2,400 diverse materials users licensees, the NRC continues to calculate the annual fees for each fee category within this class based on the 10 CFR part 170 application fees and estimated inspection costs for each fee category. Because the application fees and inspection costs are indicative of the complexity of the materials license, this approach is the methodology for allocating the generic and other regulatory costs to the diverse fee categories. This fee calculation method also considers the inspection frequency (priority), which is indicative of the safety risk and resulting regulatory costs associated with the categories of licenses.

In comparison to FY 2023, the FY 2024 proposed annual fees are increasing for all fee categories within the materials users fee class, of which 25 fee categories are increasing by approximately 14 percent to 16 percent, and 27 fee categories are increasing by approximately 17 percent to 25 percent primarily due to an increase in the budgeted resources. The budgeted resources increased due to the following: (1) an increase in licensing and oversight workload, including the expected reviews of exempt distribution

and sealed source device applications, updating licensing guidance, and the development of a regulatory guide on veterinary issues; (2) hiring actions to double encumber and train health physics staff to ensure an appropriate pipeline and knowledge management for future agency mission related activities; (3) support for rulemaking activities; (4) support for materials research activities; and (5) an increase in the fully-costed FTE rate compared to FY 2023 due to an increase in salaries and benefits.

In addition, the FY 2024 proposed annual fees are increasing due to the following: (1) an increase in generic transportation costs for materials users; (2) a decrease in the 10 CFR part 170 estimated billings for new licensing applications; (3) a decrease of 53 materials users licensees from FY 2023; and (4) an increase in the 10 CFR part 171 billing adjustment due to the timing of invoices issued in FY 2023.

A constant multiplier is established to recover the total general costs (including allocated generic transportation costs) of \$36.4 million. To derive the constant multiplier, the general cost amount is divided by the sum of all fee categories (application fee plus the inspection fee divided by inspection priority) then multiplied by the number of licensees. This calculation results in a constant multiplier of 1.26 for FY 2024. The average inspection cost is the average inspection hours for each fee category

multiplied by the professional hourly rate of \$321. The inspection priority is the interval between routine inspections, expressed in years. The inspection multiplier is established to recover the \$9.7 million in inspection costs. To derive the inspection multiplier, the inspection costs amount is divided by the sum of all fee categories (inspection fee divided by inspection priority) then multiplied by the number of licensees. This calculation results in an inspection multiplier of 1.72 for FY 2024. The unique category costs are any special costs that the NRC has budgeted for a specific category of licenses. Please see the work papers for more detail about this classification.

The proposed annual fee being assessed to each licensee also takes into account a share of approximately \$0.1 million in LLW surcharge costs allocated to the materials users fee class (see Table IV, “Allocation of LLW Surcharge, FY 2024,” of this document). The proposed annual fee for each fee category is shown in the proposed revision to § 171.16(d).

h. Transportation

The NRC proposes to collect \$2.2 million in annual fees to recover generic transportation budgeted resources in FY 2024, as shown in table XVII. The FY 2023 fees are shown for comparison purposes.

TABLE XVII—ANNUAL FEE SUMMARY CALCULATIONS FOR TRANSPORTATION
[Dollars in millions]

Summary fee calculations	FY 2023 final rule	FY 2024 proposed rule
Total budgeted resources	\$11.1	\$13.2
Less estimated 10 CFR part 170 receipts	-3.4	-3.5
Net 10 CFR part 171 resources	7.7	9.7
Less generic transportation resources	-6.0	-7.5
Billing adjustments	0.0	0.0
Total required annual fee recovery	\$1.7	\$2.2

In comparison to FY 2023, the FY 2024 proposed annual fee for the transportation fee class is increasing primarily due to an increase in the budgeted resources. This increase is partially offset by: (1) a rise in the distribution of the generic transportation resources allocated to other fee classes; and (2) an increase in the 10 CFR part 170 estimated billings.

In FY 2024, the budgeted resources increased primarily to support: (1) environmental reviews and licensing of transportation packages for ATF, the

anticipated licensing review of one transportable microreactor application, other advanced reactors fuels, and microreactors; (2) rulemaking activities; and (3) a rise in the fully-costed FTE rate compared to FY 2023 due to an increase in salaries and benefits.

The increase in the proposed annual fee is partially offset by a rise in the distribution of generic transportation resources allocated to respective other fee classes resulting from additional number of CoCs for 2024.

Furthermore, the proposed annual fee is also partially offset by an increase in

the 10 CFR part 170 estimated billings related to the review of new and amended packages.

Consistent with the policy established in the NRC’s FY 2006 final fee rule (71 FR 30722; May 30, 2006), the NRC recovers generic transportation costs unrelated to DOE by including those costs in the annual fees for licensee fee classes. The NRC continues to assess a separate annual fee under § 171.16, fee category 18.A., for DOE transportation activities. The amount of the allocated generic resources is calculated by

multiplying the percentage of total CoCs used by each fee class (and DOE) by the total generic transportation resources to be recovered.

This resource distribution to the licensee fee classes and DOE is shown in table XVIII. Note that for the non-power production or utilization facilities fee class, the NRC allocates the

distribution to only those licensees that are subject to annual fees. Although five CoCs benefit the entire non-power production or utilization facilities fee class, only three out of 30 operating non-power production or utilization facilities licensees are subject to annual fees. Consequently, the number of CoCs

used to determine the proportion of generic transportation resources allocated to annual fees for the non-power production or utilization facilities fee class has been adjusted to 0.5 so these licensees are charged a fair and equitable portion of the total fees (see the work papers).

TABLE XVIII—DISTRIBUTION OF TRANSPORTATION RESOURCES, FY 2024
[Dollars in millions]

Licensee fee class/DOE	Number of CoCs benefiting fee class or DOE	Percentage of total CoCs	Allocated generic transportation resources
Materials Users	24.0	25.4	\$2.5
Operating Power Reactors	6.0	6.4	0.6
Spent Fuel Storage/Reactor Decommissioning	19.0	20.1	1.9
Non-Power Production or Utilization Facilities	0.5	0.5	0.0
Fuel Facilities	24.0	25.4	2.5
Subtotal of Generic Transportation Resources	73.5	77.8	7.5
DOE	21.0	22.2	2.2
Total	94.5	100.0	9.7

The NRC assesses an annual fee to DOE based on the 10 CFR part 71 CoCs it holds. The NRC, therefore, does not allocate these DOE-related resources to other licensees' annual fees because these resources specifically support DOE.

FY 2024—Policy Change

The NRC is not proposing any policy changes for FY 2024.

FY 2024—Administrative Changes

The NRC is proposing 11 administrative changes in FY 2024:

1. Amend §§ 2.205(i), 15.35(c), 37.27(c)(2), 73.17(m)(1), 73.57(d)(3)(i), 110.64(e), 140.7(d), 170.12(f), and 171.19(a) by clarifying payment methods.

The NRC proposes to amend §§ 2.205(i), 15.35(c), 37.27(c)(2), 73.17(m)(1), 73.57(d)(3)(i), 110.64(e), 140.7(d), 170.12(f), and 171.19(a) to align with the U.S. Department of the Treasury's (Treasury) "No-Cash No-Check" policy. The Treasury encourages Federal agencies to use the most efficient, cost-effective, and best-suited collection and payment solutions. The Treasury's Bureau of the Fiscal Service provides central collection and payment services to agencies to maintain the financial integrity and operational efficiency of the Federal Government. The Treasury's Bureau of the Fiscal Service notified the NRC that the agency is expected to transition from paper-based collections to one or more offered electronic methods by September 30, 2024.

The "No-Cash No-Check" policy will improve timeliness of collections, thereby reducing interest/penalty/administrative fees associated with late payments, and reduce resources associated with processing paper checks. The available electronic payment options will enhance processing speed and accuracy, and adopting this policy will make consumer and business payments and remittances to agencies easier and more efficient. Accordingly, the NRC is proposing to amend §§ 2.205(i), 15.35(c), 37.27(c)(2), 73.17(m)(1), 73.57(d)(3)(i), 110.64(e), 140.7(d), 170.12(f), and 171.19(a) to revise available payment methods to remove paper forms of payment and provide that payments are to be made electronically using the methods accepted at www.Pay.gov.

2. Amend table 1 in § 170.31 to add language to 7.A, 7.A.1, 7.A.2, 7.C, 7.C.1, and 7.C.2 for clarity.

The NRC proposes to amend table 1 in § 170.31 add language to 7.A., 7.A.1, 7.A.2, 7.C, 7.C.1, and 7.C.2, to clarify with respect to 10 CFR part 170 fees that these categories also include the possession and use of source material for shielding when authorized on the same license.

3. Revise footnote 17 to table 2 in § 171.16(d) for clarity.

The NRC proposes to revise footnote 17 in table 2 paragraph (d) in § 171.16 to clarify that with respect to annual fees, medical licensees paying fees under 7.A, 7.A.1, 7.A.2, 7.B, 7.B.1, 7.B.2, 7.C, 7.C(1), or 7.C(2) are not

subject to fees under 2.B. for possession and shielding authorized on the same license.

IV. Regulatory Flexibility Certification

As required by the Regulatory Flexibility Act of 1980, as amended (RFA),⁴ the NRC has prepared a regulatory flexibility analysis related to this proposed rule. The regulatory flexibility analysis is available as indicated in the "Availability of Documents" section of this document.

V. Regulatory Analysis

Under NEIMA, the NRC is required to recover, to the maximum extent practicable, approximately 100 percent of its annual budget for FY 2024 less the budget authority for excluded activities. The NRC established fee methodology guidelines for 10 CFR part 170 in 1978 and established additional fee methodology guidelines for 10 CFR part 171 in 1986. In subsequent rulemakings, the NRC has adjusted its fees without changing the underlying principles of its fee policy to ensure that the NRC continues to comply with the statutory requirements for cost recovery.

In this proposed rule, the NRC continues this longstanding approach. Therefore, the NRC did not identify any alternatives to the current fee structure guidelines and did not prepare a regulatory analysis for this proposed rule.

⁴ 5 U.S.C. 603. The RFA, 5 U.S.C. 601–612, has been amended by the Small Business Regulatory Enforcement Fairness Act of 1996, Public Law 104–121, Title II, 110 Stat. 847 (1996).

VI. Backfitting and Issue Finality

The NRC’s backfitting provisions (which are found in the regulations at §§ 50.109, 70.76, 72.62, and 76.76) and issue finality provisions of 10 CFR part 52 do not apply to this proposed rule because these amendments do not require the modification of, or addition to: (1) systems, structures, components, or the design of a facility; (2) the design approval or manufacturing license for a facility; or (3) the procedures or organization required to design, construct, or operate a facility. As a result, this proposed rule does not constitute “backfitting” as defined in 10 CFR Ch. I or otherwise affect the issue finality of a 10 CFR part 52 approval.

VII. Plain Writing

The Plain Writing Act of 2010 (Pub. L. 111–274) requires Federal agencies to write documents in a clear, concise, and well-organized manner. The NRC wrote this document to be consistent with the Plain Writing Act, as well as the Presidential Memorandum, “Plain Language in Government Writing,” published June 10, 1998 (63 FR 31885). The NRC requests comment on this document with respect to the clarity and effectiveness of the language used.

