SUPPLEMENTARY INFORMATION:

I. Abstract

The National Medal of Technology and Innovation (NMTI) is the highest honor for technological achievement bestowed by the President of the United States on America’s leading innovators. Established by an Act of Congress in 1980, the Medal of Technology was first awarded in 1985.¹ The Medal is awarded annually to individuals, teams (up to four individuals), companies, or divisions of companies. The Medal recognizes outstanding contributions to the nation’s economic, environmental, and social well-being through the development and commercialization of technology products, processes and concepts, technological innovation, and development of the nation’s technological workforce. By highlighting the national importance for technological innovation, the Medal also seeks to inspire future generations of Americans to prepare for and pursue technical careers to keep America at the forefront of global technology and economic leadership.

The National Medal of Technology and Innovation Evaluation Committee, a distinguished independent committee appointed by the Secretary of Commerce, reviews and evaluates the merit of all candidates nominated through an open, competitive solicitation process. The committee makes its recommendations for Medal candidates to the Secretary of Commerce who, in turn, makes recommendations to the President for final selection.

This information collection covers data gathered in the NMTI Nomination Application, which the public uses to nominate an individual’s, team’s, or company’s extraordinary leadership and innovation in technological achievement and outstanding contribution to strengthening the nation’s technological workforce. The application collects general and biographical information about the nominee, general information about the nominator, and a description of the nominee’s contribution/achievements, and must be accompanied by up to six letters of recommendation or support from individuals who have first-hand knowledge of the cited achievement(s).

II. Method of Collection

The information in this information collection can be submitted electronically through the USPTO website via the online portal.²

IV. Request for Comments

The USPTO is soliciting public comments to:

(a) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the Agency’s estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected; and

(d) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

All comments submitted in response to this notice are a matter of public record. USPTO will include or summarize each comment in the request to OMB to approve this information collection. Before including an address, phone number, email address, or other personally identifiable information (PII) in a comment, be aware that the entire comment—including PII—may be made publicly available at any time. While you may ask in your comment to withhold PII from public view, USPTO cannot guarantee that it will be able to do so.
