SUPPLEMENTARY INFORMATION:

I. Background

DoD is proposing to revise the DFARS to remove the solicitation provision at DFARS 252.247-7022, Representation of Extent of Transportation By Sea, and to revise the contract clause at DFARS 252.247-7023, Transportation of Supplies by Sea, accordingly, to effect the purpose of the provision using only the clause. This change will streamline instructions to contractors regarding required notifications to the Government of transportation of supplies by sea.

II. Discussion and Analysis

Currently, DFARS provision 252.247-7022 and DFARS clause 252.247-7023 are included in all solicitations with an anticipated value greater than the simplified acquisition threshold, except solicitations for direct purchase of ocean transportation services. The provision requires the offeror to represent whether supplies will or will not be transported by sea in performance of the contract or any subcontract. The clause notifies offerors of their responsibilities when transporting supplies by sea, which include the use of U.S. flag vessels, unless certain situations apply; the submission of a certification with a final invoice; and submission of bills of lading to the contracting officer and to the U.S. Department of Transportation Maritime Administration (MARAD).

The provision’s notification requirement was intended to aid acquisition personnel in carrying out their responsibilities under the clause. By effecting the notification via a solicitation provision, a representation is required from all offerors rather than just the awardee. Given the offeror’s representation has no bearing on its eligibility or selection for award, the notification is better suited to be a requirement in the clause, where only

the awardee must notify the contracting officer, as well as MARAD, only if transportation of supplies by sea will occur. Including MARAD on the notification provides all impacted parties with situational awareness and an ability to be proactive in ensuring compliance with the clause requirements.

Given that DFARS clause 252.247-7023 is included in nearly all contracts, and DFARS provision 252.247-7022 is associated with the requirements of 252.247-7023, the text of the clause and provision can be combined. The result reduces the number of provisions required to be used in solicitations and the number of representations offerors must provide, while still maintaining the effect of DFARS provision 252.247-7022.

Consequent to removing DFARS clause 252.247-7022, this rule removes the clause prescription at DFARS 247.574(a) as well as direction at DFARS 204.1202 and 212.301 relating to the provision.

III. Applicability to Contracts at or Below the Simplified Acquisition Threshold (SAT), for Commercial Products (Including Commercially Available Off-the-Shelf (COTS) Items), and for Commercial Services

This rule removes the provision at DFARS 252.247-7022, along with its prescription at DFARS 247.574(a), and amends the clause at DFARS 252.247-7032 accordingly to include the substance of the provision. However, this proposed rule does not impose any new requirements on contracts at or below the SAT, for commercial products including COTS items, or for commercial services. The clause will continue to apply to acquisitions at or below the SAT, to acquisitions of commercial products including COTS items, and to acquisitions of commercial services.

IV. Expected Impact of the Rule

This change is expected to streamline instructions to contractors regarding notifications of transportation of supplies by sea. Presently, DFARS

provision 252.247–7022 is included in nearly all solicitations and DFARS clause 252.247–7023 is included in nearly all contracts. By effectively combining the provision and the clause, this proposed rule will reduce the number of provisions required to be used in solicitations and the number of representations offerors must provide, while still maintaining the effect of DFARS provision 252.247–7022. Therefore, this proposed rule is expected to reduce administrative burden on contractors, including small businesses.

V. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is not a significant regulatory action and, therefore, was not subject to review under section 6(b) of E.O. 12866, Regulatory Planning and Review, as amended.

VI. Regulatory Flexibility Act

DoD does not expect this proposed rule, when finalized, to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the rule does not create any new requirements or add to any existing requirements for contractors. However, an initial regulatory flexibility analysis has been performed and is summarized as follows:

DoD is proposing to amend the Defense Federal Acquisition Regulation Supplement (DFARS) to remove a solicitation provision and accordingly to modify the text of an existing DFARS contract clause to include the operative text of that DFARS provision.

The objective of this proposed rule is to streamline the instructions to contractors pertaining to the transportation of supplies by sea. The legal basis for the proposed rule is 41 U.S.C. 1303.