VIII. National Environmental Policy Act

The NRC has determined that this proposed rule is the type of action described in § 51.22(c)(1). Therefore, neither an environmental impact statement nor environmental assessment has been prepared for this proposed rule.

IX. Paperwork Reduction Act

This proposed rule does not contain any new or amended collections of information subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501, *et seq.*). Existing collections of information were approved by the Office of Management and Budget, approval number 3150–0190.

Public Protection Notification

The NRC may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the document requesting or requiring the collection displays a currently valid OMB control number.

X. Voluntary Consensus Standards

The National Technology Transfer and Advancement Act of 1995, Public Law 104–113, requires that Federal agencies use technical standards that are developed or adopted by voluntary consensus standards bodies unless the use of such a standard is inconsistent with applicable law or otherwise impractical. In this proposed rule, the NRC proposes to amend the licensing, inspection, and annual fees charged to its licensees and applicants, as necessary, to recover, to the maximum extent practicable, approximately 100 percent of its annual budget for FY 2024 less the budget authority for excluded activities, as required by NEIMA. This action does not constitute the establishment of a standard that contains generally applicable requirements.

XI. Availability of Guidance

The Small Business Regulatory Enforcement Fairness Act requires all Federal agencies to prepare a written compliance guide for each rule for which the agency is required by 5 U.S.C. 604 to prepare a regulatory flexibility analysis. The NRC, in compliance with the law, prepared the “Small Entity Compliance Guide” for the FY 2023 fee rule. The compliance guide was developed when the NRC completed the small entity biennial review for FY 2023. The NRC plans to continue to use this compliance guide for FY 2024 and has relabeled the compliance guide to reflect the current FY. This compliance guide is available as indicated in the “Availability of Documents” section of this document.

XII. Public Meeting

The NRC will conduct a public meeting to describe the FY 2024 proposed rule and answer questions from the public on the proposed rule. The NRC will publish a notice of the location, time, and agenda of the meeting on the NRC’s public meeting website within 10 calendar days of the meeting. Stakeholders should monitor the NRC’s public meeting website for information about the public meeting at: <https://www.nrc.gov/public-involve/public-meetings/index.cfm>.

XIII. Availability of Documents

The documents identified in the following table are available to interested persons through one or more of the following methods, as indicated.

List of Subjects

10 CFR Part 2

Administrative practice and procedure, Antitrust, Byproduct material, Classified information, Confidential business information, Freedom of information, Environmental

protection, Hazardous waste, Nuclear energy, Nuclear materials, Nuclear power plants and reactors, Penalties, Reporting and recordkeeping requirements, Sex discrimination, Source material, Special nuclear material, Waste treatment and disposal.

10 CFR Part 15

Administrative practice and procedure, Claims, Debt collection.

10 CFR Part 37

Byproduct material, Criminal penalties, Exports, Hazardous materials

transportation, Imports, Licensed material, Nuclear materials, Penalties, Radioactive materials, Reporting and recordkeeping requirements, Security measures.

10 CFR Part 73

Criminal penalties, Exports, Hazardous materials transportation, Imports, Nuclear energy, Nuclear materials, Nuclear power plants and reactors, Penalties, Reporting and recordkeeping requirements, Security measures.

10 CFR Part 110

Administrative practice and procedure, Classified information, Criminal penalties, Exports, Intergovernmental relations, Nuclear energy, Nuclear materials, Nuclear power plants and reactors, Penalties, Reporting and recordkeeping requirements, Scientific equipment.

10 CFR Part 140

Insurance, Intergovernmental relations, Nuclear materials, Nuclear power plants and reactors, Penalties, Reporting and recordkeeping requirements.

10 CFR Part 170

Byproduct material, Import and export licenses, Intergovernmental relations, Non-payment penalties, Nuclear energy, Nuclear materials, Nuclear power plants and reactors, Source material, Special nuclear material.

10 CFR Part 171

Annual charges, Approvals, Byproduct material, Holders of certificates, Intergovernmental relations, Nonpayment penalties, Nuclear materials, Nuclear power plants and reactors, Registrations, Source material, Special nuclear material.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended; the Energy Reorganization Act of 1974, as amended; and 5 U.S.C. 552 and 553, the NRC is proposing the following amendments to 10 CFR parts 2, 15, 37, 73, 110, 140, 170 and 171:

PART 2—AGENCY RULES OF PRACTICE AND PROCEDURE

■ 1. The authority citation for part 2 continues to read as follows:

Authority: Atomic Energy Act of 1954, secs. 29, 53, 62, 63, 81, 102, 103, 104, 105, 161, 181, 182, 183, 184, 186, 189, 191, 234 (42 U.S.C. 2039, 2073, 2092, 2093, 2111, 2132, 2133, 2134, 2135, 2201, 2231, 2232, 2233, 2234, 2236, 2239, 2241, 2282); Energy Reorganization Act of 1974, secs. 201, 206

(42 U.S.C. 5841, 5846); Nuclear Waste Policy Act of 1982, secs. 114(f), 134, 135, 141 (42 U.S.C. 10134(f), 10154, 10155, 10161); Administrative Procedure Act (5 U.S.C. 552, 553, 554, 557, 558); National Environmental Policy Act of 1969 (42 U.S.C. 4332); 44 U.S.C. 3504 note. Section 2.205(j) also issued under 28 U.S.C. 2461 note.

■ 2. In § 2.205, revise paragraph (i) to read as follows.

§ 2.205 Civil Penalties.

* * * * *

(i) Except when payment is made after compromise or mitigation by the Department of Justice or as ordered by a court of the United States, following reference of the matter to the Attorney General for collection, payment of civil penalties imposed under section 234 of the Act are to be made payable to the U.S. Nuclear Regulatory Commission, in U.S. funds. The payments are to be made by electronic fund transfer using the electronic payment methods accepted at www.Pay.gov. Federal agencies may also make payments by Intra-Governmental Payment and Collection (IPAC). All payments are to be made in accordance with the specific payment instructions provided with Notices of Violation that propose civil penalties and Orders Imposing Civil Monetary Penalties.

* * * * *

PART 15—DEBT COLLECTION PROCEDURES

■ 3. The authority citation for part 15 continues to read as follows:

Authority: Atomic Energy Act of 1954, secs. 161, 186 (42 U.S.C. 2201, 2236); Energy Reorganization Act of 1974, sec. 201 (42 U.S.C. 5841); 5 U.S.C. 5514; 26 U.S.C. 6402; 31 U.S.C. 3701, 3713, 3716, 3719, 3720A; 42 U.S.C. 664; 44 U.S.C. 3504 note; 31 CFR parts 900 through 904; 31 CFR part 285; E.O. 12146, 44 FR 42657, 3 CFR, 1979 Comp., p. 409; E.O. 12988, 61 FR 4729, 3 CFR, 1996 Comp., p. 157.

■ 4. In § 15.35, revise paragraph (c) introductory text to read as follows:

§ 15.35 Payments.

* * * * *

(c) *To whom payment is made.* Payment of a debt is to be made payable to the U.S. Nuclear Regulatory Commission. The payments are to be made in U.S. funds using the electronic payment methods accepted at www.Pay.gov. Federal agencies may also make payment by Intra Governmental Payment and Collection (IPAC). Payments should be made to the U.S. Nuclear Regulatory Commission unless payment is—

* * * * *

PART 37—PHYSICAL PROTECTION OF CATEGORY 1 AND CATEGORY 2 QUANTITIES OF RADIOACTIVE MATERIAL

■ 5. The authority citation for part 37 continues to read as follows:

Authority: Atomic Energy Act of 1954, secs. 11, 53, 81, 103, 104, 147, 148, 149, 161, 182, 183, 223, 234, 274 (42 U.S.C. 2014, 2073, 2111, 2133, 2134, 2167, 2168, 2169, 2201, 2232, 2233, 2273, 2282, 2021); Energy Reorganization Act of 1974, secs. 201, 202 (42 U.S.C. 5841, 5842); 44 U.S.C. 3504 note.

■ 6. In § 37.27, revise paragraph (c)(2) to read as follows:

§ 37.27 Requirements for criminal history records checks of individuals granted unescorted access to category 1 or category 2 quantities of radioactive material.

* * * * *

(c) * * *

(2) Fees for the processing of fingerprint checks are due upon application. Licensees shall submit payment made payable to the U.S. Nuclear Regulatory Commission. The payments are to be made in U.S. funds using the electronic payment methods accepted at www.Pay.gov. For guidance on making electronic payments, contact the Division of Physical and Cyber Security Policy by emailing Crimhist.Resource@nrc.gov. Combined payment for multiple applications is acceptable. The Commission publishes the amount of the fingerprint check application fee on the NRC's public website. (To find the current fee amount, go to the Licensee Criminal History Records Checks & Firearms Background Check information page at <https://www.nrc.gov/security/chp.html> and see the link for How do I determine how much to pay for the request?)

* * * * *

PART 73—PHYSICAL PROTECTION OF PLANTS AND MATERIALS

■ 7. The authority citation for part 73 continues to read as follows:

Authority: Atomic Energy Act of 1954, secs. 53, 147, 149, 161, 161A, 170D, 170E, 170H, 170I, 223, 229, 234, 170I (42 U.S.C. 2073, 2167, 2169, 2201, 2201a, 2210d, 2210e, 2210h, 2210i, 2273, 2278a, 2282, 2297f); Energy Reorganization Act of 1974, secs. 201, 202 (42 U.S.C. 5841, 5842); Nuclear Waste Policy Act of 1982, secs. 135, 141 (42 U.S.C. 10155, 10161); 44 U.S.C. 3504 note.

Section 73.37(b)(2) also issued under Sec. 301, Public Law 96–295, 94 Stat. 789 (42 U.S.C. 5841 note).

■ 8. In § 73.17, revise paragraph (m)(1) to read as follows:

§ 73.17 Firearms background checks for armed security personnel.

* * * * *

(m) * * *

(1) Fees for the processing of firearms background checks are due upon application. The fee for the processing of a firearms background check consists of a fingerprint fee and a NICS check fee. Licensees must submit payment with the application for the processing of fingerprints, and payment must be made payable to the U.S. Nuclear Regulatory Commission. The payments are to be made in U.S. funds using the electronic payment methods accepted at www.Pay.gov. Licensees can find fee information for firearms background checks on the NRC's public website at https://www.nrc.gov/security/chp.html.

* * * * *

■ 9. In § 73.57, revise paragraph (d)(3)(i) to read as follows:

§ 73.57 Requirements for criminal history records checks of individuals granted unescorted access to a nuclear power facility, a non-power reactor, or access to Safeguards Information.

* * * * *

(d) * * *

(3) * * *

(i) Fees for the processing of fingerprint checks are due upon application. Licensees shall submit payment with the application for the processing of fingerprints, and payment must be made payable to the U.S. Nuclear Regulatory Commission. The payments are to be made in U.S. funds using the electronic payment methods accepted at www.Pay.gov. (For guidance on making payments, contact the Criminal history Program, Division of Physical and Cyber Security Policy at 301-415-7513). Combined payment for multiple applications is acceptable.

