

information collection requirements, including the validity of the methodology and assumptions used;

- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information, and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend the approval of the information collection requirements contained in Powered Industrial Trucks Standard. The agency is requesting an adjustment decrease from 450,022 hours to 437,198 hours, a difference of 12,824 hours. This decrease is due to the decrease in the number of powered industrial trucks from 1,276,055 to 1,239,687.

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.

Type of Review: Extension of a currently approved collection.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, the reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA’s estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act

also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of effort in obtaining information (29 U.S.C. 657).

The following sections describe who uses the information collected under each requirement, as well as how they use it. The purpose of these requirements is to reduce employees' risk of death or serious injury while working in grain handling facilities.

Paragraph (d) of the Standard requires the employer to develop and implement an emergency action plan so that employees will be aware of the appropriate actions to take in the event of an emergency.

Paragraph (e)(1) requires that employers provide training to employees at least annually and when changes in job assignment will expose them to new hazards. Paragraph (f)(1) requires the employer to issue a permit for all hot work. Under paragraph (f)(2) the permit shall certify that the requirements contained in 1910.272(a) have been implemented prior to beginning the hot work operations and shall be kept on file until completion of the hot work operation.

Paragraph (g)(1)(i) requires the employer to issue a permit for entering bins, silos, or tanks unless the employer or the employer's representative is present during the entire operation. The permit shall certify that the precautions contained in paragraph (g) have been implemented prior to employees entering bins, silos, or tanks and shall be kept on file until completion of the entry operations.

Paragraph (g)(1)(ii) requires that the employer de-energize, disconnect, lockout and tag, block off, or otherwise prevent operation of all mechanical, electrical, hydraulic, and pneumatic equipment that presents a danger to employees inside grain storage structures.

Paragraphs (i)(1) and (i)(2) require the employer to inform contractors performing work at the grain handling facility of known potential fire and explosion hazards related to the contractor's work and work area and to explain to the contractor the applicable provisions of the emergency action plan.

Paragraph (j)(1) requires the employer to develop and implement a written housekeeping program that establishes the frequency and method(s) determined to best reduce accumulations of fugitive grain dust on ledges, floors, equipment, and other exposed surfaces.

Under paragraph (m)(1), the employer is required to implement preventative maintenance procedures consisting of regularly scheduled inspections of at least the mechanical and safety control equipment associated with dryers, grain stream processing equipment, dust collection equipment including filter collectors, and bucket elevators. Paragraph (m)(3) requires a certification to be maintained for each inspection. Paragraph (m)(4) requires the employer to implement procedures for the use of tags and locks that will prevent the inadvertent application of energy or motion to the equipment being repaired, serviced, or adjusted.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information, and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend the approval of the information collection requirements contained in the Grain Handling Facilities Standard. The agency is requesting that the currently approved burden hours of 57,837 hours remain the same.

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.
