

This information is being collected to assure compliance with 40 CFR part 60, subpart TT.

Form Numbers: None.

Respondents/affected entities: Metal coil surface coating facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart TT).

Estimated number of respondents: 158 (total).

Frequency of response: Initially, quarterly, occasionally, semiannually, and annually.

Total estimated burden: 16,200 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$2,200,000 (per year), which includes \$151,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is no change in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations: (1) the regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Although there are no changes in the regulatory requirements and there is no significant industry growth, there is a decrease in the operation and maintenance (O&M) costs due to a calculation correction to the number of respondents using temperature monitoring systems.

Courtney Kerwin,

Director, Regulatory Support Division.