* * * * *

PART 110—EXPORT AND IMPORT OF NUCLEAR EQUIPMENT AND MATERIAL

■ 10. The authority citation for part 110 continues to read as follows:

Authority: Atomic Energy Act of 1954, secs. 11, 51, 53, 54, 57, 62, 63, 64, 65, 81, 82, 103, 104, 109, 111, 121, 122, 123, 124, 126, 127, 128, 129, 133, 134, 161, 170H, 181, 182, 183, 184, 186, 187, 189, 223, 234 (42 U.S.C. 2014, 2071, 2073, 2074, 2077, 2092, 2093, 2094, 2095, 2111, 2112, 2133, 2134, 2139, 2141, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2160c, 2160d, 2201, 2210h, 2231, 2232, 2233, 2234, 2236, 2237, 2239, 2273, 2282); Energy Reorganization Act of 1974, sec. 201 (42 U.S.C. 5841); Administrative Procedure Act (5 U.S.C. 552, 553); 42 U.S.C. 2139a, 2155a; 44 U.S.C. 3504 note. Section 110.1(b) also issued under 22 U.S.C. 2403; 22 U.S.C. 2778a; 50 App. U.S.C. 2401 et seq.

■ 11. In § 110.64, revise paragraph (e) to read as follows:

§ 110.64 Civil penalty.

* * * * *

(e) Except when the matter has been referred to the Attorney General for collection, payment of penalties shall be made in U.S. funds using the electronic payment methods accepted at www.Pay.gov.

* * * * *

PART 140—FINANCIAL PROTECTION REQUIREMENTS AND INDEMNITY AGREEMENTS

■ 12. The authority citation for part 140 continues to read as follows:

Authority: Atomic Energy Act of 1954, secs. 161, 170, 223, 234 (42 U.S.C. 2201, 2210, 2273, 2282); Energy Reorganization Act of 1974, secs. 201, 202 (42 U.S.C. 5841, 5842); 44 U.S.C. 3504 note.

■ 13. In § 140.7, revise paragraph (d) to read as follows:

§ 140.7 Fees.

* * * * *

(d) Indemnity fee payments are to be made payable to the U.S. Nuclear Regulatory Commission. The payments are to be made in U.S. funds using the electronic payment methods accepted at www.Pay.gov. Federal agencies may also make payments by Intra-Governmental Payment and Collection (IPAC). Specific instructions for making payments may

be obtained by contacting the Office of the Chief Financial Officer at 301-415-7554.

PART 170—FEES FOR FACILITIES, MATERIALS, IMPORT AND EXPORT LICENSES, AND OTHER REGULATORY SERVICES UNDER THE ATOMIC ENERGY ACT OF 1954, AS AMENDED

■ 14. The authority citation for part 170 continues to read as follows:

Authority: Atomic Energy Act of 1954, secs. 11, 161(w) (42 U.S.C. 2014, 2201(w)); Energy Reorganization Act of 1974, sec. 201 (42 U.S.C. 5841); 42 U.S.C. 2215; 31 U.S.C. 901, 902, 9701; 44 U.S.C. 3504 note.

* * * * *

■ 15. In § 170.12, revise paragraph (f) to read as follows:

§ 170.12 Payment of Fees.

* * * * *

(f) Method of payment. All fee payments under this part are to be made payable to the U.S. Nuclear Regulatory Commission. The payments are to be made in U.S. funds using the electronic payment methods accepted at www.Pay.gov. Specific instructions for making payments may be obtained by contacting the Office of the Chief Financial Officer at 301-415-7554. In accordance with Department of the Treasury requirements, refunds will only be made upon receipt of information on the payee's financial institution and bank accounts.

* * * * *

§ 170.20 [Amended]

■ 16. In § 170.20, remove the dollar amount "\$300" and add in its place the dollar amount "\$321".

■ 17. In § 170.31, revise table 1 to read as follows:

§ 170.31 Schedule of fees for materials licenses and other regulatory services, including inspections, and import and export licenses.

* * * * *

TABLE 1 TO § 170.31—SCHEDULE OF MATERIALS FEES

[See footnotes at end of table]

Table with 2 columns: Category of materials licenses and type of fees, Fees. Row 1: 1. Special nuclear material: (a) Licenses for possession and use of U-235 or plutonium for fuel fabrication activities. (a) Strategic Special Nuclear Material (High Enriched Uranium) [Program Code(s): 21213] Full Cost. (b) Low Enriched Uranium in Dispensable Form Used for Fabrication of Power Reactor Fuel [Program Code(s): 21210] Full Cost. (2) All other special nuclear materials licenses not included in Category 1.A. (1) which are licensed for fuel cycle activities. (a) Facilities with limited operations [Program Code(s): 21240, 21310, 21320] Full Cost. (b) Gas centrifuge enrichment demonstration facilities [Program Code(s): 21205] Full Cost. (c) Others, including hot cell facilities [Program Code(s): 21130, 21131, 21133] Full Cost. B. Licenses for receipt and storage of spent fuel and reactor-related Greater than Class C (GTCC) waste at an independent spent fuel storage installation (ISFSI) [Program Code(s): 23200]. Full Cost.

TABLE 1 TO § 170.31—SCHEDULE OF MATERIALS FEES—Continued

[See footnotes at end of table]

Category of materials licenses and type of fees ¹	Fees ^{2,3}
C. Licenses for possession and use of special nuclear material of less than a critical mass as defined in § 70.4 of this chapter in sealed sources contained in devices used in industrial measuring systems, including x-ray fluorescence analyzers. ⁴ Application [Program Code(s): 22140].	\$1,500.
D. All other special nuclear material licenses, except licenses authorizing special nuclear material in sealed or unsealed form in combination that would constitute a critical mass, as defined in § 70.4 of this chapter, for which the licensee shall pay the same fees as those under Category 1.A. ⁴ Application [Program Code(s): 22110, 22111, 22120, 22131, 22136, 22150, 22151, 22161, 22170, 23100, 23300, 23310].	\$3,000.
E. Licenses or certificates for construction and operation of a uranium enrichment facility ⁶ [Program Code(s): 21200]	Full Cost.
F. Licenses for possession and use of special nuclear material greater than critical mass as defined in § 70.4 of this chapter, for development and testing of commercial products, and other non-fuel-cycle activities. ^{4,6} [Program Code(s): 22155].	Full Cost.
2. Source material: ¹¹	
A. (1) Licenses for possession and use of source material for refining uranium mill concentrates to uranium hexafluoride or for deconverting uranium hexafluoride in the production of uranium oxides for disposal. ⁶ [Program Code(s): 11400].	Full Cost.
(2) Licenses for possession and use of source material in recovery operations such as milling, <i>in situ</i> recovery, heap-leaching, ore buying stations, ion-exchange facilities, and in processing of ores containing source material for extraction of metals other than uranium or thorium, including licenses authorizing the possession of byproduct waste material (tailings) from source material recovery operations, as well as licenses authorizing the possession and maintenance of a facility in a standby mode. ⁶	
(a) Conventional and Heap Leach facilities ⁶ [Program Code(s): 11100]	Full Cost.
(b) Basic <i>In Situ</i> Recovery facilities ⁶ [Program Code(s): 11500]	Full Cost.
(c) Expanded <i>In Situ</i> Recovery facilities ⁶ [Program Code(s): 11510]	Full Cost.
(d) <i>In Situ</i> Recovery Resin facilities ⁶ [Program Code(s): 11550]	Full Cost.
(e) Resin Toll Milling facilities ⁶ [Program Code(s): 11555]	Full Cost.
(f) Other facilities ⁶ [Program Code(s): 11700]	Full Cost.
(3) Licenses that authorize the receipt of byproduct material, as defined in section 11e.(2) of the Atomic Energy Act, from other persons for possession and disposal, except those licenses subject to the fees in Category 2.A.(2) or Category 2.A.(4) ⁶ [Program Code(s): 11600, 12000].	Full Cost.
(4) Licenses that authorize the receipt of byproduct material, as defined in section 11e.(2) of the Atomic Energy Act, from other persons for possession and disposal incidental to the disposal of the uranium waste tailings generated by the licensee's milling operations, except those licenses subject to the fees in Category 2.A.(2) ⁶ [Program Code(s): 12010].	Full Cost.
B. Licenses which authorize the possession, use, and/or installation of source material for shielding. ^{7,8} Application [Program Code(s): 11210].	\$1,400.
C. Licenses to distribute items containing source material to persons exempt from the licensing requirements of part 40 of this chapter. Application [Program Code(s): 11240].	\$6,900.
D. Licenses to distribute source material to persons generally licensed under part 40 of this chapter. Application [Program Code(s): 11230, 11231].	\$3,200.
E. Licenses for possession and use of source material for processing or manufacturing of products or materials containing source material for commercial distribution. Application [Program Code(s): 11710].	\$3,100.
F. All other source material licenses. Application [Program Code(s): 11200, 11220, 11221, 11300, 11800, 11810, 11820] ...	\$3,100.
3. Byproduct material: ¹¹	
A. Licenses of broad scope for the possession and use of byproduct material issued under parts 30 and 33 of this chapter for processing or manufacturing of items containing byproduct material for commercial distribution. Number of locations of use: 1–5. Application [Program Code(s): 03211, 03212, 03213].	\$15,000.
(1). Licenses of broad scope for the possession and use of byproduct material issued under parts 30 and 33 of this chapter for processing or manufacturing of items containing byproduct material for commercial distribution. Number of locations of use: 6–20. Application [Program Code(s): 04010, 04012, 04014].	\$20,000.
(2). Licenses of broad scope for the possession and use of byproduct material issued under parts 30 and 33 of this chapter for processing or manufacturing of items containing byproduct material for commercial distribution. Number of locations of use: more than 20. Application [Program Code(s): 04011, 04013, 04015].	\$25,000.
B. Other licenses for possession and use of byproduct material issued under part 30 of this chapter for processing or manufacturing of items containing byproduct material for commercial distribution. Number of locations of use: 1–5. Application [Program Code(s): 03214, 03215, 22135, 22162].	\$4,100.
(1). Other licenses for possession and use of byproduct material issued under part 30 of this chapter for processing or manufacturing of items containing byproduct material for commercial distribution. Number of locations of use: 6–20. Application [Program Code(s): 04110, 04112, 04114, 04116].	\$5,500.
(2). Other licenses for possession and use of byproduct material issued under part 30 of this chapter for processing or manufacturing of items containing byproduct material for commercial distribution. Number of locations of use: more than 20. Application [Program Code(s): 04111, 04113, 04115, 04117].	\$6,900.
C. Licenses issued under §§ 32.72 and/or 32.74 of this chapter that authorize the processing or manufacturing and distribution or redistribution of radiopharmaceuticals, generators, reagent kits, and/or sources and devices containing byproduct material. This category does not apply to licenses issued to nonprofit educational institutions whose processing or manufacturing is exempt under § 170.11(a)(4). Number of locations of use: 1–5. Application [Program Code(s): 02500, 02511, 02513].	\$6,000.
(1). Licenses issued under §§ 32.72 and/or 32.74 of this chapter that authorize the processing or manufacturing and distribution or redistribution of radiopharmaceuticals, generators, reagent kits, and/or sources and devices containing byproduct material. This category does not apply to licenses issued to nonprofit educational institutions whose processing or manufacturing is exempt under § 170.11(a)(4). Number of locations of use: 6–20. Application [Program Code(s): 04210, 04212, 04214].	\$8,000.

