

U₃O₈ to UF₆ for input to enrichment facilities; (3) enrichment in up to three steps (a) from natural uranium to LEU of no more than 5 weight percent U-235, (b) from LEU to HALEU of less than 10 weight percent U-235, and (c) to HALEU of less than 20 weight percent U-235; (4) HALEU deconversion from UF₆ to uranium oxide, metal, and other forms; (5) storage; (6) transportation of uranium/HALEU between facilities; and (7) DOE acquisition of HALEU of between at least 19.75 weight percent and less than 20 weight percent U-235. In addition to the activities above, the following actions could result from implementation of the Proposed Action: (1) fuel fabrication for a variety of fuel types in a U.S. Nuclear Regulatory Commission (NRC) Category II facility; (2) HALEU-fueled reactor (demonstration and test, power, isotope production) operations; and (3) spent fuel storage and disposition. While not specifically a part of the Proposed Action, these activities are reasonably foreseeable and therefore acknowledged and addressed to the extent possible in the Draft HALEU EIS.

While the Draft HALEU EIS provides information that could be used to identify impacts from the construction and operation of HALEU fuel cycle facilities, the selection of specific locations and facilities will not be a part of the Record of Decision for this EIS.

Preferred Alternative

The Preferred Alternative is the Proposed Action, to acquire, through procurement from commercial sources, HALEU enriched to at least 19.75 and less than 20 weight percent U-235 over a 10-year period of performance, and to facilitate the establishment of commercial HALEU fuel production. The No Action Alternative would not implement the Proposed Action, leaving development of a domestic commercial supply of HALEU to industry or industry would remain reliant on foreign supplies of HALEU, contrary to Congressional direction under section 2001 of the Energy Act of 2020.

Virtual Public Hearings

DOE will host three interactive, virtual public hearings during the public comment period on Wednesday, April 3, 2024, at 6 p.m. ET, 8 p.m. ET, and 10 p.m. ET. During these public hearings, DOE will give a brief presentation on the Draft HALEU EIS, followed by a period during which DOE will accept oral comments on the Draft HALEU EIS. Parties interested in providing oral comments are encouraged to preregister for the public hearings and indicate their desire to

comment. Oral comments will be transcribed. Written comments on the Draft HALEU EIS may also be submitted during the public comment period as indicated under the **ADDRESSES** section. All comments, received before the end of the comment period, whether oral or written, will be considered by DOE as the HALEU EIS is finalized. DOE will post information regarding the public hearings on the HALEU EIS website at <https://www.energy.gov/ne/haleu-environmental-impact-statement>. The hearings will also be announced in newspapers.

[Project No. 5867-054]

Alice Falls Hydro, LLC; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380, the Office of Energy Projects has reviewed the application for a new license to continue to operate and maintain the Alice Falls Hydroelectric Project No. 5867 (project). The project is located on the Ausable River in Clinton and Essex counties, New York. Commission staff

has prepared an Environmental Assessment (EA) for the project.

The EA contains the staff's analysis of the potential environmental impacts of the project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

The Commission provides all interested persons with an opportunity to view and/or print the EA via the internet through the Commission's Home Page (<http://www.ferc.gov>), using the "eLibrary" link.
