

which the reservations are located. We coordinated with Tribes over the past 2 years via letters and four webinars as we developed this new regulatory approach for Tribal self-management of the harvest, and we have received positive feedback. The new system will reduce the annual administrative burden on both the Tribes and the Service to propose, review, and publish special migratory game bird hunting regulations while continuing to sustain healthy migratory game bird populations for future generations.

2. (NEW) *Requests for Consultation (Tribes/States)*—The new regulations in the final rule (88 FR 60375, September 1, 2023) also may be applied to the establishment of migratory game bird hunting regulations for non-Tribal members on all lands within the reservations where Tribes have full wildlife-management authority over such hunting, or where the Tribes and affected States otherwise have reached agreements over hunting by non-Tribal members on non-Indian lands within the reservation. Tribes usually have the authority to regulate migratory game bird hunting by nonmembers on Indian-owned reservation lands.

The question of jurisdiction is more complex on reservations that include lands owned by non-Indians, especially when the surrounding States have established or intend to establish regulations governing migratory game bird hunting by non-Indians on these lands. In those cases, we encourage the Tribes and States to reach agreement on regulations that would apply throughout the reservations. When appropriate, we will consult with a Tribe and State with the aim of facilitating an accord. We also will consult jointly with Tribal and State officials in the affected States where Tribes may wish to establish special migratory game bird hunting regulations for Tribal members on ceded lands.

It is incumbent upon the Tribe and/or the State to request consultation. We will not presume to make a determination, without being advised by either a Tribe or a State, that any issue is or is not worthy of formal consultation. Tribal and State requests for consultation with the Service should be sent to the Service's Assistant Director for the Migratory Bird Program. We note that our guidance on resolving issues of concern between Tribes and States on reservations and ceded lands is the same guidance we provided under the previous Tribal regulation process.

3. (NEW) *Requests for Experimental Seasons (Tribes)*—We will continue to consult with Tribes that wish to reach a mutual agreement (memorandum of

understanding (MOU) or similar type of formal agreement) on conducting short-term (possibly several years) experimental hunting seasons using methods outside of the Federal hunting methods at 50 CFR 20.21 for on-reservation and ceded lands hunting by Tribal members. The Tribal-member-only experimental hunting season would provide data and evaluation criteria specified in an agreement for consideration if a Tribe would like to make the additional hunting method operational. Tribes should send such requests for consultation to the Service's Assistant Director for the Migratory Bird Program at least 9 months before the season or ceremony regarding hunting methods outside of the Federal regulations.

If any individual Tribe wishes to make these additional experimental hunting methods operational and the Service agrees, the Service will conduct rulemaking (using any data from the experimental hunting season) to amend 50 CFR part 20 to allow Tribal members to use these additional hunting methods.

Starting with the 2023–24 hunting season, annual Tribal hunting season regulations will no longer be published in the **Federal Register**, alleviating the administrative burden to both the Service and the Tribes of developing special Tribal migratory bird hunting regulation proposals, reviewing proposals, and publishing Tribal regulations as Federal regulations. This process will not apply to seasons for subsistence take of migratory birds in Alaska.

Title of Collection: Establishment of Annual Migratory Bird Hunting Seasons, 50 CFR part 20.

OMB Control Number: 1018–0171.

Form Numbers: None.

Type of Review: Revision of a currently approved collection.

Respondents/Affected Public: State and Tribal governments.

Total Estimated Number of Annual Respondents: 52 (from State governments and Territories).

Total Estimated Number of Annual Responses: 78 (from 52 State and U.S. Territories, as well as 26 additional reports).

Estimated Completion Time per Response: Varies from 1 hour to 650 hours, depending on activity.

Total Estimated Number of Annual Burden Hours: 11,423.

Respondent's Obligation: Required to obtain or retain a benefit.

Frequency of Collection: Annually.

Total Estimated Annual Non-hour Burden Cost: None.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Madonna Baucum,

Information Collection Clearance Officer, U.S. Fish and Wildlife Service.