TABLE 1 TO § 170.31—SCHEDULE OF MATERIALS FEES—Continued

[See footnotes at end of table]

Category of materials licenses and type of fees ¹	Fees ^{2,3}
(2). Licenses issued under §§ 32.72 and/or 32.74 of this chapter that authorize the processing or manufacturing and distribution or redistribution of radiopharmaceuticals, generators, reagent kits, and/or sources and devices containing byproduct material. This category does not apply to licenses issued to nonprofit educational institutions whose processing or manufacturing is exempt under § 170.11(a)(4). Number of locations of use: more than 20. Application [Program Code(s): 04211, 04213, 04215].	\$10,000.
D. [Reserved]	N/A.
E. Licenses for possession and use of byproduct material in sealed sources for irradiation of materials in which the source is not removed from its shield (self-shielded units). Application [Program Code(s): 03510, 03520].	\$3,700.
F. Licenses for possession and use of less than or equal to 10,000 curies of byproduct material in sealed sources for irradiation of materials in which the source is exposed for irradiation purposes. This category also includes underwater irradiators for irradiation of materials where the source is not exposed for irradiation purposes. Application [Program Code(s): 03511].	\$7,500.
G. Licenses for possession and use of greater than 10,000 curies of byproduct material in sealed sources for irradiation of materials in which the source is exposed for irradiation purposes. This category also includes underwater irradiators for irradiation of materials where the source is not exposed for irradiation purposes. Application [Program Code(s): 03521].	\$71,700.
H. Licenses issued under subpart A of part 32 of this chapter to distribute items containing byproduct material that require device review to persons exempt from the licensing requirements of part 30 of this chapter. The category does not include specific licenses authorizing redistribution of items that have been authorized for distribution to persons exempt from the licensing requirements of part 30 of this chapter. Application [Program Code(s): 03254, 03255, 03257].	\$7,700.
I. Licenses issued under subpart A of part 32 of this chapter to distribute items containing byproduct material or quantities of byproduct material that do not require device evaluation to persons exempt from the licensing requirements of part 30 of this chapter. This category does not include specific licenses authorizing redistribution of items that have been authorized for distribution to persons exempt from the licensing requirements of part 30 of this chapter. Application [Program Code(s): 03250, 03251, 03253, 03256].	\$11,800.
J. Licenses issued under subpart B of part 32 of this chapter to distribute items containing byproduct material that require sealed source and/or device review to persons generally licensed under part 31 of this chapter. This category does not include specific licenses authorizing redistribution of items that have been authorized for distribution to persons generally licensed under part 31 of this chapter. Application [Program Code(s): 03240, 03241, 03243].	\$2,300.
K. Licenses issued under subpart B of part 32 of this chapter to distribute items containing byproduct material or quantities of byproduct material that do not require sealed source and/or device review to persons generally licensed under part 31 of this chapter. This category does not include specific licenses authorizing redistribution of items that have been authorized for distribution to persons generally licensed under part 31 of this chapter. Application [Program Code(s): 03242, 03244].	\$1,300.
L. Licenses of broad scope for possession and use of byproduct material issued under parts 30 and 33 of this chapter for research and development that do not authorize commercial distribution. Number of locations of use: 1–5. Application [Program Code(s): 01100, 01110, 01120, 03610, 03611, 03612, 03613].	\$6,300.
(1) Licenses of broad scope for possession and use of byproduct material issued under parts 30 and 33 of this chapter for research and development that do not authorize commercial distribution. Number of locations of use: 6–20. Application [Program Code(s): 04610, 04612, 04614, 04616, 04618, 04620, 04622].	\$8,400.
(2) Licenses of broad scope for possession and use of byproduct material issued under parts 30 and 33 of this chapter for research and development that do not authorize commercial distribution. Number of locations of use: more than 20. Application [Program Code(s): 04611, 04613, 04615, 04617, 04619, 04621, 04623].	\$10,500.
M. Other licenses for possession and use of byproduct material issued under part 30 of this chapter for research and development that do not authorize commercial distribution. Application [Program Code(s): 03620].	\$9,600.
N. Licenses that authorize services for other licensees, except:	
(1) Licenses that authorize only calibration and/or leak testing services are subject to the fees specified in fee Category 3.P.; and	
(2) Licenses that authorize waste disposal services are subject to the fees specified in fee Categories 4.A., 4.B., and 4.C. ¹³ Application [Program Code(s): 03219, 03225, 03226].	\$10,300.
O. Licenses for possession and use of byproduct material issued under part 34 of this chapter for industrial radiography operations. Number of locations of use: 1–5. Application [Program Code(s): 03310, 03320].	\$11,700.
(1). Licenses for possession and use of byproduct material issued under part 34 of this chapter for industrial radiography operations. Number of locations of use: 6–20. Application [Program Code(s): 04310, 04312].	\$15,500.
(2). Licenses for possession and use of byproduct material issued under part 34 of this chapter for industrial radiography operations. Number of locations of use: more than 20. Application [Program Code(s): 04311, 04313].	\$19,500.
P. All other specific byproduct material licenses, except those in Categories 4.A. through 9.D. ⁹ Number of locations of use: 1–5. Application [Program Code(s): 02400, 02410, 03120, 03121, 03122, 03123, 03124, 03130, 03140, 03220, 03221, 03222, 03800, 03810, 22130].	\$7,900.
(1). All other specific byproduct material licenses, except those in Categories 4.A. through 9.D. ⁹ Number of locations of use: 6–20. Application [Program Code(s): 04410, 04412, 04414, 04416, 04418, 04420, 04422, 04424, 04426, 04428, 04430, 04432, 04434, 04436, 04438].	\$10,600.
(2). All other specific byproduct material licenses, except those in Categories 4.A. through 9.D. ⁹ Number of locations of use: more than 20. Application [Program Code(s): 04411, 04413, 04415, 04417, 04419, 04421, 04423, 04425, 04427, 04429, 04431, 04433, 04435, 04437, 04439].	\$13,200.
Q. Registration of a device(s) generally licensed under part 31 of this chapter.	
Registration	\$2,200.
R. Possession of items or products containing radium-226 identified in § 31.12 of this chapter which exceed the number of items or limits specified in that section. ⁵	
1. Possession of quantities exceeding the number of items or limits in § 31.12(a)(4) or (5) of this chapter but less than or equal to 10 times the number of items or limits specified. Application [Program Code(s): 02700].	\$3,000.

TABLE 1 TO § 170.31—SCHEDULE OF MATERIALS FEES—Continued

[See footnotes at end of table]

Category of materials licenses and type of fees ¹	Fees ^{2,3}
2. Possession of quantities exceeding 10 times the number of items or limits specified in § 31.12(a)(4) or (5) of this chapter. Application [Program Code(s): 02710].	\$2,900.
S. Licenses for production of accelerator-produced radionuclides. Application [Program Code(s): 03210]	\$16,400.
4. Waste disposal and processing: ¹¹	
A. Licenses specifically authorizing the receipt of waste byproduct material, source material, or special nuclear material from other persons for the purpose of contingency storage or commercial land disposal by the licensee; or licenses authorizing contingency storage of low-level radioactive waste at the site of nuclear power reactors; or licenses for receipt of waste from other persons for incineration or other treatment, packaging of resulting waste and residues, and transfer of packages to another person authorized to receive or dispose of waste material. Application [Program Code(s): 03231, 03233, 03236, 06100, 06101].	Full Cost.
B. Licenses specifically authorizing the receipt of waste byproduct material, source material, or special nuclear material from other persons for the purpose of packaging or repackaging the material. The licensee will dispose of the material by transfer to another person authorized to receive or dispose of the material. Application [Program Code(s): 03234].	\$8,000.
C. Licenses specifically authorizing the receipt of prepackaged waste byproduct material, source material, or special nuclear material from other persons. The licensee will dispose of the material by transfer to another person authorized to receive or dispose of the material. Application [Program Code(s): 03232].	\$5,800.
5. Well logging: ¹¹	
A. Licenses for possession and use of byproduct material, source material, and/or special nuclear material for well logging, well surveys, and tracer studies other than field flooding tracer studies. Application [Program Code(s): 03110, 03111, 03112].	\$5,300.
B. Licenses for possession and use of byproduct material for field flooding tracer studies. Licensing [Program Code(s): 03113].	Full Cost.
6. Nuclear laundries: ¹¹	
A. Licenses for commercial collection and laundry of items contaminated with byproduct material, source material, or special nuclear material. Application [Program Code(s): 03218].	\$25,600.
7. Medical licenses: ¹¹	
A. Licenses issued under parts 30, 35, 40, and 70 of this chapter for human use of byproduct material, source material, or special nuclear material in sealed sources contained in gamma stereotactic radiosurgery units, teletherapy devices, or similar beam therapy devices. This category also includes the possession and use of source material for shielding when authorized on the same license. Number of locations of use: 1–5. Application [Program Code(s): 02300, 02310].	\$12,900.
(1). Licenses issued under parts 30, 35, 40, and 70 of this chapter for human use of byproduct material, source material, or special nuclear material in sealed sources contained in gamma stereotactic radiosurgery units, teletherapy devices, or similar beam therapy devices. This category also includes the possession and use of source material for shielding when authorized on the same license. Number of locations of use: 6–20. Application [Program Code(s): 04510, 04512].	\$17,100.
(2). Licenses issued under parts 30, 35, 40, and 70 of this chapter for human use of byproduct material, source material, or special nuclear material in sealed sources contained in gamma stereotactic radiosurgery units, teletherapy devices, or similar beam therapy devices. This category also includes the possession and use of source material for shielding when authorized on the same license. Number of locations of use: more than 20. Application [Program Code(s): 04511, 04513].	\$21,300.
B. Licenses of broad scope issued to medical institutions or two or more physicians under parts 30, 33, 35, 40, and 70 of this chapter authorizing research and development, including human use of byproduct material, except licenses for byproduct material, source material, or special nuclear material in sealed sources contained in teletherapy devices. This category also includes the possession and use of source material for shielding when authorized on the same license. Number of locations of use: 1–5. Application [Program Code(s): 02110].	\$10,000.
(1). Licenses of broad scope issued to medical institutions or two or more physicians under parts 30, 33, 35, 40, and 70 of this chapter authorizing research and development, including human use of byproduct material, except licenses for byproduct material, source material, or special nuclear material in sealed sources contained in teletherapy devices. This category also includes the possession and use of source material for shielding when authorized on the same license. Number of locations of use: 6–20. Application [Program Code(s): 04710].	\$13,300.
(2). Licenses of broad scope issued to medical institutions or two or more physicians under parts 30, 33, 35, 40, and 70 of this chapter authorizing research and development, including human use of byproduct material, except licenses for byproduct material, source material, or special nuclear material in sealed sources contained in teletherapy devices. This category also includes the possession and use of source material for shielding when authorized on the same license. Number of locations of use: more than 20. Application [Program Code(s): 04711].	\$16,600.
C. Other licenses issued under parts 30, 35, 40, and 70 of this chapter for human use of byproduct material, source material, and/or special nuclear material, except licenses for byproduct material, source material, or special nuclear material in sealed sources contained in teletherapy devices. This category also includes the possession and use of source material for shielding when authorized on the same license. ¹⁰ Number of locations of use: 1–5. Application [Program Code(s): 02120, 02121, 02200, 02201, 02210, 02220, 02230, 02231, 02240, 22160].	\$11,000.
(1). Other licenses issued under parts 30, 35, 40, and 70 of this chapter for human use of byproduct material, source material, and/or special nuclear material, except licenses for byproduct material, source material, or special nuclear material in sealed sources contained in teletherapy devices. This category also includes the possession and use of source material for shielding when authorized on the same license. ¹⁰ Number of locations of use: 6–20. Application [Program Code(s): 04810, 04812, 04814, 04816, 04818, 04820, 04822, 04824, 04826, 04828].	\$14,600.
(2). Other licenses issued under parts 30, 35, 40, and 70 of this chapter for human use of byproduct material, source material, and/or special nuclear material, except licenses for byproduct material, source material, or special nuclear material in sealed sources contained in teletherapy devices. This category also includes the possession and use of source material for shielding when authorized on the same license. ¹⁰ Number of locations of use: more than 20. Application [Program Code(s): 04811, 04813, 04815, 04817, 04819, 04821, 04823, 04825, 04827, 04829].	\$18,300.