This proposed rule will likely affect small entities that will be awarded contract actions that include DFARS clause 252.247–7023, Transportation of Supplies by Sea. Data was obtained from the Procurement Business Intelligence Service for all contracts and

modifications that include DFARS clause 252.247–7023 for fiscal years 2020 through 2022. DoD awarded on average 642,310 contract actions per year that included DFARS clause 252.247–7023 to 30,680 unique entities, of which approximately 359,315 contract awards (56 percent) were made to 21,070 unique small entities (69 percent).

The proposed rule does not impose any new reporting, recordkeeping, or compliance requirements.

The proposed rule does not duplicate, overlap, or conflict with any other Federal rules.

There are no known significant alternatives that would accomplish the objectives of the proposed rule.

DoD invites comments from small business concerns and other interested parties on the expected impact of this proposed rule on small entities.

DoD will also consider comments from small entities concerning the existing regulations in subparts affected by this rule in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 610 (DFARS Case 2020–D026), in correspondence.

VII. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. chapter 35) applies to this proposed rule. However, these changes to the DFARS do not impose additional information collection requirements to the paperwork burden previously approved by the Office of Management and Budget (OMB) under OMB Control Number 0704–0245, entitled Defense Federal Acquisition Regulation Supplement (DFARS) Part 247, Transportation and Related Clauses.

Endangered and Threatened Wildlife and Plants; Threatened Species Status With Section 4(d) Rule for Pyramid Pigtoe

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; withdrawal.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), withdraw the September 7, 2021, proposed rule to list the pyramid pigtoe (*Pleurobema rubrum*), a freshwater mussel, as a threatened species under the Endangered Species Act of 1973 (Act), as amended. This withdrawal is based on new information we received following publication of the proposed rule that indicates the pyramid pigtoe is not a valid listable entity under the Act. In 2023, a comprehensive genetic analysis throughout the range of the pyramid pigtoe (*P. rubrum*) and round pigtoe (*P. sintoxia*) mussels concluded that the two mussels are conspecific and that pyramid pigtoe is not a valid taxon. Individuals previously assigned to *P. rubrum* are now considered to be *P. sintoxia*, a wide-ranging common species. Because we are withdrawing the proposal to list the pyramid pigtoe, we are also withdrawing the associated proposed rule issued under section 4(d) of the Act.

DATES: The proposed rule that published on September 7, 2021 (86 FR

49989), to list the pyramid pigtoe as a threatened species with a rule issued under section 4(d) of the Act, is withdrawn on March 26, 2024.

ADDRESSES: This withdrawal, comments on our September 7, 2021, proposed rule, and supplementary documents are available for public inspection on the internet at <https://www.regulations.gov> at Docket No. FWS–R4–ES–2021–0092, and some of these documents are also available on the Service's website at <https://ecos.fws.gov/ecp/species/2781>.

SUPPLEMENTARY INFORMATION:

Previous Federal Actions

Please refer to our September 7, 2021, proposed rule (86 FR 49989) for a detailed description of previous Federal actions concerning the pyramid pigtoe. We accepted submission of new information and comments on our September 7, 2021, proposed rule for 60 days, ending November 8, 2021.

Finding

Consistent with section 4(b)(6)(A)(i)(IV) of the Act, we are notifying the public that we are withdrawing the September 7, 2021, proposed rule to list the pyramid pigtoe as a threatened species with an associated rule issued under section 4(d) of the Act (“4(d) rule”) (86 FR 49989). The basis for this action is described below.

Background

It is our intent in this withdrawal to discuss the new information identifying the pyramid pigtoe and round pigtoe as conspecific (belonging to the same species) that serves as the basis for our decision. A thorough review of the life history, ecology, and overall viability of what was considered pyramid pigtoe at the time the September 7, 2021, proposed rule was published is found in the species status assessment report (SSA report) (version 1.0; Service 2021, pp. 19–36).
