

receives federal oversight like many independent, nonprofit organizations, it is not a federal agency. The PWSRCAC is a local organization that predates the passage of OPA 90. The existence of the PWSRCAC was specifically recognized in OPA 90 where it is defined as an “alternative voluntary advisory group.” Alyeska Pipeline Service Company funds the PWSRCAC, and the Coast Guard ensures the PWSRCAC operates in a fashion that is broadly consistent with OPA 90.

Recertification: By letter dated February 27, 2024, the Commander, Seventeenth Coast Guard District, certified that the PWSRCAC qualifies as an alternative voluntary advisory group under 33 U.S.C. 2732(o). This recertification terminates on February 28, 2025.

Dated: February 27, 2024.

SUPPLEMENTARY INFORMATION: HUD, Office of General Counsel in conjunction with the eDiscovery contractor maintains the eDiscovery Management System (EDMS) and Relativity system of records. eDiscovery is the process in which attorneys overseeing court-ordered discovery or litigation may request electronically stored information (ESI), tangible data, and other evidence relevant to the case for specified individuals for litigation purposes. The eDiscovery process consists of two systems that are closely interrelated, and both are consistently used in the eDiscovery process. EDMS is the system utilized to issue and track various eDiscovery templates and allows users to submit data preservation/collection and keyword search requests, and for specific data (email, G:drive/One Drive, J:drive,

C:drive, SharePoint, Teams data, etc.) to be preserved or collected in accordance with the user request. EDMS provides the Department with a method to initiate, track, preserve, collect to produce data in response to discovery requests, court-ordered discovery/litigation, Freedom of Information Act (FOIA) requests, Officer of Inspector General (OIG) investigations, Office of Special Counsel (OSC) and Congressional Oversight Committee requests. EDMS also includes secure folders to create and store various eDiscovery templates, including Litigation Hold memoranda, eDiscovery Certifications, Closure Letters, and any other documents related to the discovery process as well as a workflow for users to submit ESI data collection requests and ESI search requests. EDMS relies on tracking and workflow management from the EDMS SharePoint instance hosted in the HUD SharePoint environment. The Relativity system is the litigation review tool portion of the eDiscovery process that allows users to review data for relevance and privilege before producing data to a court or other outside party. The two systems are closely interrelated; if a case proceeds to discovery/litigation, the data that was previously collected in a network storage location by the HUD eDiscovery contractor via the EDMS system is processed and provided to the user for review in Relativity. The user can then request an export from Relativity to produce the data for a court or other outside party in response to discovery/litigation obligations. The following are updates since the previous SORN publication:

Records Source Categories: Updated to cover all electronic record sources for internal and external systems to HUD.

Routine Use of Records: Updated to cover routine uses that are new, modified, or removed. Routine Use 1 has not changed. Routine Use 2 has been rewritten to avoid duplicating permissible disclosures under 5 U.S.C. 552a(b)(6) and to permit disclosures to the Office of Government Information Services (OGIS), National Archives and Records Administration (NARA), in connection with OGIS's responsibilities under the Freedom of Information Act. Former Routine Use 3 has been split into two distinct routine uses and rewritten to reflect OMB guidance. Specifically, Routine Use 3 was modified to reflect OMB's guidance from May 24, 1985. The second half of former Routine Use 3 was renumbered as Routine Use 5 and modified to reflect OMB's guidance from July 9, 1975 (40 FR 28948). Former Routine Uses 4 and 6 have been removed as unnecessary for

this system. Former Routine Use 5 has been renumbered to Routine Use 4 and modified to clarify that contractors are subjected by statute to the Privacy Act's requirements. Former Routine Use 7 has been renumbered to Routine Use 6 and modified to reflect OMB's guidance from May 24, 1985. Former Routine Use 8 has been renumbered to Routine Use 7. Former Routine Use 9 has been removed and replaced by Routine Uses 8 and 9 to comply with OMB Memorandum 17-12. Routine Use 10 has been removed as unnecessary for this system. Routine Use 11 has been removed as unnecessary for this system.