TABLE 1 TO § 170.31—SCHEDULE OF MATERIALS FEES—Continued

[See footnotes at end of table]

Category of materials licenses and type of fees ¹	Fees ^{2,3}
8. Civil defense: ¹¹	
A. Licenses for possession and use of byproduct material, source material, or special nuclear material for civil defense activities. Application [Program Code(s): 03710].	\$3,000.
9. Device, product, or sealed source safety evaluation:	
A. Safety evaluation of devices or products containing byproduct material, source material, or special nuclear material, except reactor fuel devices, for commercial distribution. Application—each device.	\$23,500.
B. Safety evaluation of devices or products containing byproduct material, source material, or special nuclear material manufactured in accordance with the unique specifications of, and for use by, a single applicant, except reactor fuel devices. Application—each device.	\$10,400.
C. Safety evaluation of sealed sources containing byproduct material, source material, or special nuclear material, except reactor fuel, for commercial distribution. Application—each source.	\$6,100.
D. Safety evaluation of sealed sources containing byproduct material, source material, or special nuclear material, manufactured in accordance with the unique specifications of, and for use by, a single applicant, except reactor fuel. Application—each source.	\$1,200.
10. Transportation of radioactive material:	
A. Evaluation of casks, packages, and shipping containers.	
1. Spent Fuel, High-Level Waste, and plutonium air packages	Full Cost.
2. Other Casks	Full Cost.
B. Quality assurance program approvals issued under part 71 of this chapter.	
1. Users and Fabricators.	
Application	\$4,500.
Inspections	Full Cost.
2. Users.	
Application	\$4,500.
Inspections	Full Cost.
C. Evaluation of security plans, route approvals, route surveys, and transportation security devices (including immobilization devices).	Full Cost.
11. Review of standardized spent fuel facilities	Full Cost.
12. Special projects: Including approvals, pre-application/licensing activities, and inspections. Application [Program Code: 25110].	Full Cost.
13. A. Spent fuel storage cask Certificate of Compliance	Full Cost.
B. Inspections related to storage of spent fuel under § 72.210 of this chapter	Full Cost.
14. Decommissioning/Reclamation ¹¹	
A. Byproduct, source, or special nuclear material licenses and other approvals authorizing decommissioning, decontamination, reclamation, or site restoration activities under parts 30, 40, 70, 72, and 76 of this chapter, including master materials licenses (MMLs). The transition to this fee category occurs when a licensee has permanently ceased principal activities. [Program Code(s): 03900, 11900, 21135, 21215, 21325, 22200].	Full Cost.
B. Site-specific decommissioning activities associated with unlicensed sites, including MMLs, regardless of whether or not the sites have been previously licensed.	Full Cost.
15. Import and Export licenses: ¹²	
Licenses issued under part 110 of this chapter for the import and export only of special nuclear material, source material, tritium and other byproduct material, and the export only of heavy water, or nuclear grade graphite (fee categories 15.A. through 15.E.).	
A. Application for export or import of nuclear materials, including radioactive waste requiring Commission and Executive Branch review, for example, those actions under § 110.40(b) of this chapter. Application—new license, or amendment; or license exemption request.	N/A.
B. Application for export or import of nuclear material, including radioactive waste, requiring Executive Branch review, but not Commission review. This category includes applications for the export and import of radioactive waste and requires the NRC to consult with domestic host state authorities (<i>i.e.</i> , Low-Level Radioactive Waste Compact Commission, the U.S. Environmental Protection Agency, etc.). Application—new license, or amendment; or license exemption request.	N/A.
C. Application for export of nuclear material, for example, routine reloads of low enriched uranium reactor fuel and/or natural uranium source material requiring the assistance of the Executive Branch to obtain foreign government assurances. Application—new license, or amendment; or license exemption request.	N/A.
D. Application for export or import of nuclear material not requiring Commission or Executive Branch review, or obtaining foreign government assurances. Application—new license, or amendment; or license exemption request.	N/A.
E. Minor amendment of any active export or import license, for example, to extend the expiration date, change domestic information, or make other revisions which do not involve any substantive changes to license terms and conditions or to the type/quantity/chemical composition of the material authorized for export and, therefore, do not require in-depth analysis, review, or consultations with other Executive Branch, U.S. host state, or foreign government authorities. Minor amendment.	N/A.
Licenses issued under part 110 of this chapter for the import and export only of Category 1 and Category 2 quantities of radioactive material listed in appendix P to part 110 of this chapter (fee categories 15.F. through 15.R.).	
<i>Category 1 (Appendix P, 10 CFR Part 110) Exports:</i>	
F. Application for export of appendix P Category 1 materials requiring Commission review (<i>e.g.</i> , exceptional circumstance review under § 110.42(e)(4) of this chapter) and to obtain one government-to-government consent for this process. For additional consent see fee category 15.I. Application—new license, or amendment; or license exemption request.	N/A.
G. Application for export of appendix P Category 1 materials requiring Executive Branch review and to obtain one government-to-government consent for this process. For additional consents see fee category 15.I. Application—new license, or amendment; or license exemption request.	N/A.

TABLE 1 TO § 170.31—SCHEDULE OF MATERIALS FEES—Continued

[See footnotes at end of table]

Category of materials licenses and type of fees ¹	Fees ^{2,3}
H. Application for export of appendix P Category 1 materials and to obtain one government-to-government consent for this process. For additional consents see fee category 15.I. Application—new license, or amendment; or license exemption request.	N/A.
I. Requests for each additional government-to-government consent in support of an export license application or active export license. Application—new license, or amendment; or license exemption request.	N/A.
<i>Category 2 (Appendix P, 10 CFR Part 110) Exports:</i>	
J. Application for export of appendix P Category 2 materials requiring Commission review (e.g., exceptional circumstance review under § 110.42(e)(4) of this chapter). Application—new license, or amendment; or license exemption request.	N/A.
K. Applications for export of appendix P Category 2 materials requiring Executive Branch review. Application—new license, or amendment; or license exemption request.	N/A.
L. Application for the export of Category 2 materials. Application—new license, or amendment; or license exemption request.	N/A.
M. [Reserved]	N/A.
N. [Reserved]	N/A.
O. [Reserved]	N/A.
P. [Reserved]	N/A.
Q. [Reserved]	N/A.
<i>Minor Amendments (Category 1 and 2, Appendix P, 10 CFR Part 110, Export):</i>	
R. Minor amendment of any active export license, for example, to extend the expiration date, change domestic information, or make other revisions which do not involve any substantive changes to license terms and conditions or to the type/quantity/chemical composition of the material authorized for export and, therefore, do not require in-depth analysis, review, or consultations with other Executive Branch, U.S. host state, or foreign authorities. Minor amendment.	N/A.
16. Reciprocity: Agreement State licensees who conduct activities under the reciprocity provisions of § 150.20 of this chapter. Application.	\$3,900.
17. Master materials licenses of broad scope issued to Government agencies. Application [Program Code(s): 03614]	Full Cost.
18. Department of Energy.	
A. Certificates of Compliance. Evaluation of casks, packages, and shipping containers (including spent fuel, high-level waste, and other casks, and plutonium air packages).	Full Cost.
B. Uranium Mill Tailings Radiation Control Act (UMTRCA) activities	Full Cost.

¹ *Types of fees*—Separate charges, as shown in the schedule, will be assessed for pre-application consultations and reviews; applications for new licenses, approvals, or license terminations; possession-only licenses; issuances of new licenses and approvals; certain amendments and renewals to existing licenses and approvals; safety evaluations of sealed sources and devices; generally licensed device registrations; and certain inspections. The following guidelines apply to these charges:

(1) *Application and registration fees.* Applications for new materials licenses and export and import licenses; applications to reinstate expired, terminated, or inactive licenses, except those subject to fees assessed at full costs; applications filed by Agreement State licensees to register under the general license provisions of 10 CFR 150.20; and applications for amendments to materials licenses that would place the license in a higher fee category or add a new fee category must be accompanied by the prescribed application fee for each category.

(i) Applications for licenses covering more than one fee category of special nuclear material or source material must be accompanied by the prescribed application fee for the highest fee category.

(ii) Applications for new licenses that cover both byproduct material and special nuclear material in sealed sources for use in gauging devices will pay the appropriate application fee for fee category 1.C. only.

(2) *Licensing fees.* Fees for reviews of applications for new licenses, renewals, and amendments to existing licenses, pre-application consultations and other documents submitted to the NRC for review, and project manager time for fee categories subject to full cost fees are due upon notification by the Commission in accordance with § 170.12(b).

(3) *Amendment fees.* Applications for amendments to export and import licenses must be accompanied by the prescribed amendment fee for each license affected. An application for an amendment to an export or import license or approval classified in more than one fee category must be accompanied by the prescribed amendment fee for the category affected by the amendment, unless the amendment is applicable to two or more fee categories, in which case the amendment fee for the highest fee category would apply.

(4) *Inspection fees.* Inspections resulting from investigations conducted by the Office of Investigations and nonroutine inspections that result from third-party allegations are not subject to fees. Inspection fees are due upon notification by the Commission in accordance with § 170.12(c).

(5) *Generally licensed device registrations under 10 CFR 31.5.* Submittals of registration information must be accompanied by the prescribed fee.

² Fees will be charged for approvals issued under a specific exemption provision of the Commission's regulations under title 10 of the *Code of Federal Regulations* (e.g., 10 CFR 30.11, 40.14, 70.14, 73.5, and any other sections in effect now or in the future), regardless of whether the approval is in the form of a license amendment, letter of approval, safety evaluation report, or other form. In addition to the fee shown, an applicant may be assessed an additional fee for sealed source and device evaluations as shown in fee categories 9.A. through 9.D.

³ Full cost fees will be determined based on the professional staff time multiplied by the appropriate professional hourly rate established in § 170.20 in effect when the service is provided, and the appropriate contractual support services expended.

⁴ Licensees paying fees under categories 1.A., 1.B., and 1.E. are not subject to fees under categories 1.C., 1.D. and 1.F. for sealed sources authorized in the same license, except for an application that deals only with the sealed sources authorized by the license.

⁵ Persons who possess radium sources that are used for operational purposes in another fee category are not also subject to the fees in this category. (This exception does not apply if the radium sources are possessed for storage only.)

