ENVIRONMENTAL PROTECTION AGENCY

[FRL OP-OFA-116]

Notice of Adoption of Department of Energy Categorical Exclusion Under the National Environmental Policy Act

AGENCY: Environmental Protection Agency.

ACTION: Notice of adoption of categorical exclusions.

SUMMARY: The Environmental Protection Agency (EPA) is adopting two categorical exclusions (CEs) from the Department of Energy (DOE) under the National Environmental Policy Act (NEPA) for drop-off, collection, and transfer facilities for recyclable materials and for installation or relocation of machinery and equipment, to use in EPA's programs and in funding opportunities administered by EPA. This notice describes the categories of proposed actions for which EPA intends to use DOE's CEs and describes the consultation between the agencies.

DATES: This action is effective upon publication.

FOR FURTHER INFORMATION CONTACT: Dan Halpert, EPA Solid Waste Infrastructure for Recycling Program, by phone at 202-566-0816 or by email at halpert.daniel@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Background

NEPA and CEs

The National Environmental Policy Act, as amended at, 42 U.S.C. 4321-4347 (NEPA), requires all Federal agencies to assess the environmental impact of their actions. Congress enacted NEPA in order to encourage productive and enjoyable harmony between humans and the environment, recognizing the profound impact of human activity and the critical importance of restoring and maintaining environmental quality to the overall welfare of humankind. 42 U.S.C. 4321, 4331. NEPA's twin aims are to ensure agencies consider the environmental effects of their proposed actions in their

decision-making processes and inform and involve the public in that process. 42 U.S.C. 4331. NEPA created the Council on Environmental Quality (CEQ), which promulgated NEPA implementing regulations, 40 CFR parts 1500 through 1508 (CEQ regulations).

To comply with NEPA, agencies determine the appropriate level of review—an environmental impact statement (EIS), environmental assessment (EA), or CE. 42 U.S.C. 4336. If a proposed action is likely to have significant environmental effects, the agency must prepare an EIS and document its decision in a record of decision. 42 U.S.C. 4336. If the proposed action is not likely to have significant environmental effects or the effects are unknown, the agency may instead prepare an EA, which involves a more concise analysis and process than an EIS. 42 U.S.C. 4336. Following the EA, the agency may conclude the process with a finding of no significant impact if the analysis shows that the action will have no significant effects. If the analysis in the EA finds that the action is likely to have significant effects, however, then an EIS is required.

Under NEPA and the CEQ regulations, a Federal agency also can establish CEs—categories of actions that the agency has determined normally do not significantly affect the quality of the human environment—in its agency NEPA procedures. 42 U.S.C. 4336(e)(1); 40 CFR 1501.4, 1507.3(e)(2)(ii), 1508.1(d). If an agency determines that a CE covers a proposed action, it then evaluates the proposed action for extraordinary circumstances in which a normally excluded action may have a significant effect. 40 CFR 1501.4(b). If no extraordinary circumstances are present or if further analysis determines that the extraordinary circumstances do not involve the potential for significant environmental effects, the agency may apply the CE to the proposed action without preparing an EA or EIS. 42 U.S.C. 4336(a)(2), 40 CFR 1501.4. If the extraordinary circumstances have the potential to result in significant effects, the agency is required to prepare an EA or EIS.

Section 109 of NEPA, enacted as part of the Fiscal Responsibility Act of 2023, allows a Federal agency to “adopt” and use another agency's CEs for a category of proposed agency actions. 42 U.S.C. 4336(c). To use another agency's CEs under section 109, the adopting agency must identify the relevant CEs listed in another agency's (“establishing agency”) NEPA procedures that cover the adopting agency's category of proposed actions or related actions; consult with

the establishing agency to ensure that the proposed adoption of the CE to a category of actions is appropriate; identify to the public the CE that the adopting agency plans to use for its proposed actions; and document adoption of the CE. *Id.* This notice describes EPA's adoption of DOE's CEs under section 109 of NEPA to use in EPA's program and in funding opportunities administered by EPA.

EPA's Program

EPA intends to use DOE's recycling facilities and equipment installation CEs in EPA's program and in funding opportunities, including those administered by the EPA Solid Waste Infrastructure for Recycling (SWIFR) Program.

The SWIFR Program provides funding to eligible entities to implement the National Recycling Strategy to improve post-consumer materials management and infrastructure; support improvements to local post-consumer materials management and recycling programs; and assist local waste management authorities in making improvements to local waste management systems. The SWIFR program funds projects for the siting, construction, modification, and operation of recycling or compostable material drop-off, collection, and transfer station facilities. Funding administered by the SWIFR program may also be used at these recycling, reuse, composting, or other waste management facilities for the installation or relocation and operation of machinery and equipment, such as crushers, shredders, sorters, and baling equipment. EPA also intends to use the DOE CEs adopted through this notice for activities administered under other EPA programs that meet this description of SWIFR program activities.

II. Identification of the Categorical Exclusions

EPA is adopting two CEs from DOE for drop-off, collection, and transfer facilities for recyclable materials and for the installation or relocation of machinery and equipment.

DOE's CE for recycling facilities is codified in DOE's NEPA procedures as CE B1.35 of 10 CFR part 1021, subpart D, appendix B, as follows:

B1.35 Drop-Off, Collection, and Transfer Facilities for Recyclable Materials. The siting, construction, modification, and operation of recycling or compostable material drop-off, collection, and transfer stations on or contiguous to a previously disturbed or developed area and in an area where such a facility would be consistent with existing zoning requirements. The stations would
