I. Background

IMLS is the primary source of federal support for the Nation's libraries and museums. We advance, support, and empower America's museums, libraries, and related organizations through grant making, research, and policy development. To learn more, visit www.imls.gov.

II. Current Actions

This Notice proposes renewing the clearance of the content, forms, and instructions for IMLS Library and Museum Reviewer Forms for the next three years.

All proposals submitted for IMLS competitive awards are reviewed by library and museum professionals who know the needs of communities, can share promising practices, and are well versed in the issues and concerns of libraries and museums today. Peer reviewers dedicate their time and expertise to advance the highest professional practices in the field. The IMLS review process is well respected, and the success of our grant programs is largely due to the expertise of our reviewers. These peer reviewer forms, accessed through the IMLS website, allow library and museum professionals to indicate their interest and provide information on their professional expertise to be considered for selection as an IMLS peer reviewer.

NUCLEAR REGULATORY COMMISSION

Advisory Committee on the Medical Uses of Isotopes: Charter Renewal

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Notice of renewal of the Charter of the Advisory Committee on the Medical Uses of Isotopes.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has determined that renewal of the charter for the Advisory Committee of the Medical Uses of Isotopes (ACMUI) until February 28, 2026, is in the public interest in connection with duties imposed on the Commission by law. This action is being taken in accordance with the Federal Advisory Committee Act, after consultation with the Committee Management Secretariat, General Services Administration.

SUPPLEMENTARY INFORMATION: The purpose of the ACMUI is to provide advice to the NRC on policy and technical issues that arise in regulating the medical use of byproduct material for diagnosis and therapy. Responsibilities include providing guidance and comments on current and proposed NRC regulations and regulatory guidance concerning medical use; evaluating certain non-routine uses of byproduct material for medical use; and evaluating training and experience of proposed authorized users. The members are involved in preliminary discussions of major issues in determining the need for changes in NRC policy and regulation to ensure the continued safe use of byproduct material. Each member provides technical assistance in his/her specific area(s) of expertise, particularly with respect to emerging technologies. Members also provide guidance as to NRC's role in relation to the responsibilities of other Federal agencies as well as of various professional organizations and boards.

Members of this Committee have demonstrated professional qualifications and expertise in both scientific and non-scientific disciplines including nuclear medicine; nuclear cardiology; radiation therapy; medical physics; nuclear pharmacy; State medical regulation; patient's rights and care; health care administration; and Food and Drug Administration regulation.