⁶ Licensees subject to fees under fee categories 1.A., 1.B., 1.E., or 2.A. must pay the largest applicable fee and are not subject to additional fees listed in this table.

⁷ Licensees paying fees under 3.C., 3.C.1, or 3.C.2 are not subject to fees under 2.B. for possession and shielding authorized on the same license.

⁸ Licensees paying fees under 7.C. are not subject to fees under 2.B. for possession and shielding authorized on the same license.

⁹ Licensees paying fees under 3.N. are not subject to paying fees under 3.P., 3.P.1, or 3.P.2 for calibration or leak testing services authorized on the same license.

¹⁰ Licensees paying fees under 7.B., 7.B.1, or 7.B.2 are not subject to paying fees under 7.C., 7.C.1, or 7.C.2. for broad scope licenses issued under parts 30, 35, 40, and 70 of this chapter for human use of byproduct material, source material, and/or special nuclear material, except licenses for byproduct material, source material, or special nuclear material in sealed sources contained in teletherapy devices authorized on the same license.

¹¹ A materials license (or part of a materials license) that transitions to fee category 14.A is assessed full-cost fees under 10 CFR part 170, but is not assessed an annual fee under 10 CFR part 171. If only part of a materials license is transitioned to fee category 14.A, the licensee may be charged annual fees (and any applicable 10 CFR part 170 fees) for other activities authorized under the license that are not in decommissioning status.

¹² Because the resources for import and export licensing activities are identified as a fee-relief activity to be excluded from the fee-recoverable budget, import and export licensing actions will not incur fees.

¹³ Licensees paying fees under 4.A., 4.B. or 4.C. are not subject to paying fees under 3.N. licenses that authorize services for other licensees authorized on the same license.

PART 171—ANNUAL FEES FOR REACTOR LICENSES AND FUEL CYCLE LICENSES AND MATERIALS LICENSES, INCLUDING HOLDERS OF CERTIFICATES OF COMPLIANCE, REGISTRATIONS, AND QUALITY ASSURANCE PROGRAM APPROVALS AND GOVERNMENT AGENCIES LICENSED BY THE NRC

■ 18. The authority citation for part 171 continues to read as follows:

Authority: Atomic Energy Act of 1954, secs. 11, 161(w), 223, 234 (42 U.S.C. 2014, 2201(w), 2273, 2282); Energy Reorganization Act of 1974, sec. 201 (42 U.S.C. 5841); 42 U.S.C. 2215; 44 U.S.C. 3504 note.

■ 19. In § 171.15, revise paragraphs (b)(1), (b)(2) introductory text, (c)(1), (c)(2) introductory text, and paragraph (e) to read as follows:

§ 171.15 Annual fees: Non-power production or utilization licenses, reactor licenses, and independent spent fuel storage licenses.

* * * * *

(b)(1) The FY 2024 annual fee for each operating power reactor that must be collected by September 30, 2024, is \$5,488,000.

(2) The FY 2024 annual fees are comprised of a base annual fee for power reactors licensed to operate, a base spent fuel storage/reactor decommissioning annual fee and

associated additional charges. The activities comprising the spent fuel storage/reactor decommissioning base annual fee are shown in paragraphs (c)(2)(i) and (ii) of this section. The activities comprising the FY 2024 base annual fee for operating power reactors are as follows:

* * * * *

(c)(1) The FY 2024 annual fee for each power reactor holding a 10 CFR part 50 license or combined license issued under 10 CFR part 52 that is in a decommissioning or possession-only status and has spent fuel onsite, and for each independent spent fuel storage 10 CFR part 72 licensee who does not hold a 10 CFR part 50 license or a 10 CFR part 52 combined license, is \$330,000.

(2) The FY 2024 annual fee is comprised of a base spent fuel storage/reactor decommissioning annual fee (which is also included in the operating power reactor annual fee shown in paragraph (b) of this section). The activities comprising the FY 2024 spent fuel storage/reactor decommissioning rebaselined annual fee are:

* * * * *

(e) The FY 2024 annual fee for licensees authorized to operate one or more non-power production or utilization facilities under a single 10 CFR part 50 license, unless the reactor

is exempted from fees under § 171.11(b), is \$97,700.

■ 20. In § 171.16, revise paragraphs (b) introductory text, (c), and (d) to read as follows:

§ 171.16 Annual fees: Materials licensees, holders of certificates of compliance, holders of sealed source and device registrations, holders of quality assurance program approvals, and government agencies licensed by the NRC.

* * * * *

(b) The FY 2024 annual fee is comprised of a base annual fee and associated additional charges. The base FY 2024 annual fee is the sum of budgeted costs for the following activities:

* * * * *

(c) A licensee who is required to pay an annual fee under this section, in addition to 10 CFR part 72 licenses, may qualify as a small entity. If a licensee qualifies as a small entity and provides the Commission with the proper certification along with its annual fee payment, the licensee may pay reduced annual fees as shown in table 1 to this paragraph (c). Failure to file a small entity certification in a timely manner could result in the receipt of a delinquent invoice requesting the outstanding balance due and/or denial of any refund that might otherwise be due. The small entity fees are as follows:

TABLE 1 TO PARAGRAPH (c)

NRC small entity classification	Maximum annual fee per licensed category
Small Businesses Not Engaged in Manufacturing (Average gross receipts over the last 5 completed fiscal years):	
\$555,000 to \$8 million	\$5,200
Less than \$555,000	1,000
Small Not-For-Profit Organizations (Annual Gross Receipts):	
\$555,000 to \$8 million	5,200
Less than \$555,000	1,000
Manufacturing Entities that Have an Average of 500 Employees or Fewer:	
35 to 500 employees	5,200
Fewer than 35 employees	1,000
Small Governmental Jurisdictions (Including publicly supported educational institutions) (Population):	
20,000 to 49,999	5,200
Fewer than 20,000	1,000
Educational Institutions that are not State or Publicly Supported, and have 500 Employees or Fewer:	
35 to 500 employees	5,200
Fewer than 35 employees	1,000

(d) The FY 2024 annual fees for materials licensees and holders of certificates, registrations, or approvals subject to fees under this section are shown in table 2 to this paragraph (d):

TABLE 2 TO PARAGRAPH (d)—SCHEDULE OF MATERIALS ANNUAL FEES AND FEES FOR GOVERNMENT AGENCIES LICENSED BY NRC

[See footnotes at end of table]

Category of materials licenses	Annual fees ^{1 2 3}
1. Special nuclear material:	
A. (1) Licenses for possession and use of U-235 or plutonium for fuel fabrication activities.	
(a) Strategic Special Nuclear Material (High Enriched Uranium) ¹⁵ [Program Code(s): 21213]	\$6,307,000
(b) Low Enriched Uranium in Dispersible Form Used for Fabrication of Power Reactor Fuel ¹⁵ [Program Code(s): 21210]	2,138,000
(2) All other special nuclear materials licenses not included in Category 1.A.(1) which are licensed for fuel cycle activities.	
(a) Facilities with limited operations ¹⁵ [Program Code(s): 21310, 21320]	1,762,000
(b) Gas centrifuge enrichment demonstration facility ¹⁵ [Program Code(s): 21205]	N/A
(c) Others, including hot cell facility ¹⁵ [Program Code(s): 21130, 21131, 21133]	N/A
B. Licenses for receipt and storage of spent fuel and reactor-related Greater than Class C (GTCC) waste at an independent spent fuel storage installation (ISFSI) ^{11 15} [Program Code(s): 23200]	N/A
C. Licenses for possession and use of special nuclear material of less than a critical mass, as defined in § 70.4 of this chapter, in sealed sources contained in devices used in industrial measuring systems, including x-ray fluorescence analyzers. [Program Code(s): 22140]	3,400
D. All other special nuclear material licenses, except licenses authorizing special nuclear material in sealed or unsealed form in combination that would constitute a critical mass, as defined in § 70.4 of this chapter, for which the licensee shall pay the same fees as those under Category 1.A. [Program Code(s): 22110, 22111, 22120, 22131, 22136, 22150, 22151, 22161, 22170, 23100, 23300, 23310]	9,600
E. Licenses or certificates for the operation of a uranium enrichment facility ¹⁵ [Program Code(s): 21200]	2,748,000
F. Licenses for possession and use of special nuclear materials greater than critical mass, as defined in § 70.4 of this chapter, for development and testing of commercial products, and other non-fuel cycle activities. ⁴ [Program Code: 22155]	5,900
2. Source material:	
A. (1) Licenses for possession and use of source material for refining uranium mill concentrates to uranium hexafluoride or for deconverting uranium hexafluoride in the production of uranium oxides for disposal. ¹⁵ [Program Code: 11400] ..	1,339,000
(2) Licenses for possession and use of source material in recovery operations such as milling, in situ recovery, heap-leaching, ore buying stations, ion-exchange facilities and in-processing of ores containing source material for extraction of metals other than uranium or thorium, including licenses authorizing the possession of byproduct waste material (tailings) from source material recovery operations, as well as licenses authorizing the possession and maintenance of a facility in a standby mode.	
(a) Conventional and Heap Leach facilities. ¹⁵ [Program Code(s): 11100]	N/A
(b) Basic <i>In Situ</i> Recovery facilities. ¹⁵ [Program Code(s): 11500]	54,300
(c) Expanded <i>In Situ</i> Recovery facilities ¹⁵ [Program Code(s): 11510]	N/A
(d) <i>In Situ</i> Recovery Resin facilities. ¹⁵ [Program Code(s): 11550]	⁵ N/A
(e) Resin Toll Milling facilities. ¹⁵ [Program Code(s): 11555]	⁵ N/A
(f) Other facilities ⁶ [Program Code(s): 11700]	⁵ N/A
(3) Licenses that authorize the receipt of byproduct material, as defined in section 11e.(2) of the Atomic Energy Act, from other persons for possession and disposal, except those licenses subject to the fees in Category 2.A.(2) or Category 2.A.(4) ¹⁵ [Program Code(s): 11600, 12000]	⁵ N/A
(4) Licenses that authorize the receipt of byproduct material, as defined in section 11e.(2) of the Atomic Energy Act, from other persons for possession and disposal incidental to the disposal of the uranium waste tailings generated by the licensee's milling operations, except those licenses subject to the fees in Category 2.A.(2) ¹⁵ [Program Code(s): 12010]	N/A
B. Licenses which authorize the possession, use, and/or installation of source material for shielding. ^{16 17} Application [Program Code(s): 11210]	3,700
C. Licenses to distribute items containing source material to persons exempt from the licensing requirements of part 40 of this chapter. [Program Code: 11240]	14,100
D. Licenses to distribute source material to persons generally licensed under part 40 of this chapter. [Program Code(s): 11230 and 11231]	7,000
E. Licenses for possession and use of source material for processing or manufacturing of products or materials containing source material for commercial distribution. [Program Code: 11710]	8,900
F. All other source material licenses. [Program Code(s): 11200, 11220, 11221, 11300, 11800, 11810, 11820]	11,800
3. Byproduct material:	
A. Licenses of broad scope for possession and use of byproduct material issued under parts 30 and 33 of this chapter for processing or manufacturing of items containing byproduct material for commercial distribution. Number of locations of use: 1–5. [Program Code(s): 03211, 03212, 03213]	37,900
(1). Licenses of broad scope for the possession and use of byproduct material issued under parts 30 and 33 of this chapter for processing or manufacturing of items containing byproduct material for commercial distribution. Number of locations of use: 6–20. [Program Code(s): 04010, 04012, 04014]	50,400
(2). Licenses of broad scope for the possession and use of byproduct material issued under parts 30 and 33 of this chapter for processing or manufacturing of items containing byproduct material for commercial distribution. Number of locations of use: more than 20. [Program Code(s): 04011, 04013, 04015]	63,000