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Geological Survey

[GX23DJ73UAC1000; OMB Control Number 1028–NEW]

Agency Information Collection Activities: Science and Data for Water-Hazards Response

AGENCY: U.S. Geological Survey, Department of Interior.

ACTION: Notice of Information Collection; request for comments

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (PRA), the U.S. Geological Survey (USGS) is proposing a new information collection.

DATES: Interested persons are invited to submit comments on or before April 11, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function. Please provide a copy of your comments by mail to USGS, Information Collections Officer, 12201 Sunrise Valley Drive MS 159, Reston, VA 20192 or by email to gs-info_collections@usgs.gov. Please reference OMB Control Number 1028–NEW Science and Data for Water-Hazards in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this Information Collection Request (ICR), contact Jennifer Rapp by email at jrapp@usgs.gov or by telephone at 804–261–2635. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services

offered within their country to make international calls to the point-of-contact in the United States. You may also view the ICR at <http://www.reginfo.gov/public/do/PRAMain>.

SUPPLEMENTARY INFORMATION: In accordance with the PRA (44 U.S.C. 3501 *et seq.*) and 5 CFR 1320.8(d)(1), we provide the general public and other federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on June 23, 2023 (88 FR 41124). No comments were received.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again soliciting comments from the public and other federal agencies on the proposed ICR that is described below. We are especially interested in public comment addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How the agency might minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personally identifiable information (PII) in your comment, you should be aware that your entire comment—including your PII—may be made publicly available at any time. While you can ask us in your comment to withhold your PII from public review, we cannot guarantee that we will be able to do so.

Abstract: The United States is facing growing challenges related to water

availability and quality due to shifting demographics, aging water-delivery infrastructure, the impacts of climate change, and increasing hazards risks, like those posed by floods and drought. Working with incomplete knowledge, managers must consider the needs of various demographic groups and economic sectors when making management decisions and responding to emergencies. To improve delivery of effective science to support decision-making, the USGS must adapt to meet the evolving needs of stakeholders in the water-hazard space. We will collect information regarding the decision-making process and scientific information and data needs to support daily, long-term, and emergency management decision-making. A lack of decision-support data within water institutions can lead to poor decision-making and outcomes that may increase the risk to life, property, and environmental health resulting from a hazard event. This information will support the delivery of appropriate data, in appropriate formats, at the right time for decision-making and emergency management. The information will guide USGS support of water-resource institutions, enhancing resilience in the face of the Nation's many water-resources challenges.

Title of Collection: Science and Data for Water-Hazards Response.

OMB Control Number: 1028–NEW.

Form Number: None.

Type of Review: New.

Respondents/Affected Public: State and local water-resource managers and water-hazard responders; Tribal Nations and Tribal Serving Organizations; and non-governmental organizations and community groups that use water-hazard information.

State and Local Water Resource Managers and Responders:

Estimated Number of Annual Responses: 650.

Estimated Completion Time per Response: 1 hour.

Estimated Number of Annual Burden Hours: 650.

Respondent's Obligation: Voluntary.
Frequency of Collection: Once per year.

Estimated Annual Nonhour Burden Cost: None.

Tribal Nations and Tribal Serving Organizations:

Estimated Number of Annual Responses: 200.

Estimated Completion Time per Response: 1 hour.

Estimated Number of Annual Burden Hours: 200.

Respondent's Obligation: Voluntary.
Frequency of Collection: Once per year.

Estimated Annual Nonhour Burden Cost: None.

Non-governmental Organizations and Community Groups:

Estimated Number of Annual Responses: 150.

Estimated Completion Time per Response: 1 hour.

Estimated Number of Annual Burden Hours: 150.

Respondent's Obligation: Voluntary.
Frequency of Collection: Once per year.

Estimated Annual Nonhour Burden Cost: None.

Total Estimated Number of Annual Responses: 1,000.

Total Estimated Number of Annual Burden Hours: 1,000.

Total Estimated Annual Nonhour Burden Cost: None.

An agency may not conduct or sponsor, nor is a person required to respond to, a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the PRA (44 U.S.C. 3501 *et seq.*).

Joseph Nielsen,

Director, Integrated Information Dissemination Division, USGS Water Resources Mission Area.