TABLE 2 TO PARAGRAPH (d)—SCHEDULE OF MATERIALS ANNUAL FEES AND FEES FOR GOVERNMENT AGENCIES LICENSED BY NRC—Continued

[See footnotes at end of table]

Category of materials licenses	Annual fees ^{1 2 3}
B. Other licenses for possession and use of byproduct material issued under part 30 of this chapter for processing or manufacturing of items containing byproduct material for commercial distribution. Number of locations of use: 1–5. [Program Code(s): 03214, 03215, 22135, 22162]	12,900
(1). Other licenses for possession and use of byproduct material issued under part 30 of this chapter for processing or manufacturing of items containing byproduct material for commercial distribution. Number of locations of use: 6–20. [Program Code(s): 04110, 04112, 04114, 04116]	17,100
(2). Other licenses for possession and use of byproduct material issued under part 30 of this chapter for processing or manufacturing of items containing byproduct material for commercial distribution. Number of locations of use: more than 20. [Program Code(s): 04111, 04113, 04115, 04117]	21,300
C. Licenses issued under §§ 32.72 and/or 32.74 of this chapter that authorize the processing or manufacturing and distribution or redistribution of radiopharmaceuticals, generators, reagent kits, and/or sources and devices containing byproduct material. This category does not apply to licenses issued to nonprofit educational institutions whose processing or manufacturing is exempt under § 170.11(a)(4) of this chapter. Number of locations of use: 1–5. [Program Code(s): 02500, 02511, 02513]	12,900
(1). Licenses issued under §§ 32.72 and/or 32.74 of this chapter that authorize the processing or manufacturing and distribution or redistribution of radiopharmaceuticals, generators, reagent kits, and/or sources and devices containing byproduct material. This category does not apply to licenses issued to nonprofit educational institutions whose processing or manufacturing is exempt under § 170.11(a)(4). Number of locations of use: 6–20. [Program Code(s): 04210, 04212, 04214]	17,100
(2). Licenses issued under §§ 32.72 and/or 32.74 of this chapter that authorize the processing or manufacturing and distribution or redistribution of radiopharmaceuticals, generators, reagent kits, and/or sources and devices containing byproduct material. This category does not apply to licenses issued to nonprofit educational institutions whose processing or manufacturing is exempt under § 170.11(a)(4). Number of locations of use: more than 20. [Program Code(s): 04211, 04213, 04215]	23,500
D. [Reserved]	⁵ N/A
E. Licenses for possession and use of byproduct material in sealed sources for irradiation of materials in which the source is not removed from its shield (self-shielded units). [Program Code(s): 03510, 03520]	12,200
F. Licenses for possession and use of less than or equal to 10,000 curies of byproduct material in sealed sources for irradiation of materials in which the source is exposed for irradiation purposes. This category also includes underwater irradiators for irradiation of materials in which the source is not exposed for irradiation purposes. [Program Code(s): 03511]	12,400
G. Licenses for possession and use of greater than 10,000 curies of byproduct material in sealed sources for irradiation of materials in which the source is exposed for irradiation purposes. This category also includes underwater irradiators for irradiation of materials in which the source is not exposed for irradiation purposes. [Program Code(s): 03521]	105,300
H. Licenses issued under subpart A of part 32 of this chapter to distribute items containing byproduct material that require device review to persons exempt from the licensing requirements of part 30 of this chapter, except specific licenses authorizing redistribution of items that have been authorized for distribution to persons exempt from the licensing requirements of part 30 of this chapter. [Program Code(s): 03254, 03255, 03257]	12,900
I. Licenses issued under subpart A of part 32 of this chapter to distribute items containing byproduct material or quantities of byproduct material that do not require device evaluation to persons exempt from the licensing requirements of part 30 of this chapter, except for specific licenses authorizing redistribution of items that have been authorized for distribution to persons exempt from the licensing requirements of part 30 of this chapter. [Program Code(s): 03250, 03251, 03253, 03256]	19,000
J. Licenses issued under subpart B of part 32 of this chapter to distribute items containing byproduct material that require sealed source and/or device review to persons generally licensed under part 31 of this chapter, except specific licenses authorizing redistribution of items that have been authorized for distribution to persons generally licensed under part 31 of this chapter. [Program Code(s): 03240, 03241, 03243]	4,900
K. Licenses issued under subpart B of part 32 of this chapter to distribute items containing byproduct material or quantities of byproduct material that do not require sealed source and/or device review to persons generally licensed under part 31 of this chapter, except specific licenses authorizing redistribution of items that have been authorized for distribution to persons generally licensed under part 31 of this chapter. [Program Code(s): 03242, 03244]	3,600
L. Licenses of broad scope for possession and use of byproduct material issued under parts 30 and 33 of this chapter for research and development that do not authorize commercial distribution. Number of locations of use: 1–5. [Program Code(s): 01100, 01110, 01120, 03610, 03611, 03612, 03613]	17,600
(1) Licenses of broad scope for possession and use of product material issued under parts 30 and 33 of this chapter for research and development that do not authorize commercial distribution. Number of locations of use: 6–20. [Program Code(s): 04610, 04612, 04614, 04616, 04618, 04620, 04622]	23,300
(2) Licenses of broad scope for possession and use of byproduct material issued under parts 30 and 33 of this chapter for research and development that do not authorize commercial distribution. Number of locations of use: more than 20. [Program Code(s): 04611, 04613, 04615, 04617, 04619, 04621, 04623]	29,100
M. Other licenses for possession and use of byproduct material issued under part 30 of this chapter for research and development that do not authorize commercial distribution. [Program Code(s): 03620]	18,400
N. Licenses that authorize services for other licensees, except: (1) Licenses that authorize only calibration and/or leak testing services are subject to the fees specified in fee Category 3.P.; and (2) Licenses that authorize waste disposal services are subject to the fees specified in fee categories 4.A., 4.B., and 4.C. ²¹ [Program Code(s): 03219, 03225, 03226]	20,200

TABLE 2 TO PARAGRAPH (d)—SCHEDULE OF MATERIALS ANNUAL FEES AND FEES FOR GOVERNMENT AGENCIES LICENSED BY NRC—Continued

[See footnotes at end of table]

Category of materials licenses	Annual fees ^{1 2 3}
O. Licenses for possession and use of byproduct material issued under part 34 of this chapter for industrial radiography operations. This category also includes the possession and use of source material for shielding authorized under part 40 of this chapter when authorized on the same license. Number of locations of use: 1–5. [Program Code(s): 03310, 03320]	43,900
(1). Licenses for possession and use of byproduct material issued under part 34 of this chapter for industrial radiography operations. This category also includes the possession and use of source material for shielding authorized under part 40 of this chapter when authorized on the same license. Number of locations of use: 6–20. [Program Code(s): 04310, 04312]	58,300
(2). Licenses for possession and use of byproduct material issued under part 34 of this chapter for industrial radiography operations. This category also includes the possession and use of source material for shielding authorized under part 40 of this chapter when authorized on the same license. Number of locations of use: more than 20. [Program Code(s): 04311, 04313]	73,100
P. All other specific byproduct material licenses, except those in Categories 4.A. through 9.D. ¹⁸ Number of locations of use: 1–5. [Program Code(s): 02400, 02410, 03120, 03121, 03122, 03123, 03124, 03140, 03130, 03220, 03221, 03222, 03800, 03810, 22130]	14,500
(1). All other specific byproduct material licenses, except those in Categories 4.A. through 9.D. ¹⁸ Number of locations of use: 6–20. [Program Code(s): 04410, 04412, 04414, 04416, 04418, 04420, 04422, 04424, 04426, 04428, 04430, 04432, 04434, 04436, 04438]	19,500
(2). All other specific byproduct material licenses, except those in Categories 4.A. through 9.D. ¹⁸ Number of locations of use: more than 20. [Program Code(s): 04411, 04413, 04415, 04417, 04419, 04421, 04423, 04425, 04427, 04429, 04431, 04433, 04435, 04437, 04439]	24,300
Q. Registration of devices generally licensed under part 31 of this chapter	¹³ N/A
R. Possession of items or products containing radium-226 identified in § 31.12 of this chapter which exceed the number of items or limits specified in that section: ¹⁴	
(1). Possession of quantities exceeding the number of items or limits in § 31.12(a)(4), or (5) of this chapter but less than or equal to 10 times the number of items or limits specified. [Program Code(s): 02700]	8,400
(2). Possession of quantities exceeding 10 times the number of items or limits specified in § 31.12(a)(4) or (5) of this chapter. [Program Code(s): 02710]	8,800
S. Licenses for production of accelerator-produced radionuclides. [Program Code(s): 03210]	35,100
4. Waste disposal and processing:	
A. Licenses specifically authorizing the receipt of waste byproduct material, source material, or special nuclear material from other persons for the purpose of contingency storage or commercial land disposal by the licensee; or licenses authorizing contingency storage of low-level radioactive waste at the site of nuclear power reactors; or licenses for receipt of waste from other persons for incineration or other treatment, packaging of resulting waste and residues, and transfer of packages to another person authorized to receive or dispose of waste material. [Program Code(s): 03231, 03233, 03236, 06100, 06101]	27,200
B. Licenses specifically authorizing the receipt of waste byproduct material, source material, or special nuclear material from other persons for the purpose of packaging or repackaging the material. The licensee will dispose of the material by transfer to another person authorized to receive or dispose of the material. [Program Code(s): 03234]	20,300
C. Licenses specifically authorizing the receipt of prepackaged waste byproduct material, source material, or special nuclear material from other persons. The licensee will dispose of the material by transfer to another person authorized to receive or dispose of the material. [Program Code(s): 03232]	12,100
5. Well logging:	
A. Licenses for possession and use of byproduct material, source material, and/or special nuclear material for well logging, well surveys, and tracer studies other than field flooding tracer studies. [Program Code(s): 03110, 03111, 03112]	16,300
B. Licenses for possession and use of byproduct material for field flooding tracer studies. [Program Code(s): 03113]	⁵ N/A
6. Nuclear laundries:	
A. Licenses for commercial collection and laundry of items contaminated with byproduct material, source material, or special nuclear material. [Program Code(s): 03218]	39,400
7. Medical licenses:	
A. Licenses issued under parts 30, 35, 40, and 70 of this chapter for human use of byproduct material, source material, or special nuclear material in sealed sources contained in gamma stereotactic radiosurgery units, teletherapy devices, or similar beam therapy devices. This category also includes the possession and use of source material for shielding when authorized on the same license. ^{9 17} Number of locations of use: 1–5. [Program Code(s): 02300, 02310]	37,600
(1). Licenses issued under parts 30, 35, 40, and 70 of this chapter for human use of byproduct material, source material, or special nuclear material in sealed sources contained in gamma stereotactic radiosurgery units, teletherapy devices, or similar beam therapy devices. This category also includes the possession and use of source material for shielding when authorized on the same license. ^{9 17} Number of locations of use: 6–20. [Program Code(s): 04510, 04512]	50,100
(2). Licenses issued under parts 30, 35, 40, and 70 of this chapter for human use of byproduct material, source material, or special nuclear material in sealed sources contained in gamma stereotactic radiosurgery units, teletherapy devices, or similar beam therapy devices. This category also includes the possession and use of source material for shielding when authorized on the same license. ^{9 17} Number of locations of use: more than 20. [Program Code(s): 04511, 04513]	62,500

TABLE 2 TO PARAGRAPH (d)—SCHEDULE OF MATERIALS ANNUAL FEES AND FEES FOR GOVERNMENT AGENCIES LICENSED BY NRC—Continued

[See footnotes at end of table]

Category of materials licenses	Annual fees ^{1 2 3}
B. Licenses of broad scope issued to medical institutions or two or more physicians under parts 30, 33, 35, 40, and 70 of this chapter authorizing research and development, including human use of byproduct material, except licenses for byproduct material, source material, or special nuclear material in sealed sources contained in teletherapy devices. This category also includes the possession and use of source material for shielding when authorized on the same license. ^{9 17} Number of locations of use: 1–5. [Program Code(s): 02110]	53,100
(1). Licenses of broad scope issued to medical institutions or two or more physicians under parts 30, 33, 35, 40, and 70 of this chapter authorizing research and development, including human use of byproduct material, except licenses for byproduct material, source material, or special nuclear material in sealed sources contained in teletherapy devices. This category also includes the possession and use of source material for shielding when authorized on the same license. ^{9 17} Number of locations of use: 6–20. [Program Code(s): 04710]	70,700
(2). Licenses of broad scope issued to medical institutions or two or more physicians under parts 30, 33, 35, 40, and 70 of this chapter authorizing research and development, including human use of byproduct material, except licenses for byproduct material, source material, or special nuclear material in sealed sources contained in teletherapy devices. This category also includes the possession and use of source material for shielding when authorized on the same license. ^{9 17} Number of locations of use: more than 20. [Program Code(s): 04711]	88,200
C. Other licenses issued under parts 30, 35, 40, and 70 of this chapter for human use of byproduct material, source material, and/or special nuclear material, except licenses for byproduct material, source material, or special nuclear material in sealed sources contained in teletherapy devices. This category also includes the possession and use of source material for shielding when authorized on the same license. ^{9 17 19} Number of locations of use: 1–5. [Program Code(s): 02120, 02121, 02200, 02201, 02210, 02220, 02230, 02231, 02240, 22160]	21,400
(1). Other licenses issued under parts 30, 35, 40, and 70 of this chapter for human use of byproduct material, source material, and/or special nuclear material, except licenses for byproduct material, source material, or special nuclear material in sealed sources contained in teletherapy devices. This category also includes the possession and use of source material for shielding when authorized on the same license. ^{9 17 19} Number of locations of use: 6–20. [Program Code(s): 04810, 04812, 04814, 04816, 04818, 04820, 04822, 04824, 04826, 04828]	28,500
(2). Other licenses issued under parts 30, 35, 40, and 70 of this chapter for human use of byproduct material, source material, and/or special nuclear material, except licenses for byproduct material, source material, or special nuclear material in sealed sources contained in teletherapy devices. This category also includes the possession and use of source material for shielding when authorized on the same license. ^{9 17 19} Number of locations of use: more than 20. [Program Code(s): 04811, 04813, 04815, 04817, 04819, 04821, 04823, 04825, 04827, 04829]	36,600
8. Civil defense:	
A. Licenses for possession and use of byproduct material, source material, or special nuclear material for civil defense activities. [Program Code(s): 03710]	8,400
9. Device, product, or sealed source safety evaluation:	
A. Registrations issued for the safety evaluation of devices or products containing byproduct material, source material, or special nuclear material, except reactor fuel devices, for commercial distribution.	29,600
B. Registrations issued for the safety evaluation of devices or products containing byproduct material, source material, or special nuclear material manufactured in accordance with the unique specifications of, and for use by, a single applicant, except reactor fuel devices.	13,100
C. Registrations issued for the safety evaluation of sealed sources containing byproduct material, source material, or special nuclear material, except reactor fuel, for commercial distribution.	7,700
D. Registrations issued for the safety evaluation of sealed sources containing byproduct material, source material, or special nuclear material, manufactured in accordance with the unique specifications of, and for use by, a single applicant, except reactor fuel.	1,500
10. Transportation of radioactive material:	
A. Certificates of Compliance or other package approvals issued for design of casks, packages, and shipping containers.	
1. Spent Fuel, High-Level Waste, and plutonium air packages	⁶ N/A
2. Other Casks	⁶ N/A
B. Quality assurance program approvals issued under part 71 of this chapter.	
1. Users and Fabricators	⁶ N/A
2. Users	⁶ N/A
C. Evaluation of security plans, route approvals, route surveys, and transportation security devices (including immobilization devices).	⁶ N/A
11. Standardized spent fuel facilities	⁶ N/A
12. Special Projects [Program Code(s): 25110]	⁶ N/A
13. A. Spent fuel storage cask Certificate of Compliance	⁶ N/A
B. General licenses for storage of spent fuel under § 72.210 of this chapter	¹² N/A
14. Decommissioning/Reclamation:	
A. Byproduct, source, or special nuclear material licenses and other approvals authorizing decommissioning, decontamination, reclamation, or site restoration activities under parts 30, 40, 70, 72, and 76 of this chapter, including master materials licenses (MMLs). The transition to this fee category occurs when a licensee has permanently ceased principal activities. [Program Code(s): 03900, 11900, 21135, 21215, 21325, 22200]	^{7 20} N/A
B. Site-specific decommissioning activities associated with unlicensed sites, including MMLs, whether or not the sites have been previously licensed	⁷ N/A
15. Import and Export licenses	⁸ N/A
16. Reciprocity	⁸ N/A
17. Master materials licenses of broad scope issued to Government agencies. ¹⁵ [Program Code(s): 03614]	457,000

TABLE 2 TO PARAGRAPH (d)—SCHEDULE OF MATERIALS ANNUAL FEES AND FEES FOR GOVERNMENT AGENCIES LICENSED BY NRC—Continued
[See footnotes at end of table]

Category of materials licenses	Annual fees ^{1 2 3}
18. Department of Energy:	
A. Certificates of Compliance	¹⁰ 2,174,000
B. Uranium Mill Tailings Radiation Control Act (UMTRCA) activities [Program Code(s): 03237, 03238]	271,000

¹ Annual fees will be assessed based on whether a licensee held a valid license with the NRC authorizing possession and use of radioactive material during the current FY. The annual fee is waived for those materials licenses and holders of certificates, registrations, and approvals who either filed for termination of their licenses or approvals or filed for possession only/storage licenses before October 1 of the current FY, and permanently ceased licensed activities entirely before this date. Annual fees for licensees who filed for termination of a license, downgrade of a license, or for a possession-only license during the FY and for new licenses issued during the FY will be prorated in accordance with the provisions of § 171.17. If a person holds more than one license, certificate, registration, or approval, the annual fee(s) will be assessed for each license, certificate, registration, or approval held by that person. For licenses that authorize more than one activity on a single license (e.g., human use and irradiator activities), annual fees will be assessed for each category applicable to the license.

² Payment of the prescribed annual fee does not automatically renew the license, certificate, registration, or approval for which the fee is paid. Renewal applications must be filed in accordance with the requirements of parts 30, 40, 70, 71, 72, or 76 of this chapter.

³ Each FY, fees for these materials licenses will be calculated and assessed in accordance with § 171.13 and will be published in the FEDERAL REGISTER for notice and comment.

⁴ Other facilities include licenses for extraction of metals, heavy metals, and rare earths.

⁵ There are no existing NRC licenses in these fee categories. If NRC issues a license for these categories, the Commission will consider establishing an annual fee for this type of license.

⁶ Standardized spent fuel facilities, 10 CFR parts 71 and 72 Certificates of Compliance and related Quality Assurance program approvals, and special reviews, such as topical reports, are not assessed an annual fee because the generic costs of regulating these activities are primarily attributable to users of the designs, certificates, and topical reports.

⁷ Licensees in this category are not assessed an annual fee because they are charged an annual fee in other categories while they are licensed to operate.

⁸ No annual fee is charged because it is not practical to administer due to the relatively short life or temporary nature of the license.

⁹ Separate annual fees will not be assessed for pacemaker licenses issued to medical institutions that also hold nuclear medicine licenses under fee categories 7.A, 7.A.1, 7.A.2, 7.B., 7.B.1, 7.B.2, 7.C, 7.C.1, or 7.C.2.

¹⁰ This includes Certificates of Compliance issued to the DOE that are not funded from the Nuclear Waste Fund.

¹¹ See § 171.15(c).

¹² See § 171.15(c).

¹³ No annual fee is charged for this category because the cost of the general license registration program applicable to licenses in this category will be recovered through 10 CFR part 170 fees.

¹⁴ Persons who possess radium sources that are used for operational purposes in another fee category are not also subject to the fees in this category. (This exception does not apply if the radium sources are possessed for storage only.)

¹⁵ Licensees subject to fees under categories 1.A., 1.B., 1.E., 2.A., and licensees paying fees under fee category 17 must pay the largest applicable fee and are not subject to additional fees listed in this table.

¹⁶ Licensees paying fees under 3.C. are not subject to fees under 2.B. for possession and shielding authorized on the same license.

¹⁷ Licensees paying fees under 7.A, 7.A.1, 7.A.2, 7.B, 7.B.1, 7.B.2, 7.C, 7.C.1, or 7.C.2 are not subject to fees under 2.B. for possession and shielding authorized on the same license.

¹⁸ Licensees paying fees under 3.N. are not subject to paying fees under 3.P., 3.P.1, or 3.P.2 for calibration or leak testing services authorized on the same license.

¹⁹ Licensees paying fees under 7.B., 7.B.1, or 7.B.2 are not subject to paying fees under 7.C., 7.C.1, or 7.C.2 for broad scope license licenses issued under parts 30, 35, 40, and 70 of this chapter for human use of byproduct material, source material, and/or special nuclear material, except licenses for byproduct material, source material, or special nuclear material in sealed sources contained in teletherapy devices authorized on the same license.

²⁰ No annual fee is charged for a materials license (or part of a materials license) that has transitioned to this fee category because the decommissioning costs will be recovered through 10 CFR part 170 fees, but annual fees may be charged for other activities authorized under the license that are not in decommissioning status.

²¹ Licensees paying fees under 4.A., 4.B. or 4.C. are not subject to paying fees under 3.N. licenses that authorize services for other licensees authorized on the same license.

■ 21. In § 171.19, revise paragraph (a) to read as follows.

§ 171.19 Payment.

* * * * *

(a) *Method of payment.* All annual fee payments under this part are to be made payable to the U.S. Nuclear Regulatory Commission. The payments are to be made in U.S. funds using the electronic payment methods accepted at www.Pay.gov. Federal agencies may also make payment by IntraGovernmental Payment and Collection (IPAC). Specific instructions for making payments may be obtained by contacting the Office of the Chief Financial Officer at 301-415-7554. In accordance with Department of the Treasury requirements, refunds will

only be made upon receipt of information on the payee's financial institution and bank accounts.
